23	Hannah Harley	34	Single, Prostitute	Diarrhoea	April 5 Hospital	
26	Hannah Hunt	24	Single, Prostitute	Rheum Chro.	April 5 Hospital	
April 1	Eliz th Hinton	25	Single, Labourer	Diarrhoea	April 5 Hospital	

John Wilson / c /

Surgeon

<p>Dyspepsia</p> <p>PA310780</p>	<p>2</p>	<p>Hannah Hunt aet 24 Single Prostitute Nov. 29/43 Downs Disch^d cured</p>	<p>Headache, loss of appetite and strength, pain & sense of weight in the region of the stomach after eating, languor & despondency, paleness of countenance, acidity, occasional but not severe pain in the stomach. Slight exertion produces fatigue & palpitation. Bowels slow. Tongue white. Pulse of usual frequency, but languid. Restless nights, frightful dreams, startings. For a considerable time before “Conviction”, was want to live intemperately, “for days together on biscuit and gin”.</p> <p><i>Rx Magnesia Subcarb. zfs</i> <i>Rhei Rad. Pulveris ʘ i</i> <i>Zingiberis Pulv. gr v</i></p> <p><i>HI ft pulvis, bis in die sumendus donec alvus soluta fit.(fuerit)</i></p> <p>1. December. The Powder was repeated twice yesterday, and the bowels were moved twice, Stools dark coloured slightly offensive.</p> <p>2. Listlessness and aversion to move. When questioned her answers are accompanied by tears. The bowels are freely open and the diet is carefully regulated. The Powders to be repeated when necessary.</p> <p><i>Rx Magnesia Subcarb zii</i> <i>Rhei Rad. Pulvis zi</i> <i>Tinct. Zingiberis</i> <i>Cinnamom. Co. aa zfs</i> <i>Aqua Menthae pip. zi</i></p> <p><i>HI ft Mistura cujus sumat cochleare ij ter quotidie</i></p> <p>3. <i>Contin' Mistura</i></p> <p>4. <i>Pergat</i></p> <p>5. Although the greater number of the symptoms are already much alleviated, she has still an aversion to move out of her berth. Is compelled to be on deck every forenoon, weather permitting. Bowels regular.</p> <p><i>Cont' Mistura</i></p> <p>6. Complexion clearer, appetite improved, diet – Preserved Mutton, Rice tc(etc?) Acidity occasionally troublesome.</p> <p><i>Rx Infus Gentianae zi</i> <i>Acidi Sulph. Dilute. m xij</i></p> <p><i>HI ft Haustus mane nocteque sumendus. Cont' Mistura</i></p> <p>7. <i>Cont Mistura et Haustus</i></p> <p>8. <i>Pergat</i></p> <p>9. <i>Perstit</i></p> <p>10. <i>Ut heri</i></p> <p>12. Rapidly improving.</p> <p><i>Cont Mistura tc</i></p> <p>14. <i>Pergat</i></p> <p>15. Discharged cured.</p>
<p>Synochus</p>	<p>3</p>	<p>Sophia Jacobs aet 27 Married Servant Dec 7 at Sea Disch^d cured</p>	<p>On inspection of the Prison this morning at the usual time, Jacobs, a well- behaved Mess woman was found in bed. She has been unwell, it would appear, for three or four days without making it known, thinking “it would wear off”. The illness commenced by the patient being alternately chilly and hot, with headache and thirst. At present there is great languor, lassitude and despondency, aversion to motion and disinclination to be questioned, flushing of the face & throbbing of the temples, and sickness of stomach. Pain in the back and limbs. Pulse quick, weak & irregular, bowels slow, a whitish fur on tongue.</p> <p><i>Rx Pulv. Rad. Ipecac. gr xv</i> <i>Antim. Potass.- tartratis gr i</i></p>

