

Surgeon's Journal of Her Majesty's Female Convict Ship Midas
 Mr Charles Cameron, Surgeon
 3rd day of June 1825 – 23rd day of December 1825
 During which time the Ship has been employed in a passage to Van Diemen's Land
 & New South Wales
 Adm.101 56/6

Men's Names, Ages, Qualities, Time when and where taken ill, and how disposed of.	The History, Symptoms, Treatment, and Daily Progress of the Disease or Hurt.	When discharged to Duty, Died or sent to Hospital
<p style="text-align: center;">PB10076.JPG July 1st 1825</p>	<p>About this time several of the Females were attacked with Bowel Complaints which I considered to have arisen principally from the change of Diet, all of these complaints easily yielded to purgatives, & indeed were so slight as to not require being put on the Sicklist.</p>	
<p style="text-align: center;">Mary Ann Smith æt: 27 Convict Woolwich, July 25th</p> <p style="text-align: center;">PB10077.JPG</p>	<p>Complained this morning of severe pain in the Umbilical Region, and pit of stomach, with frequent vomiting, Purging and tenesmus, and a sensation of burning in the Epigastric Region. Complains of some tenderness on pressure, but it does not appear to occasion much uneasiness; Abdomen slightly tumid. Pulse 90, Soft, skin little warmer than natural and moist, tongue foul, - thirst. – Has also severe headache; particularly about the left ear, with suffused eyes, an intolerance of light. She has frequently been afflicted with similar complaints before, and has been three or four times salinated for the Dysentoric affection. her left ear where formerly so affected has suppurated, and after the discharge of much matter has got quite easy and well, :- <i>Venesect: ad Zxvj Fomentat: ad Regio: abdomenis – Submur. Hydrag. gr. iij ter in die – Tinct. Opii g^{ma}. xx in Vespere</i></p>	
<p style="text-align: center;">July 6th Woolwich Mary Ann Smith</p>	<p>Her purging and vomiting continues very severe all day yesterday, but fever much diminished. Blood slightly buffy Pulse 86. –(Today) –She is much easier with respect to the vomiting, but purging still frequent, and tormina severe. Abdomen tumid, and slightly tender, but heat not increased. Pulse 84. Stools a dark red, as if mix^t with blood. <i>Fomentat: frequenter in diem. – Submur: Hydrag: et Tinct: Opii ut heri;</i></p>	
<p style="text-align: center;">Ann Phillips æt: Convict</p>	<p>(Vesp) Presented herself with Acute Inflammation of the left Eye, extending in the inferior half section of the Cornea. Hemicrania. <i>Sumat: Sulph: Magnesia Zj Hab^l: Lotio: ex Aqua veget? Mineralis.</i></p>	
<p style="text-align: center;">July 7th Woolwich Mary Ann Smith</p>	<p>Slight ptyalism; Is much easier in her Bowels and no vomiting since last evening, purging less frequent and with less pain, abdomen less tense, but headache and pain of the left Ear</p>	

	<p style="text-align: center;">Ann Phillips</p>	<p>continues severe. <i>Fomentat continuendum. – Omit^r. Submur: Hyd^r: et Opii</i></p> <p>Eye rather more inflamed than last evening. had but one stool. <i>Repatat: Sulph: Magnes: - et cont^r Lotioni.</i></p>	
	<p>July 8th Woolwich Mary Ann Smith</p>	<p>Ptyalism continues, vomiting has returned during the night; and Purging continues frequent – Yet her skin is cool and soft. Pulse 68, regular: Tongue slightly furred, and complexion fresh, - <i>Fomentandem? est frequentor in die, - Sago, et Arrow root</i></p>	
	<p style="text-align: center;">Ann Phillips</p>	<p>Inflammation of her Eye severe; and there are two small white specks on lower part of the Cornea; Bowels have been well opened. <i>Venæsect: ad Zxviiij – Cont^r: Lotio. –</i></p> <p>A short time after being bled, She was seized with a very severe Epileptic fit, but which did not continue long. I understand she is peculiarly subject to such fits, being sometimes seized with them three times in one day.-</p>	
	<p>July 9th Woolwich Mary Ann Smith</p> <p style="text-align: center;">Ann Phillips</p>	<p>Today is much better than yesterday, had but two stools since last evening and no vomiting. light diet to be continued and the fomentations omitted.</p> <hr/> <p>Inflammation continues severe, the Right Eye is not affected – <i>Repatat^r Sulph Magnes: Zifs – Emplast: Melois Vesic: tempor: sinistr: Cont^r Lotio: ut antea</i></p> <p>Very many of the Females complain of constipation and other complaints arising therefrom: and besides giving Medicines, I have sent the Matrons several times among them, to urge the necessity of going frequently and regularly to the waterclosets, and solicit stools, pointing out to them its advantages over Purgatives.</p>	
	<p>July 10th Woolwich Mary Ann Smith PB10078.JPG</p> <p style="text-align: center;">Ann Phillips</p>	<p>Did not rest well last night, and has been very uneasy all day today. Has severe headache, - vomiting is less severe, but purging very frequent, does not complain so much of the pain of her bowels. Pulse is 68 and regular. Skin, natural heat and moist; tongue very slightly furred, white; complexion fresh, and eyes clear; indeed from her appearance I would be led to think that she is in an improved state of convalescence, And the more so, as she refused, this morning, to take any more medicine. – Her mouth is affected to slight Ptyalism. Prevailed on her bathe her head frequently with cold vinegar and water, and to take <i>Tinct: Opii g^{ta} xxv, cum Magnes. g^r x</i> Vespere.</p> <p>Very little alteration; Blister rose well, and Purgatives operated briskly, and continued to do so all day. fever is very inconsiderable which leads me to think it is about to give way. Continue the Lotion. –</p>	