<p>Synochus</p> <p>PA310781</p> <p>PA310782</p>	<p>3</p>	<p>Sophia Jacobs</p>	<p><i>HI ft pulvis emeticus statim sumendus</i></p> <p>Rx <i>Jalapa Rad. Pulv. –</i> <i>Rhei R. Pulveris aa ʒi</i> <i>Hydrarg. Chlorid. Gr vi</i> <i>Olei Menth. Pip. m ij</i></p> <p><i>Aquae q.s. ut ft massa in pilula ij dividenda Sumat iij hora decubitus, Maneque, Sequenti.</i></p> <p><i>Solut. Magnesiae Sulphatis, cum Antim. Potassio tartratis ʒi 2^{da} quaque hora, donec alvus plene respondent.</i></p> <p>Diet low. Drink, Rice Water, Lemonade tr.</p> <p>8. The bowels have been moved several times, symptoms as yesterday. Skin hot & dry, Pulse languid & irregular. Tongue furred.</p> <p>Rx <i>Mistura Camphora ʒiv</i> <i>Liquor. Ammoni. Anisat.? ʒii</i> <i>Spirit Aether Nitra.</i> <i>Vin. Antim. R. tartratis aa ʒfs</i></p> <p><i>HI ft Mistura. Cochlearium amplum secundus horis sumendum</i></p> <p>9. The prominent symptoms today are headache, thirst, heat of skin, the fur on tongue is of a darker colour. Two of the aperient Pills to be given when necessary at night, and the draught on the following morning. Daily sponging with Vinegar and Water, sheets frequently changed, Bed pan removed immediately after use.</p> <p><i>Cont. Mistura Camphorae</i></p> <p>10. Two large dark-coloured, offensive stools during the night. The weakness is increasing, and when the patient is moved there is a tendency to Syncope, almost total suspension of the appetite for food. When asked how she is, the invariable answer is, very well. Skin hot and dry, Pulse weak & quick, thirst unabated. Drink is frequently offered to her and all her wants are carefully attended to. When raised in bed, the sense of sinking is induced, the breathing becomes hurried, & accompanied by cough. Alvine and urinary discharges immediately removed. Sponging continued. Bedding frequently aired. Hospital thoroughly clean, dry & well ventilated. <i>Cont. Mist. Camphorae. Repet' Pilul. aperients et Haustus pro re nata.</i></p> <p>11. The debility increases, expression of the countenance dull & listless, pupil dilated, tongue parched. The patient does not complain of thirst but never refuses it when offered. Is unable to turn herself in bed, says she has no pain nor uneasiness unless has the cough which is occasionally troublesome. Muttered incoherently during the night, when not disturbed during the day is constantly dozing. ??? sobs? "let alone". Pulse small & rapid.</p> <p><i>Cont Medicina & Medicament.</i></p> <p>12. Increased delirium during the night, abating as the morning advanced, & leaving the patient in a very low & depressed state. Always feels refreshed after sponging. Clothes dipped in vinegar & water to be applied to the head. Drink is frequently presented to her, of which she always partakes freely, although she never calls for it. Bowels open, passes occasionally large dark-coloured feculent stools. Skin hot and dry, pulse quick, small & irregular.</p> <p><i>Omitt' Mistura ut supra prescripta</i></p> <p>Rx <i>Misturae Camphorae ʒv</i> <i>Vin. Ant. Potass.-tartrat.</i> <i>Sp. Aethesis Nitrici aa ʒfs</i></p>
---	----------	----------------------	---

<p>Synochus</p> <p>PA310783</p>	<p>3</p>	<p>Sophia Jacobs</p>	<p><i>Tincturae Opii zii</i> <i>HI ft Mistura cujus sumat cochlearium amplum tertia quaque hora.</i> 13. Delirium during the night unabated, debility increasing. Speech thick & indistinct. The teeth become foul, tongue red at the edges, upper surface covered with a brownish crust. Skin hot & dry, Pulse small & rapid. <i>Cont^r Mistura tc</i> 14. Continues in a very depressed & utterly helpless state. When lifted in bed for the purpose of shifting body or bed linen, fainting is imminbly(spelling?) induced. Delirium during the whole of the night. A table spoonful of Port Wine in gruel to be given three or four times a day. <i>Cont^r Mistura tc</i> 15. Scarcely any perceptible change since yesterday. Debility and delirium are the most prominent & distressing symptoms. The Port Wine to be continued together with sponging & the cold applications to the head. <i>Cont^r Mistura</i> 16. The patient continues in an exceedingly low & depressed state, but apparently without losing ground. Skin, tongue & pulse as before. <i>Omittatur Mistura, loco cujus, habeat Bisulphatis gr iij mane nocteque</i> 17. Symptoms as above. The quantity of feculent matter passed by stool yesterday was unusually want of proportion to the quantity of Sago taken. <i>Cont^r Omniae</i> 18. There is not the slightest perceptible change. The patient appears neither to gain nor to lose ground. <i>Cont^r Quinae Bisulphate pulvis & habeat Vini Rubei zii 4^{dis} quotidie</i> 19. <i>Pergat</i> 20. Talks incoherently during the greater part of the night, & dozes all day, but always gives a rational answer when interrogated. The thirst is less urgent perhaps, but in other respects there is no improvement. <i>Cont^r Omnia</i> 21. Begins to relish the Port Wine in gruel or Sago, half a bottle a day allowed. Debility and delirium unabated. <i>Rx Aqua Menthe. Pip. zi</i> <i>Spittus Aetheris Nit. Zij</i> <i>Tinct. Opii m xxv</i> <i>HI ft Haustus hora decubitus sumendus</i> <i>Cont^r atera(athera?)</i> 22. <i>Pergat</i> 23. When disturbed continues in a state of stupor, when spoken to, however, she still returns rational answers. Has once or twice called for wine & gruel. <i>Cont^r Omnia</i> 24. <i>Pergat</i> 25. <i>Perstit</i> 26. The patient is so exceedingly low & depressed, that on being lifted out of bed, this morning, she fainted, and remained so long in a state of Syncope, that , for a considerable time, she appeared about to expire. Pulse, tongue & teeth as before, heat of skin natural. The sponging and the cold application to the head to be discontinued. The wine to be increased to a bottle in the course of the day. <i>Cont^r Haustus et Pulv. Quinae Bisulphatis.</i></p>
---------------------------------	----------	----------------------	--

<p>Synochus</p> <p><i>PA310784</i></p> <p><i>PA310785</i></p>	<p>3</p>	<p>Sophia Jacobs</p>	<p>27. <i>Pergat</i> 28. <i>Perstit</i> 29. Yesterday had frequent discharges of liquid feculent matter by stool, on one or two occasions, passed involuntarily. Passed a better night than usual and appears slightly revived today. Relishes exceedingly some fine oranges procured at Teneriffe for the use of the Irish, has taken in a little Soup made from Fresh Beef with a little rice in it. Skin soft & of a natural heat. <i>Continu^f Omnia</i> 30. The debility is still extreme, but the delirium during begins to subside. Skin soft, moist and cool. Pulse less rapid and more regular. <i>Cont^f Omnia</i> 31. <i>Pergat</i> 1. January 1844. With the exception of the debility there is a marked improvement. She takes now and then, a little soup made of Preserved Mutton. The tongue & teeth are cleaner, the skin is moist, the pulse is regular, & the delirium has abated. <i>Omitt^f Haust.</i> <i>Cont^f atera</i> 2. <i>Pergat</i> 3. Continues slowly to improve. Is very desirous to have a glass of Porter. Half a bottle of Port Wine and half a bottle of Porter to be allowed daily. <i>Cont^f Pulv. Quinae Bisulphatis.</i> 4. <i>Pergat</i> 5. <i>Perstit</i> 6. <i>Ut heri</i> 7. <i>Ut antea</i> 8. Begins to gain strength tho' slowly. Was propped up in her bed yesterday for half an hour. The tongue & teeth become cleaner. The pulse is regular but languid. Skin moist. appetite improving <i>Cont^f Omnia</i> 9. <i>Pergat</i> 10. <i>Perstit</i> 11. <i>Ut heri</i> 12. The patient was carried from the Hospital to the Poop yesterday, and remained there, on her bed, for nearly three hours. The exhaustion and the sensation of immediate dislocation were very distressing. She soon recovered, however, with the assistance of a little wine & water. 13. Passed a much better night than usual & is quite ready to encounter the inconveniences of removal to the poop, in the hope of ultimate advantage. Four glasses of wine & half a bottle of Porter daily. <i>Cont^f Quinae Bisulphat.</i> 14. <i>Pergat</i> 15. <i>Perstit</i> 16. Improves gradually & derives decided advantage from being daily carried to the poop. She was able to continue on deck yesterday from noon till about an hour before sunset. <i>Cont^f Omnia.</i> 17. <i>Pergat</i> 18. <i>Perstit</i> 19. <i>Ut heri</i> 20. <i>Ut antea</i> 21. Is not yet able to stand alone, but with the assistance of the Hospital nurses can walk a few steps. Her general appearance is much improved, and her strength & health steadily advance.</p>
---	----------	----------------------	---