<p>July 11th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p>	<p>Very little alteration since yesterday. Neither vomiting or Purging is severe; although they still continue. She now complains mostly of her headache and appears to have a tolerably good appetite, - with some persuasion she took, - <i>Carbon: Magnes: g^{ra} x. bis in die.</i> Diet as before.</p> <p>Inflammation of her eye is much diminished, Bowels continue very free, fever very slight; <i>Cont^r: Lotio:</i></p>	
<p>July 12th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p>	<p>Has been much better today, and able to sit up most of the day, vomiting and Purging very trifling – In the evening a considerable occasion? of Fever. Medicines and diet as yesterday.</p> <p>Today can open her Eye full and Inflamⁿ altogether much less pain much diminished, - Blister continues to discharge freely <i>Repet^r Sulph: Magnes: et cont^r Lotio</i></p> <p>Many of the Females are still daily complaining of various Bowel complaints arising from constipation, which has been hitherto easily removed by Laxatives. I have been at much pains to impress upon their minds the necessity of going frequently and regularly to the watercloset, and I am in hopes that in a short time I shall be able to get on without such an expenditure of Purgative Medicine.</p>	
<p>July 13th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p>	<p>Is not so well today; had but little vomiting; But purging continues frequent and she complains of severe headache, Skin is hot but moist, and tongue but slightly furred, moist. Ptyalism is nearly gone off. I have frequently examined her pulse today and did not find it, exceed 72. in the Evening it as only 60. – Same treatment as yesterday.</p> <p>Continues improving. Bowels freely open. <i>Contr: Lotio:</i></p>	
<p>July 14th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p>	<p>Is as nearly in the same state as yesterday as possible, only she rested better during the night than usual. <i>Habt: Carbon: Magnes: g^r x. Acacia Gum: g^r x viij ter in die. Tinct: Opii g^{tra}: xx. vespere</i> all which she consented to take.</p> <p>Continues improving fast. <i>Lotion ut antea.</i></p>	
<p>July 15th Woolwich Mary Ann Smith PB10079.JPG</p> <p>Ann Phillips</p>	<p>Is rather better today but no particular change in her complaints otherwise. Yesterday evening Mr Beals Surgeon of the Institia, under whose care, I had understood from herself, she has formerly been for some time with the same complaint, did me the favour to visit her; and He suggested to me the propriety of using Mistura Cretæ which, He formerly found beneficial in her case. I instantly, willingly, complied with His suggestion and she has taken it today every four hours.</p> <p>Still improving. Lotion continued.</p>	

<p>Jean Watts æt: 24</p>	<p>Presented herself this morning, with severe pain in her bowels, I saw her last evening when she told me she had not had any motion of her bowels for the last 14 days. I then gave her, Ol: Ricini: Z j – But it had no effect and the pain is now severe, with fever, tongue foul; <i>Hab^l: Ext^l: Colocynth: Comp: g^{ra}. x.</i> – an Enema to be prepared. (Noon) No alteration, except pain more severe; <i>Enema Exhibit^f</i> - In a short time afterwards she had a copious stool, and as very much relieved; -</p>	
<p>July 16th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p> <p>Jean Watts</p>	<p>Is nearly in the same state as yesterday, in appearance she is very little altered, and on many Examinations I have not found her pulse above 68, and sometimes only 60.- <i>Cont^f: Mistura Cretæ quator in die.</i>-</p> <p>Improving, treatment as yesterday.</p> <p>Convalescent. No medicine.-</p>	
<p>July 17th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p> <p>Jean Watts</p>	<p>No apparent alteration since yesterday except that her vomiting is less. <i>Cont^f: Mistura Cretæ.</i></p> <p>As yesterday. <i>Lotio ex Liq. Plumb acetat? aquae</i></p> <p>Quite well. Put off List.</p>	<p>Put off List July 17.</p>
<p>July 18th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p>	<p>Is as nearly as yesterday as possible. She however appears to become more reduced: Her mouth is getting well . <i>Cont^f: Mistura Cretæ ter quatore in die.</i></p> <p>Not much alteration for the last two days, there is still much swelling of the tunica conjunctiva. <i>Repetand: Sulph: Magnes: Zj</i></p>	
<p>July 19th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p>	<p>Is much easier today although she has no apparent alteration in any of the Symptoms, which come my observation..- <i>Cont^f: Mistura Cretæ.</i></p> <p>No alteration for the last two days. Purgative operated well. <i>Repetand: Empl: Meloi tempori Sinistri - - -</i></p> <p>Several of the females complain daily of some complaint which removed by a Purgative, etc.</p>	
<p>July 20th Woolwich Mary Ann Smith</p> <p>Ann Phillips</p> <p>Maria Smith æt: 27 Convict</p>	<p>No alteration, begged to have a glass of Beer which I sent Her from then Cabin. <i>Cont^f: Mistura Cretæ.</i> Diet as formerly.-</p> <p>Is no better, and her right Eye appears tender. Bowels well open, Blister rose well.</p> <p>Has a child about two years old on board. has not complained of any Illness; but was seized three different imes during the day,</p>	

		with very sever Syncope, out of which she recovered but slowly; with the use of frictions with Aqua Ammonia, on the temples and stomach etc.-	
July 22 nd Woolwich Mary Ann Smith		Is very much better today and has been out of bed the greater part of the day. vomiting gone off but purging still continues but much less severe, <i>Cont^f: Mistur: Cretæ</i>	
Ann Phillips		Nearly in the same state; <i>Repetand: Cathart: et Cont^f: Lotio: frigid:</i>	
Maria Smith PB10080.JPG		Is quite well today. discharged	July 22 nd
July 24 Gravesend Mary Ann Smith and Ann Phillips		are both very much improved, same medicines	
July 26 at Sea towards the Downs Mary Ann Smith		Has been very much better for the last few days. But last evening and today, Seasickness has affected Her so severely, that her stomach and Bowels complaints have again returned with their full force, <i>Cont^f: Mistura Cretæ</i>	
Ann Phillips		Is very much improved. <i>Cont^f: Lotio:</i> Today, almost, all the females were very sick from the Ship's motion, when I called as many of them together as I could, and put them on their guard against allowing their Bowels to become constipated.	
July 27 th in the Channel M.A.Smith		Is much better again today, and has got out of Bed. <i>Mist: Cretæ</i> Very many of them, came forward this morning for laxatives. – gave them according to the degree of their Complain, either a <i>Pill. ex Extract: Colocynth: Comp: g^{ra} iij. Submuriat: Hydrarg. g^{ra} iij - Oil/pil? Sulph. Magnessiæ.</i>	
July 28 th off the Lizard Mary Ann Smith		Is severely affected with Sea Sickness, Severe vomiting, but very little Purging, no fever. tongue slightly furred .- <i>Cont^f: Mistura Cretæ.</i>	
Ann Phillips		Well, to wear a shade over her Eye; discharg ^d Two thirds of the females have been severely affected with Sea Sickness. I have gone frequently among them, to see what state they were in, and gave laxatives to very many of them and ordered for them, whatever they thought they could make use of. Gruel is their favourite.	Discharged July 28 th
July 29 th Bay of Biscay Strong Easterly Breeze		M.A.Smith is nearly as yesterday, and the females generally are more sick if possible than before; have been among them in the Prison a great part of the day. giving to each of them some medicine according to the Symptoms of their particular case.	

<p>July 31st Bay of Biscay Nearly calm</p>	<p>Mary Ann Smith is nearly as before, and females generally are much better today. But very many of them requiring purgatives which are nearly rendered inactive from the Torpor of the Bowels arising from Sea Sickness besides a great quantity of them being returned as soon as taken, Several of them have had Enemas, and some of them are very much reduced in Consequence of not being able to retain anything on their Stomach, frictions with anodyne liniment, and hot fomentation to the Epigastric Region have been used apparently with much effect in some cases.</p>	
<p>Aug^t 2nd towards Madeira Mary Ann Smith</p> <p>Margaret Dwyne æt: 28</p> <p>Ann Leak ætat: 19</p> <p>Jane Hayes æt: 21</p> <p>PB10081.JPG</p> <p>Ann Johnson ætat: 17</p>	<p>I do not well know what to think of this woman; She has no fever, Her complexion is as fresh and as full as when she first entered the Hospital, and yet she complains that her vomiting and purging is as severe as ever, and today complains of severe pain in the left Hypochondriac Region: but has great objection to a blister being applied. <i>Hab^t. Mistura Cretæ. – Liniment: Ammoni: infricand: sedi dolori.</i></p> <p>Today. I directed that the severest cases of Seasickness and its Consequences should be brought into the Hospital where I would have them more immediately under my observation. And the following were accordingly provided with births.</p> <p>Has suffered much from Sea Sickness since we first sailed, and notwithstanding she has taken purgatives of every description, no motion could be procured. She has now (9 A.M.) much pain in her Bowels, pain in her loins, and headache and much fever but Pulse full, and skin moist tongue foul, she also complains of a very unpleasant sensation of heat or burning in the Epigastric Region. <i>Hab^t. Ol: Ricini Zj.- exhibit: Enema. Cathartic: fomentations to the Epigastric Region.</i> In the evening she had two loose stools after passing the Enema, and felt her Bowels considerably relieved.</p> <p>Has also suffered much from Sea Sickness, Bowels very Costive and painful (tormina) but no fever. tongue very foul. <i>Hab^t: Ol: Ricini Zj.- Enema Cathart:</i></p> <p>Has suffered much also, about noon today she had a sever fit of Syncope on deck, from which she recovered with great difficulty. She is very much reduced with incessant vomiting and unable to retain anything on her stomach. Her Bowels are in a very constipated state, but has little pain except uneasiness in the region of the stomach, and headache, both of which I attributed to the motion of the Ship, and constant vomiting. Several purgatives given but were all rejected. An Enema, which brought away but very little; fomentations, and frictions with Liniment Ammoni: to the region of the Stomach.</p> <p>Has suffered severely and is very much reduced with Sea Sickness. Has taken several purgatives and her Bowels have been kept open by them, till within the last two days, since which she</p>	

		<p>has had no motion. <i>Hab^t: Olei Ricini Zj.</i></p> <p>Several others are very ill but are treated in their Births, I have not therefore put their names upon the Sicklist. I have kept several women besides those two who are attendants in the Hospital, to make drinks, gruel, Toast and water, Sago, Rice, and Soups for the sick generally.</p>	
<p>Aug^t 3rd towards Madeira MaryAnn Smith</p> <p>Marg^t. Dwyne</p> <p>Ann Leak</p> <p>Jane Hayes</p> <p>Ann Johnson</p> <p>Mary Tapper æt: 21</p> <p>Vespere Jane Hayes</p> <p>Ann Leak</p> <p>Mary Tapper</p> <p>Marg^t. Dwyne</p>	<p>Case as doubtful as ever. Complains as yesterday yet walked some time on deck today with every appearance of health and even cheerfulness, treated as ysterady.</p> <p>Complains of severe headache, and pain in her loins. Bowels and Epigastrium very much relieved, fever and heat of skin much less; and perspiration copious, no vomiting since yesterday. 2 P.M. Repeat the <i>Ol: Ricini Zfs.</i></p> <p>Had Two stools, and her Bowels are much easier, Complains very much of headache and giddiness, no fever. <i>Habt. Sulp: Magnes: Zfs</i></p> <p>Very little alteration, no stool, tongue foul, and dry, but fever slight; complains of headache, but no pain in her Bowels, <i>Repetand: Enema et capiat Ext^r. Colocynth. Comp. g^{ra}. v.</i></p> <p>Has had no stool, but is easier than yesterday. Tongue clean; pulse regular and skin cool. <i>Habt. pil ex Extract. Colocynth. Comp. g^{ra}.v.</i></p> <p>Complains of severe pain in the Epigrisine(sic) and Hepatic Region; Headache and pain in her limbs, Bowels constipated. Pulse full and quick. skin hot, and face much flushed; <i>venæ sectio ad Z xxiv. Hab^t. Sulph: Magnesiae Zi</i> without giving much relief, although two stools were procured.</p> <p>Very little alteration, tongue is more clean, and moist, pill was rejected almost immediately, to be repeated, and a little wine and water to be given at her earnest request.</p> <p>Had one stool, and is much better, skin natural</p> <p>Fever remains nearly the same, skin hot but moist, Pulse full but soft. – Complains of much pain in her Bowels (tormina). <i>Habeat Sulph. Magnes. Zfs</i></p> <p>One stool; remains in nearly the same condition otherwise.</p>		
<p>Augt. 4th towards Madeira Therm^r 73</p>	<p>M.A.Smith is very nearly in the same state; does not appear to be much purged, although she states the contrary, she is still affected with Sea Sickness, eadem Medicamenta</p>		