<p>Synochus</p> <p>PA310786</p>	<p>3</p>	<p>Sophia Jacobs</p>	<p>The Porter to be omitted. The Quinae & the wine continued.</p> <p>22. <i>Pergat</i></p> <p>23. <i>Perstit</i></p> <p>24. <i>Ut heri</i></p> <p>25. <i>Ut antea</i></p> <p>26. Continues to gain strength daily, and the appetite rapidly improves. Three glasses of wine a day and the Quinine as formerly.</p> <p>27. <i>Pergat</i></p> <p>28. <i>Perstit</i></p> <p>29. <i>Ut heri</i></p> <p>30. A large tumour is forming on the right side of the os sacrum, her general health, however, is not in any way affected.</p> <p><i>Cont^r Vinum & Quinae Bisulphis</i></p> <p>31. <i>Pergat</i></p> <p>1. Feby. The tumour is large & hard without heat or pain or redness. In her present debilitated state it is not considered necessary to confine her to the Hospital for the sake of applying a discutient application. On this account, the tumor, for the present, will be allowed to take its course.</p> <p><i>Cont^r Vin. Rub. Et Quinae Bisulp.</i></p> <p>2. <i>Pergat</i></p> <p>3. <i>Perstit</i></p> <p>4. The tumor increases slowly, her health, however, continues steadily, to improve. She is able to with a little assistance to walk from the Hospital to the Poop.</p> <p><i>Contr. Vin. Rub. Omit^t Quinae Bisulph.</i></p> <p>5. <i>Pergat</i></p> <p>6. <i>Perstit</i></p> <p>7. <i>Ut heri</i></p> <p>8. <i>Ut antea</i></p> <p>9. The tumor becomes softer & larger, and another of a similar character is forming on the opposite side of the sacrum. A large oatmeal poultice to be applied and removed three or four times a day.</p> <p><i>Cont^r Vinum Rubrum</i></p> <p>12. Fluctuation is quite perceptible in the larger tumor. Her general health continues to improve. <i>Cont^r Vinum et Cataplas.</i></p> <p>15. Larger tumor opened, and a great quantity of feculent matter discharged. Abscess dressed with lint & simple ointment. Poultice to be continued for two or three days.</p> <p><i>Contin^r Vinum Rubrum.</i></p> <p>18. Matter from the abscess on the left side passes into that on the right, and the probe enters to its whole extent. A diagonal opening to the extent of two inches across the Scarum was made this morning. Both abscesses being thrown into one externally. The treatment to consist of simple dressing & pressure by means of a firmly stuffed pad, eight inches by five, kept in place by a lightly applied roller.</p> <p><i>Omit^t Cataplas. Cont^r Vinum.</i></p> <p>21. The discharge which was very large at first, is, gradually decreasing, and the improving state of the health has not, in any way, been interrupted.</p> <p><i>Cont^r. Curatic.</i></p> <p>24. The discharge is nearly gone; & the patient is able to walk about without displacing the pad. <i>Cont^r Curatic.</i></p> <p>28. Discharged cured, but should there be room, allowed to sleep in Hospital, remainder of the Voyage.</p>

Potass. tart. zi donec alvus plura respondeat.</i> 22. The bowels have been freely moved. With the exception of the headache, symptoms as above. Frequent sponging with tepid salt water. <i>Rx Pulv. Ipecac. Co. gr xij ft pulvis 4^{tis} horis sumendus donec diaphoris adsit.</i> 23. The patient is in a state of profuse perspiration, & has been so during the greater part of the night, and although the severity of the symptoms is evidently diminished, there is still great depression of spirits, and in the want of her death, she has this morning given directions about the disposal of some trifling property. <i>Rx Mistura Camphorae ziv</i> <i>Liquor. Ammon. Ant. Zij</i> <i>Vin. Antim. Potass. tart.. aa zfs</i> <i>IH ft Mistura Cochlearium magnum 2^{tis} horis sumendum.^r</i> 24. <i>Cont^r. Mistura</i> 25. Passed a restless night owing to pain and sense of weight in the region of the stomach. <i>Omitt^r Mistura pro tempore et sumat ol. Ricini zi</i></p>

PA310790

<p>Synochus</p> <p><i>PA310791</i></p>	<p>7</p>	<p>Jane Tate</p>	<p>4 p.m. <i>Repet' Mistura</i> 26. The febrile symptoms have nearly subsided. Skin moist, tongue cleaner, appetite improved, bowels regular. <i>Cont' Mistura</i> 27. Was able to be out of bed upwards of an hour yesterday, and today appears to be rapidly improving. <i>Omitt' Mistura</i> <i>Rx Quinae Bisulphatis gr ij</i> <i>Confect Aromat q.s. ut ft pilula mane nocteque sumenda</i> 28. <i>Cont' Pilula</i> 29. <i>Pergat</i> Diet. Half allowance of Preserved Meat & Potato & Rice to 30. <i>Cont' Pilula</i> 31. With the exception of weakness feels quite well, and is desirous to return to duty. <i>Quiescat</i> Jany 3/44 Discharged cured.</p>
<p>Gastritis Chronica</p> <p><i>PA310792</i></p>	<p>8</p>	<p>Hannah White Married aet 26 Tailoress Feby. 5./44 Hospital at Hobarton</p>	<p>Loss of appetite, nausea & frequent vomiting after swallowing liquids or solids, flatulency, heartburn, spasmodic pains in the stomach, great depression of spirits, prostration of strength. Pulse languid, skin dry, tongue clean, bowels slow. The patient it appears, has been for a considerable time subject to similar attacks and, since leaving the Downs, has been twice under treatment in the Prison. When there is more than usual motion in the vessel, the symptoms are reproduced or aggravated. When ill she refuses everything but barley water or gruel. From the state of the pulse, the tongue and the appearance of the stools, it is not likely that there is organic disease of the stomach. <i>Rx Hydrarg. Chloridi gr iij</i> <i>Confect. Aromat. Q.s. ut ft pilula statim sumenda</i> 12:30 P.M. <i>Rx Ol. Ricini zfs, tertia quaque hora donec alvus solutes sit.</i> 6. Nausea, together with frequent vomiting and spasmodic pains in the stomach. Bowels moved twice yesterday. <i>Omitt' Ol. Ricin. et Pilula</i> <i>Rx Succu Lemonis zfs</i> <i>Potassae Subcarbon. ʒ i</i> <i>Tinct. Zingiberis zij</i> <i>Aquae Menthe. Pip. zi</i> <i>HI ft haustus ter quotidie sumendus</i> 7. Strong Breezes?? Motion of the vessel appears to have aggravated the greater number of symptoms. The effervescing draught is occasionally injected, & nothing else that has been tried will remain on the stomach. <i>Cont' Haustus additione –</i> <i>Tinct. Opii m xv</i> 8. The gale continues. Frequent vomiting, accompanied by increased debility and despondency. <i>Cont' Haustus.</i> <i>Emplastrum Cantharidis amplum Epigastrio applicandum</i> 9. The gale continues, but the blister, which rose well, appears to have rendered vomiting less frequent, as well as to have diminished the spasmodic pains in the stomach. <i>Contin' Haustus minus Tinct. Opii m v</i> 10. The Gale has moderated but a heavy sea is running. Vomiting & pain of stomach greatly relieved, but there is increased weakness, despondency & utter helplessness. Retains on the stomach Rice, rice water, & gruel.</p>