Marg ^t Dwyne	Had one loose stool this morning, Headache is still severe, and has much pain in her loins. Skin is hot, but moist, Pulse quick but full, and soft. Tongue foul, and from the increased rolling motion of the Ship, has suffered much from vomiting this morning. Embrocations over the Epigastrium with Anodyne Liniment.
Ann Leake	Rejected the medicines food taken during yesterday and has had no motion since yesterday, has slight pain in the abdomen; no fever. <i>Habeat Ext^r. Colocynth: Comp: g^{ra}. v.</i>
Jane Hayes	Vomiting continues very severe, and whatever medicine she takes is rejected almost immediately. Has had no stool; But there is no fullness or pain of the abdomen, nor fever, an Enema to be given immediately. <i>Hab^t. Ol: Ricini Zfs.</i>
Ann Johnson	Has had several stools, and is much better today. No medicine.
Mary Tapper	Had four motions during the night, and altogether feels better, Skin is still hot, Pulse 92, Soft. Has Headache, Pain in the Epigastrium and Hypocondriac Region continues. <i>Hab^t. pil ex Ext^r Colocy: Comp. g^{ra}. iij. Submuriat Hydr: g^{ra} ij.</i> Embrocation with Anodyne Liniment.
PB10082.JPG Vespere	
Marg ^t . Dwyne	Is nearly as in this morning, says she has not voided urine for several days <i>Habt: Spirit Ether. Nitros zifs in aqua pur. Contr. Embrocat.</i>
Jane Hayes	Enema was retained about an hour, but brought away no fecal matter; vomiting continues severe but she has no pain in the abdomen or fever. <i>Habt. pil ex Extr. Colocynth. Comp. gra v. – Vini Rubri Ziiij. Aqua Zviiiij – M in Palilatim in parte frequenter. Sumat. Cont^r. Embrocat. Liniment. Anodyne.</i>
Mary Tapper	No motion in her Bowels since the morning. Is nearly in the same state pil <i>Extr. Colocyn. Comp. g^{ra}. v.</i>
Aug ^t . 5 th towards Madeira	Mary Ann Smith, Complains of severe pain in the left Hypochondrium, and says that the purging has been more frequent since last evening - frequent Embrocations to the seat of the pain and former medicines continued.
Ann Leak	Is altogether much easier, but has had no motions in her Bowels – <i>Habeat. Sulph. Magnes. Zfs.</i>
Jane Hayes	Is much relieved of her vomiting, and is easy in her Bowels, but as yet has not had any passage. <i>Exhibit^r. Enema Cathart:</i>
Ann Johnson	Is getting better, but is very much reduced. Is again constipated in her bowels; <i>Habeat. Sulph. Magnes. Zfs.</i>
Marg ^t Dwyne	Voided urine in some quantity this morning and has no complaint except Headache. Bowels costive; Fever slight; <i>Hab^t. Sulph.</i>

<p>Mary Tapper</p> <p>Catherine Shaw ætat: 20</p> <p>Vespere</p> <p>Ann Leak</p> <p>Jane Hayes</p> <p>Marg^t. Dwyne</p>	<p><i>Magnes. Ziij.</i> Is better, but has still considerable fever; Tongue foul; but no vomiting.</p> <p>Complained last night of severe pain in the Scrobiculis Cordis, had a purgative last evening, which operated well; but the pain still continues with quick pulse; foul tongue; She has been severely affected with Sea Sickness. <i>applicand: Emplast: Meloi Visicat: Epigastris.</i></p> <p>Has been freely open in her bowels and is much easier, to have some wine & water.</p> <p>After she passed the Enema, she had two free stools; she is now better and more cheerful; to have a little wine and water.</p> <p>One motion in her Bowels</p> <p>All of them had fomentations, and Embrocations with Anodyne, and Ammonial Liniment during the day.</p>	
<p>Aug^t 6th - off Madeira</p> <p>Ann Leak</p> <p>Jane Hayes</p> <p>Ann Johnson</p> <p>Marg^t. Dwyne</p> <p>Mary Tapper</p> <p>Catherine Shaw</p> <p>Mary Ann Wood æt: 6</p>	<p>Mary Ann Smith is nearly in the same way. Sometimes complaining of pain in her left side and purging; and sometimes easy; <i>Cont^f. Mistura Cretæ.</i></p> <p>Appears considerably better, has no complt. except Headache; and occasional vomiting.</p> <p>Continues much easier; no motion since last night. vomiting not so frequent; noMedicine.</p> <p>Is much better, and able to get up, but is still constipated in her bowels.-</p> <p>Had several stools in the night, and this morning has no complt. except headache.</p> <p>Had two motions Complains of much pain in the right Hypochondrium, and Epigastrium. pulse quick but not hard skin hot, tongue white; has a short cough, and pain increased on pressure with the hand. – <i>Habeat pil ex Extract: Colocynth: Comp.gra. iij. Submur: Hydrarg: gra ij. bis in die.</i></p> <p>Blister is well risen, Purgative was repeated last evening, and has operated well; Pulse is quick; but not hard, and skin not hot; pain in her breast continues, with slight cough. <i>Habt. pil ex Calomel et Ext. Col: Comp.</i></p> <p>Yesterday Evening while looking among the people , observed one of the Children about six years of age, (M.A.Wood) to be slightly afflicted with Psora, and ordered herself, and mother and younger brother into the Sick Hospital. – Confined them by</p>	

<p>Mrs Atkins</p> <p>PB10083.JPG</p> <p>Vespere</p> <p>William Wood</p> <p>Mary Tapper</p>	<p>themselves, and ordered the mother to rub them and Herself with Ungt: Sulph: Comp: twice a day. This morning found that the little Boy, (two years of age) was very feverish, gave him a small dose of Castor Oil; bathed Him in warm water; and directed that He should not be rubbed.-</p> <p>Complained last evening of severe pain in the abdomen, tender on pressure, and excruciating Headache. Pulse quick and small, skin hot, tongue foul, Eyes red and watery, with every appearance of (word left out)? except that her Bowels are loose and has been for the last fortnight. Took <i>Olei Ricini Zj.</i>- and fomentations to the abdomen.</p> <p>This morning is not relieved, although the Purgative operated freely, Symptoms nearly the same. Pulse 132. and small. <i>V Sectio ad Zxxiv</i> which gave her instant relief although she submitted to it with great reluctance. – Every symptom nearly as violent as they were in the forenoon. Skin pungently hot; Pulse 128. and smaller and harder than in the morning; and abdomen tender on pressure with severe pain about the umbilicus extending towards the Loins; Has had three motions in her Bowels, she is of a spare and delicate habit of Body; <i>Repetand: Venæsectio ad Zxviiij</i>, after which she was very much relieved, both in her head and Bowels; had a degree of Syncope after each bleeding.- At 9 P.M.(two hours after she was bled) I visited her again; and found that she was still much easier; and Pulse soft, but skin intensely hot; had one stool after she was bled, and she expressed much regret that she did not allow me to blood her sooner. Blood taken highly buffy.- She is very low spirited and thinks she cannot live. Her complaint I have no doubt has arisen from violent mental agitation, occasioned by some reflections on her conduct by Mrs Davis, a Passenger in the free women’s Prison; and who also put herself into such a Passion; as to require copious Venæsection, and who is yet in a precarious state of health.</p> <p>This evening found this little infant in a very feverish state, his Bowels had been very open before, but appear to have been purged by the Castor Oil. I could not detect any local disease, his bowels are quite soft and apparently free from pain. I was told that the mother did not pay her two children the attention which she ought, and an Instance came before myself this afternoon which seemed to corroborate this, in Her giving the childrens allowance of water for the purpose of washing her clothes; I therefore directed one of the women in the Hospital to look after the children (privately after lecturing the mother on the impropriety of her conduct. She tells me the Boy has been ill about eight days although I have not been informed of it. – not well knowing what to do, I merely gave him a little Magnesia and directed some very thin Sago to be got ready for his drink during the night.</p> <p>Very little alteration since the morning; the pain at the pit of her stomach, and right Hypochondrium is still severe if not increased.</p>	
--	---	--

	<p>Her gums appear to be slightly affected; - <i>Cont^f. Pil: ut antea., et applicat^m. Emplast. Meloi Magnum sedi doloris.</i></p> <p>The other patients appear all somewhat better this evening, and every attention is paid to their diet, drink and general comfort.- From the very considerable motion of the Ship today very many of the females are very severely Sea Sick this afternoon. –</p>	
<p>Augt 7th Towards Teneriffe</p> <p>Mrs Atkins</p> <p>Mary Tapper</p> <p>Will. Wood</p> <p>PB10084.JPG</p>	<p>Today the wind blows strong from the Eastward with a very heavy Sea, and many of the females severely Sea Sick.</p> <p>Is much easier this morning, had one motion since I saw her; her abdomen is still very tender , and Pulse quick and firm; skin hot and dry. <i>Repet: Vsect: ad Zxviiij.</i> Syncope. (Vespere) is much easier but skin is still hot, and Pulse quick and abdomen tender to the touch but not in the smallest degree tumid; no motion. <i>Habeat. Ol: Ricini Zvj.</i> fomentations to the abdomen</p> <p>Is nearly as last evening except that her fever appears increased, with flushed face, extracted Zxx of blood, and cont^d. the pil.</p> <p>No apparent alteration, much fever; told his mother I consider him in a very dangerous state, and she appeared to care very little. gave him a small dose of Castor Oil, and had him put in a warm bath twice today.</p>	
<p>Augt. 8th off Teneriffe</p> <p>Mrs Atkins</p> <p>Mary Tapper</p>	<p>Strong N.E.Gale, with a very heavy Sea and many of the Females very Sea Sick particularly those on the Sicklist and confined to Bed in the Hospital; Indeed during the greatest part of the day it was distressing to see them, and were it possible I would have requested that the Ship should have gone in to Teneriffe, for a few days, to allow them a few days respite from their distressing situation.</p> <p>had several stools since last evening, and this morning was very easy, and in tolerable good spirits; her Pulse about 98. and skin less hot, in the evening she complained of a sensation “resembling Heartburn”, and her skin was rather more hot and dry, had no motion since the morning. gave her some drink in which there was ziiiij Supertart: Potassæ dissolved, for the night. Some time after the prison was locked, I was called for, and found her foaming at the mouth and crying bitterly, saying that she could never live, her skin was pungently hot and dry, and she complained of much pain, and heat in the abdomen, and a sense of great weakness. <i>Repet: VSect: ad Zxviiij</i> after which she was very much relieved; and her Pulse, and heat reduced.</p> <p>Pain in the right Hypochondrium is less severe but it is more severe towards the Pit of the Stomach. Headache; Face flushed; Bowels have been well open since last night; Pulse 96, but soft. Skin is very hot; short frequent cough; which she says, aggravates the pain of her head, but not the pain in the Epigastrium; Her</p>	

<p>William Wood</p> <p>MaryAnn Smith</p>	<p>Gums are evidently affected, but the middle of her tongue is dry; and furred white, does not eat anything; appears to despond, and I find the greatest difficulty in getting her to tell me her feelings. Says she has much uneasiness about the top of her right shoulder, and the right side of her neck. Applied another Blister, to the Epigastrium more to the left than it was before, and gave her three of the pills today with the intention of bringing on Ptyalism.</p> <p>Very little alteration in his appearance, but he is much exhausted. I am not yet able to say after much attention to him, that He has got any local complaint. I am satisfied that there is no disease of the abdomen, from the softness of it; and from the easewith which he allows me to feel and press it. He has got some cough but it is so free, and slight; that it would not account for his illness and his eyes are too clear for much affection of the head. Had but two motions in his bowels today, and those almost natural; slightly green – had two small doses of Magnesia and was put into a warm bath.</p> <p>Besides her other Complaints, has been violently Sea Sick today, her Bowels in Consequence are less relaxed, but looks worse today, than she has yet done. Embrocations to the Epigastrium, and her former medicines.</p> <p>The other Patients confined to bed, (six in N^o.) I can only give a general account of. They are all without any local Complaint of importance, and I merely attended to the State of their Bowels; used Embrocations of the Epigastrium; and attended particularly to their diet and drink, giving three of them a little wine. Those whose cases I have given I consider in danger, unless the means employed should very soon have the power of arresting the progress of their disease. The Case of Enteric although severe, I have every reason to think will do well, from the which Venæsection has in arresting the severity of the Symptoms. The case of Hepatitis I think of doubtful Issue, from her reluctance to give me a clear account of the Symptoms; together with the difficulty of abstracting a sufficient quantity of blood from her (She having fainted in both instances) and the little effect which it had upon the disease. The Child (Wood) being unable to ascertain the nature of his complaint; I cannot as yet presume to give even a tolerable prognosis.</p>	
<p>Aug^t 9th Southard of Teneriffe</p> <p>Mrs Atkins</p> <p>Mary Tapper PB10085.JPG</p>	<p>Weather more moderate, But a heavy Sea still, and several of the Females severely Sick.</p> <p>Feels easy this morning. has no pain in the abdomen or headache, Skin is still hot, and Pulse 96. no motion in her Bowels since yesterday. <i>Habeat: Ol: Ricini Zfs.</i> – Blood taken last evening highly buffy.</p> <p>Headache and cough continues, but cough is more free ; pain in the Epigastrium she thinks easier; Blister well risen. Pulse is 96</p>	