<p>Gastritis Chronica</p> <p>PA310793</p>	<p>8</p>	<p>Hannah White</p>	<p>Bowels confined, <i>Omitt^r Haustus</i> <i>Rx Magnes. Carbonatis zfs</i> <i>Rhei Rad. Pulv. ʒi</i> <i>Zingiberis R. Diarrhoea	11	<p>Hannah Harley aetates 24 Single Servant March 23 at Sea Discharged to Hospital at Hobart Town</p>	<p>Frequent discharges of bloody matter by stool, accompanied by occasional pains, together with a sense of weight & uneasiness in the lower belly, nausea, vomiting, great depression of spirits, emaciation & debility, exsanguineous countenance, thirst, dry & harsh skin, Pulse quick & small.</p> <p>The Patient during the preceding part of the voyage had two slight attacks of Diarrhoea, both of which readily yielded to the usual treatment. It appears she had also two attacks of the same complaint in Millbank Prison, as well as a severe & protracted one in Shrewsbury Jail. The principal Medicines required for the treatment of this complaint were expended some time ago and the third half pint of Tincture of Opium, made on board, is now in use.</p> <p><i>Rx. Ipecac R. Pulv. ʒi</i> <i>Ant. Potass. -tartrat - gr i</i> <i>HI ft pulv. emeticus s.s.</i></p> <p>24. Symptoms as above continue unabated. Diet. Rice, Sago, plain soup. <i>Rx. Olei Ricini ʒfs statim sumendus</i> 4 P.M. <i>Rx Tinctura Opii ʒij</i> <i>Infus. Sim. Lini. ʒviij</i> <i>Mistura de qua sumentur cochlearia dua secunda quaque hora</i></p> <p>25. Bloody discharges continue, complete loss of appetite, increased anxiety, depression of spirits, and emaciation. Countenance sallow & sunken. Occasional delirium during the night, tendency to involuntary evacuations. Two sets of bedding are employed, parts of which are always being washed or aired. Felt greatly refreshed by a warm Salt Water Bath this morning which is ordered to be continued morning & evening. <i>Cont^f Mistura</i> <i>R. Tincture Opii m. xxx</i> <i>Aquae Menth. pip. ʒi</i> <i>HI ft Haustus hora decubitus sumendus.</i></p> <p>26. Low muttering delirium at intervals during the night. Continues to feel revived by the warm Bath. Thinks she feels somewhat better, but the debility and sense of sinking are still very distressing. There is not any perceptible difference in the frequency or appearance of the stools. Pulse quick & small. <i>Continuentur Mistura Haustus et Balneum Calidum</i></p> <p>27. Passed a tolerably good night without delirium. Stools less frequent, skin moist, thirst less urgent, pulse softer & less frequent. Drinks freely rice or barley water which is abundantly supplied. <i>Cont^f Omnia</i></p> <p>28. <i>Pergat</i></p> <p>29. Slept the greater part of the night, and this morning is evidently better. Stools less frequent & offensive. Appetite improved, skin moist, thirst less troublesome, no nausea sickness or vomiting. The warm Bath to be continued once daily. <i>Cont^f Haustus et Mistura</i></p> <p>30. Passed a good night and today complains only of the weakness. To have a little soup made of Preserved Mutton, and one glass of Port Wine daily. The stools are less bloody and begin to assume a more natural appearance in colour & consistence. <i>Omitt^r Haustus, Cont^f Mistura tertia quaque hora</i></p>
-----------	----	--	--

Diarrhoea	11	Hannah Harley	<p>31. Rested well during the night. Appetite improving daily. Stools slightly tinged with blood, less frequent & otherwise more natural in appearance.</p> <p><i>Omitt' Balneum Calidum</i> <i>Cont' Mistura</i></p> <p>1. April. Sleeps well. Appetite improving, continues to gain strength daily, and is able to sit up occasionally in bed.</p> <p><i>Contr Mistura</i></p> <p>2. <i>Pergat</i></p> <p>3. The vessel anchored off Hobart Town a little after noon yesterday. The Patient requested & highly relished soft bread & milk. Sits up during the day, & is able with assistance to walk across the Hospital.</p> <p>5. Discharged to Hospital Hobart Town.</p> <p>I</p>

GENERAL TOTAL	19	15	4				11
NOTE.—Medical Officers are desired particularly to Notice that the Numbers in each Disease and the general Total must not only correspond with the Sick Book, but also with the particulars contained in the several Nosological Returns for the period.							