<p>William Wood</p> <p>Mary Ann Smith</p> <p>Margaret Dwyne</p> <p>Ann Leake</p> <p>Jane Hayes</p> <p>Ann Johnson</p> <p>Vespere Will^m Wood</p>	<p>and much softer than it has been, and heat of skin nearly natural; and moist; tongue less foul and moist but no Ptyalism. One stool in the night. She thinks she is easier, but will not take any nourishment except drink. <i>Conf. Pil: ut antea ter in die.</i></p> <p>Very little alteration except that He appears very low. Skin is not so hot, and pulse is less quick; No stool since yesterday. <i>Hab^t: Ol: Ricini Zfs.</i> to be put in the warm bath as yesterday. Sago made very thin to be given him frequently.</p> <p>Is severely sick this morning, with frequent purging; and she complains of Pain of the abdomen and left Hypochondrium, skin cool, and moist. Pulse 64, and soft. <i>Habeat Olei Ricini Zfs. Tinct: Opii g^{ma} xx. - Embrocat: ex Liniment anodyne sede doloris frequenter.</i></p> <p>Has no local complaint, except headache, but Sea Sickness is severe. Bowels rather costive. <i>Habeat pil ex Ext: Col: Comp: g^{ra}v</i></p> <p>Is better, Bowels were opened yesterday by purgatives.</p> <p>Is also very much better, but bowels constipated. Laxatives to be repeated till bowels are open.</p> <p>Is also better, but in the same condition as Hayes. the same treatment.</p> <p>Bowels has been freely open, but no alteration, skin is not hot, nor even his hands and feet, but pulse is very quick. <i>Habt. Magnes g^f. v.</i></p> <hr/>	
<p>Aug^t 10th Towards the Cape De Verd Islands Mary Ann Smith</p> <p>Mary Tapper</p> <p>William Wood</p>	<p>Fine weather; motion of the Ship much less, and females generally much better.</p> <p>Is much better this morning, no vomiting; Purging slight; but is much debilitated in appearance, and is perfectly free from fever. – Omit her former medicines and have Port Wine and Bark three times a day.</p> <p>is also better, But Ptyalism has not yet been brought on. <i>Conf. Pilul. ut antea.</i></p> <p>Skin is not hot generally, and it is only at times that the palms of his hands and soles of his feet are hot. He is very restless and waves his hands and legs in the manner of Hydrocephalic Patients, but on the other hand the pupils of his eyes are affected by light and darkness in a perfectly natural way. his Eye is clear and not suffused in the smallest degree; his tongue is clean; and he takes whatever drink is given him; refusing it only when he has had enough; I cannot detect that there is any tenderness of the Integument of the Cranium. His Pulse is quick and the Pulsation of the Carotid Arteries is more perceptible than natural. No</p>	

	<p>motion in his Bowels since yesterday. <i>Hab^t. Pulv: Rhei g^r iij Submuriat: Hydrarg: g^r. ifs. – Sumat: Tinct: Digit: g^{ta} vj ter in die. Balneum Tepidum: (Noon) No motion Hab^t: Ol; Ricini Zj</i> after which he soon had two loose stools of a perfectly natural color.</p> <p>The other Patients are much better today. Most have been able to be on deck the greater part of the day. – Diet, drink and the state of their Bowels being principally attended to.</p>	
<p>Aug^t 11th Towards the Cape De Verd Islands</p> <p>Mary Ann Smith</p> <p>Mary Tapper</p> <p>Will^m Wood</p> <p>Ann Johnson & Catherine Shaw</p> <p>Mrs Atkins</p> <p>Ann Leak PB10086.JPG</p> <p>Marg^t Dwyne & Jane Hayes</p> <p>Marg^t Daley æt: 24</p>	<p>Fine weather, and motion of the Ship much less. The Females generally recovering fast from their Seasickness.</p> <p>Is nearly as yesterday, very little Purging or vomiting, and pain in her side nearly gone. <i>Conf^t: Cortex Cinchon et Vinum Rub: ter in die.</i></p> <p>Today her cough is rather frequent and teasing, her headache severe, Pulse 104. Bowels open, Skin nearly natural heat; mouth is not dry but no Ptyalism. Pain in the right side and towards the right shoulder continues. <i>Vsect: repetand: ad Zxiiij. Slight Syncope, Contr: Pilul: ut antea.</i></p> <p>No apparent alteration, no stool since yesterday. Same treatment as yesterday with the exception of the Rhubarb and Calomel. – The Castor Oil having been given.</p> <p>Both of them are convalescent, and directed to keep on deck as much, during the day, as possible.</p> <p>has been tolerably easy all day yesterday, and had taken a small dose of Castor Oil which gently opened her Bowels, in the Evening she was attacked with rather a smart pain in her bowels with intense heat of the skin. <i>Zxij</i> of blood was taken from her arm which gave her instant relief. – This morning she remains very easy in her Bowels but her skin is hot, and Complains of a feeling as if her Bowels were all gone. Bowels continue free.</p> <p>is much better but Complains of a severe headache to which she is subject, and for which she has been in the habit of being blooded, and begged that I would perform that operation for her now, which I did, and having taken about <i>Zx</i> she fainted. –</p> <p>are both Cconvalescent, but the Bowels of Both remain very torpid, and for which it is necessary to give immense quantities of medicine.</p> <p>was taken into the Sick Bay this morning with severe Cholic, having no motion in her Bowels for Ten days although she has taken considerable quantities of Purgative Medicines in her Berth. <i>Hab^t: Olei Ricini Zj.- administ^r. Enema Cathart:</i> about 1 P.M. she had a copious motion and obtained much relief.</p>	

<p>Vespere W^m Wood</p> <p>Mrs Atkins</p> <p>Ann Johnson</p>	<p>Bowels have been open, and skin is cool; The arterial action is considerable, particularly about the neck and head, but the heat of these parts is not increased, but he looks very ill, his upper Eyelids cover the pupils, his upper lip is drawn up, and he is continually picking at his nose, or moving his hands and legs about. Stools were perfectly natural. takes his food (generally Sago) well. Shaved the upper part of his head and applied a pretty large blister.</p> <p>Continues very easy, but her skin is still very hot; Pulse quick, soft and more full than it has yet been. <i>Hab^t; Pilul ex Extract: Colocynth: Comp: g^{ra} iij.</i> and gave her most particular directions to eat nothing solid.</p> <p>put her off the Sick- List, but directed her to attend morn^s and even^s in the Hospital.</p> <p>No alteration in the others.-</p>	<p>Discharged</p>
<p>Aug^t 12th Towards the Cape De Verds</p> <p>Mary Ann Smith</p> <p>Mary Tapper</p> <p>Will^m Wood</p> <p>Mrs Atkins</p>	<p>Very fine W^r and the females recovering their former state of good, there are some of them, however, who are still very Sea Sick, and the Irregularity and torpor of their Bowels in general is very great, and the quantity of laxative medicines, which I daily administer to them is very great, and totally out of my Power to take any account of.</p> <p>Is a little loose in her Bowels but does not Complain of any pain in her left side and has no fever. <i>Cont^f. Eadem medicam:</i></p> <p>Fever, and Cough, continues, Pain in the right side and pit of the Stomach she thinks is easier, and her headache is also easier, but the short dry Cough is still frequent and teasing. Bowels not very free, had no motion since last evening. Mouth is quite sore, and the Saliva is evidently secreted more copiously than natural; her skin is generally moist and cool, although her pulse is above 100. The fullness of the Epigastre is apparent but slight; tongue furred, white, <i>Contr. Pilulae ut heri.</i> (Noon) <i>Emplast. Meloi. Scrobiculis Cordis. – Sumat. Oleum Rubini Zj.</i></p> <p>this morning very little alteration, Pulse in the same state. Blister was examined but not risen sufficiently. it was left on <i>Cont^f.</i> <i>Tinct: Digitalis ut heri.</i> (Noon) has had no stool since last evening, <i>habeat Submuriat: Hydrarg: g^{ra} unum. Pulv: Rhei: g^f iij</i> (Vespere) appears better than he has done since he was out on the Sicklist, his Eyelids are more elevated. – The Blister is not yet sufficiently risen. I therefore spread some fresh plaster and reapplied it.-</p> <p>Is nearly as last evening, Bowels have been freely open in the night time; skin is still hot and dry, But no pain whatever. <i>Habeat Vinum Antimonie g^{ra} xx ter in die.-</i></p>	

	<p>Catherine Shaw</p> <p>Ann Leak</p>	<p>Discharged</p> <p>Is much better today. has been on Deck the greater part of the day.-</p>	<p>Discharged</p>
	<p>Aug^t 13th</p> <p>Mary Ann Smith</p> <p>Mary Tapper</p> <p>Will: Wood</p> <p>PB10087.JPG</p> <p>Mrs Atkins</p> <p>Ann Leak</p> <p>Marg^t Dwyne</p> <p>Ann Hayes</p> <p>Marg^t Haley</p> <p>Mary Davis</p> <p>ætat: 24</p>	<p>Strong winds, and a very considerable swell. Several of the Females very SeaSick.</p> <p>Is very easy today, but is still purged, and has been sick at her stomach two or three times. She appears to be very much predisposed to feel the motion of the Ship. <i>Cont^r: Cinchon: et Vinum.</i></p> <p>Cough continues frequent and troublesome, pain in her breast on coughing is slight, but the Cough affects her headache much; only one stool. Ptyalism slight: says she feels better, but there is much more anxiety of her countenance; Pulse 100. Small and soft; skin cool, and moist; Tongue white, not very foul; <i>Omittr. Pil: - Habeat: Sulph: Magnes: Zj</i></p> <p>Blister is pretty well risen, fever less, but Pulse is still quick, but more soft; this whole day He has gradually become more lively, and begins to notice every thing about him, is not so restless, and does not moan as He formerly did, had no stool during the night. Sumat. Olei Ricini Zij. Had two motions soon afterwards. In the evening <i>Habt. T^r Digitias g^{ta} vj.</i></p> <p>Continues very easy in her bowels, but skin is very hot and dry; and she has got several uneasy sensations arising from debility, as giddiness on sitting up, pain and weakness in her loins, Pulse is very quick, no stool during the night. – <i>Habeat pilulæ ex Extr: Colocynth: Comp: gr. iiij,</i> which during the day procured several motions <i>Contr: Vin: Antim: - Diet- Sago; Soup, and Gruel.</i></p> <p>are all rather severely SeaSick today, and constipated in their bowels, but no other complaint, all of them have taken various purgatives and Hayes has had an Enema without procuring any motion in either of them.</p> <p>After having taken laxatives repeatedly yesterday afternoon her bowels were very frequently opened during the night.-</p> <p>Complained this morning of pain in her breast and headache with difficulty of, and painful breathing. Skin hot; tongue foul; Pulse full, quick and hard; <i>VSect: ad Zvj. Syncope. Habeat Sulph: Magnes: Zj – Bowels freely opened and in the Evening complained of no pain.</i></p>	
	<p>Augt 14th Passing</p> <p>St Antonio</p> <p>Thermometer 80</p> <p>Mary Ann Smith</p>	<p>Strong winds and much motion of the Ship. Several of the Females very Sea Sick.</p> <p>Very little alteration. <i>Cont^r. Cinchon: et Vin:</i></p>	

<p>Mary Tapper</p> <p>W^m Wood</p> <p>Mrs Atkins</p> <p>Mary Davis</p>	<p>appears somewhat better this morning, Cough less frequent, Fever and pain less. but no motion in her bowels, <i>Habeat Ol: Ricini Zij</i> after which she had two free motions. <i>Cont': Tinct: Digitalis.</i> -</p> <p>today; appearances continue more favourable; but skin is cool, and pulse small and soft but quick; appears inclined to sleep much, but is quite lively when awake; is not nearly so restless as formerly and does not moan so much. Bowels have not been open in the night. <i>Habeat Ol: Ricini Zj - Balneum Tepidum, (Vesp)</i> Bowels freely opened; no difference in his general appearance, gave particular directions to attend strictly to his diet and drink. -</p> <p>No apparent alteration since yesterday, Pulse continues upwards of 100. and skin hot but she complains of no pain, had but one motion in the night, <i>Habeat Pilul: ut heri (Vesp)</i> only one stool: <i>Habeat Ol: Ricini Ziiij</i></p> <p>Is much better today, no Medicine. –</p> <p>The other four Patients have little complaint except Sea Sickness and torpor of the Bowels, for which they have used laxatives and Hayes had an Enema – all have had a passage in their Bowels today.</p>	
<p>Aug^t 15th St Jago in sight Thermometer 80</p> <p>Mary Ann Smith</p> <p>Mary Tapper</p> <p>W^m Wood</p> <p>PB10088.JPG</p> <p>Mrs Atkins</p>	<p>Light N.E.Winds and smooth water, and females generally much better, very many of them are very constipated in their Bowels and require a very great quantity of medicine, notwithstanding all my exertions to impress them with the necessity of frequent visits to the water closets & soliciting evacuations.</p> <p>Is better today than she has been since we sailed and has been on deck for a short time. - <i>Cont'. Cinchon: et Vin: Rubr:</i></p> <p>Cough still continues. Pain in her right side and shoulder is less severe but she had very severe headache. Skin is cool and moist; but Pulse quick (100), and soft. Tongue very slightly furred white. Slight Ptyalism continues; Bowels have not been open since last evening. <i>Cont'. Digitalis ter in die g^{ta} xij. Habt Ol: Ricini Zj - (Vesp)</i> Two free motions. <i>Sumat pil: ex Submur: Hydr: g^r ij Extr: Colocynth: Comp: g^{ra} iij.</i></p> <p>appearance continues favourable. Skin is cool; altho' his Pulse is quicker than natural; his complexion is more healthy. He takes his food well; and he is altogether more lively. No stool since yesterday. <i>Habeat Ol: Ricini Zj</i> which procured two loose stools, perfectly natural appearance. (Vesp) put a small quantity of wine in the thin Sago which is given him as drink during the night. –</p> <p>Was very freely purged during last night, and appears better today, skin is much less hot, and Pulse not so quick, and no pain. <i>Cont'. Tinct: Digitalis g^{ta} xij ter in die.</i></p>	