GENERAL REMARKS

PA310801
John Wilson
Surgeon Superintendent

At daylight on the 13th & 14th November 1843, one hundred & seventy Female Convicts were embarked at Woolwich from Millbank Prison. With the exception of seven or eight who had been recently ill of Diarrhoea, their general health was good. A reference to the Sick Book will show that the health of nearly all continued good from the day of embarkation in England, to debarkation in Van Diemen's Land, a space of upwards of five months, or one hundred & fifty three days. Three only of the nineteen cases, were accompanied by danger. Sophia Jacobs, Jane Tate & Hannah Harley. Diarrhoea was the prevailing complaint throughout. Scarcely a day passed without a case, but when instantly attended to, the disease was easily & speedily removed, without confinement to bed, or admission to the Hospital. When the complaint made its appearance, the usual practice was the exhibition of half an ounce of Sulphate of Magnesia in two doses, or an ounce of Castor Oil in a similar manner, followed at bedtime, by twenty grains of Specics in Confectione Opii, or a dose of chalk Mixture with Tincture of Kine & Opium.

A month before our arrival at Hobart Town, all the Aperient, as well as the Astringent Medicines, were expended. In addition to the eight ounces of Tincture of Opium allowed, three times eight ounces were made on board and expended in the treatment of looseness. In the treatment of Diarrhoea Specics pro Confectione Opii was found an excellent remedy, the short time it lasted, and I am inclined to think it will always prove most valuable in a Female Convict Ship. Three times the usual allowance, in this instance, would have been of the greatest service. From first to last, there was nothing bearing the slightest resemblance to scurvy.

The Sick were visited twice a day regularly, and often more frequently. During a Gale, the Prison & the Hospital were inspected four or five times a day. When the weather permitted the usual routine on board was as follows. The Prisoners were allowed to be on deck from Sunrise to Sundown. 7.A.M. Windsails up, Scuttles, Ventilation, & Hospital Stern Ports open. Beds /32/ & Bedding of four messes in succession, were aired daily on the Poop. 8.a.m. Breakfast 8:30 A.M. Commenced cleaning lower deck. The space opposite each Mess was given in charge of and daily cleaned by the two Mess women, in the first place sweeping clean, and then by the application of course woollen clothes dipped in water & thoroughly wrung. Scraped occasionally. Especial care was always taken that not a superfluous drop of water was used. Except during a Gale, the Prison was as clean, dry, and well-aired as any Prison on shore. Vinegar, Chloride of Lime, or Hanging Stoves were never required. The abomination of Dry Holy stoning was carefully avoided, and ever will be, until ?? can be perceive the difference between the atmosphere of a Dry Holy Stone Ship, and a Sheffield Dry Grinder Workshop. 10. A.M. Visited sick and afterwards carefully inspected Hospital & Prison, daily turning up the whole of the Bottom Boards. 4.P.M. Visited sick & inspected Prison. The leading features of the System pursued throughout were unremitting attention when sick, constant employment when well, & unceasing Surveillance. When the vessel arrived at Hobart Town, there were three cases in the Hospital, Chronic Gastritis, Chronic Rheumatism, & Sanguineous Diarrhoea. Sophia Jacobs continued in a state of distressing debility, accompanied by low muttering delirium, upwards of three weeks. The discharge from two large abscesses on each side of the Spine in no way retarded recovery. Jane Tate the Principal Hospital Nurse appeared to owe her attack of fever to constant

attendance on Sophia Jacobs. Hannah Harley had a protracted attack of Diarrhoea in Shrewsbury Jail, besides one or two attacks in Millbank Prison. M.A. McDonald. This case is marked Amaurosis because the Symptoms appeared to indicate the disease, but her complete recovery renders designation (of) this more than doubtful. Ellen Lane, along with Diarrhoea, had Hydrops Genu, and here as well as in the case of Alice Moore, the latter disease readily yielded to the application of blisters. Jane Grady. This case is marked Dyspepsia in the absence of a more appropriate designation. The patient had led a very irregular life for several years and was nineteen times in jail before conviction. Her present illness appeared to be the consequence of her jumping over board half way between the Cape & Hobart Town. She had handcuffs on at the time, as a punishment for striking and wounding the Chief Officer. About fifteen minutes afterwards I caught her by the hair about half arm's length under water. Of the four cases sent to the Hospital Chronic Gastritis /White/ & Sanguineous Diarrhoea /Harley/ were discharged cured five or six weeks afterwards. Chronic Rheumatism /Hunt/ at the expiration of four months remained. Diarrhoea /Hinton/ after one or two relapses died in Hospital.