		The other Patients continue improving, and have all been on deck a great part of the day. Many complain daily of trifling complaints, and some of more serious ones, requiring VenæSection , Purgatives, Emetics, etc. but so varied and frequent that it would be, (from my other duties) impossible for me to give an account of them all. –	
Aug ^t 16 th at St Jago's Thermometer 82		Since we came to an Anchor this day about noon, most of the females whom I had on the Sick list, have got much better, and have been on deck during the most of the afternoon. The only exceptions were the two following, and the cases of Psora.	
	Mrs Atkins	Is nearly as yesterday. Pulse quick and skin hot and dry. Bowels have not been open since yesterday. <i>Cont^r: T^r: Digitalis, et Vespere, habeat Pil: Ext^r: Colocynth Comp: g^r. v</i>	
	W ^m Wood	Very little alteration, No motion since yesterday. <i>Ol: Ricini Zifs.</i>	
	Mary Tapper	Is apparently much better today. but has still pain in the Hepatic Region, and slight cough, slight Ptyalism continues <i>Cont^r: Digitalis T^{ra}. ter in die. Pilul: ut antea Mane et Vespere.</i>	
Aug ^t 17 th at St Jago Thermometer 82		Light winds, and weather very sultry, and unpleasant, Females who were sick are generally much better.	
	Mrs Atkins	Very little alteration, but she has been able to sit up for a short time today.-nourishing diet: - Bowels are quite open.	
	W ^m Wood	Has altered very suddenly for the worse again this morning. appears very low, tossing his hands and legs about; Skin is cold; pulse small and quick. Seven Beats of the Pulse for every inspiration. has no decided symptom for Hydrocephalus. Bowels were open in the night. Every attention to be paid to give him regular nourishing diet; as Sago, Soups, etc with a proportion of Port Wine. No medicine.	
	Mary Tapper	as yesterday. <i>Eadem Medicamina.</i> –	
Aug ^t 18 th at St Jago's Therm ^f on board 84 on shore 95		Light winds and very hot sultry weather, Females continue to improve, and are much more regular in their Bowels and easier affected by laxatives.	
	Mrs Atkins	Nearly as yesterday, Skin is however more cool but this afternoon she complains of severe headache. Bowels are open and easy,- No medicine, nourishing diet continued. –	
	W ^m Wood	Appears somewhat better today, and slept a great part of the afternoon, he still appears very low. Same diet and wine to be continued.	
	Mary Tapper	No motion since yesterday. otherwise she is nearly the same. <i>Hab^t: Sulph: Magnes: Zj.- Cont^r: Medicmenta ut heri. (Vesp)</i>	

	<p>Marg^t Daley</p> <p>Mary Davis</p>	<p>Bowels freely open.</p> <p>Discharged</p> <p>Discharged</p>	<p>Discharged</p> <p>Aug^t. 18th</p> <p>Discharged</p> <p>Aug^t. 18th</p>
<p>Aug^t 19th St Jago</p> <p>Therm^f 84</p> <p>Mrs Atkins</p> <p>W^m Wood</p> <p>Mary Tapper</p> <p>M.A.Smith</p> <p>Ann Leake, Jane Hayes and Marg^t Dwyne</p>	<p>Light winds with heavy showers; Females generally continue to improve, the Sick in particular.</p> <p>Her headache is gone off otherwise is nearly as yesterday, Bowels easy, and regular. Nourishing diet continued.-</p> <p>Continues better with very little fever, Bowels loose this morning, Stools of a natural colour. takes his food with avidity. Same treatment Balneum Tepid –</p> <p>Bowels open and less fever, Skin cool; tongue clean; Pulse 84. She still complains of pain in the Epigastrium extending to the right shoulder. <i>Cont^f Pilul: ut antea..-</i></p> <p>Has no Purging nor vomiting – and the pain in her side is gone, - She has however a severe headache (for she must have some compl^t) Her Pulse and skin are natural and tongue clean., <i>Cont^f. Cinchon:</i></p> <p>Have no particular complaint, but are considerably debilitated, - Laxatives, nourishing diet, and a little wine, are given to them.</p>		
<p>Aug^t 20th St Jago</p> <p>Therm^f 84</p> <p>PB10089.JPG</p>	<p>The Sick are in the same state as yesterday as nearly as possible, and no alteration in the treatment, except that Mrs Atkins complained of a sensation of great heat in the abdomen. without any occasion of fever. Bowels open.-a large Blister was applied for s few hours, without having it longer on than to cause a slight inflammation</p>		
<p>Aug^t 21st St Jago</p> <p>Therm^f 84</p> <p>Mrs Atkins</p> <p>W^m Wood</p> <p>Mary Tapper</p>	<p>Very hot and sultry, and light winds. The females who were ill with Sea Sickness are all much better. but a great many other Complaints arising from the Hot weather begin to shew themselves.-</p> <p>Is better today; less fever, Bowels easy, Several Blisters risen.- A laxative, nourishing light diet.-</p> <p>Continues in a more favourable condition. Bowels rather slow this morning, has but little or no fever, - Is much reduced, Sago, and light Soup with a little wine frequently.-</p> <p>Is nearly in the same state as before, Pulse 84 skin cool, and moist, but she has no appetite; Bowels are kept open by the Pill; mouth is considerably sore, but no Ptyalism; Tongue is clean and moist. Pain is rather diminishing. <i>Cont^f. Pilul ut antea. - - -</i></p>		

<p>M.A.Smith</p> <p>Ann Leake, Jane Hayes and Marg^t Dwyne The Patients</p> <p>Mary Neale ætat: 43</p> <p>Mary Wilson æt: 36</p>	<p>As last report. <i>Cont^r. Medic: eadem</i></p> <p>Aae nearly in the same state, laxatives, nourishing diet, and wine. with Psora are nearly well.</p> <p>Has had a very large family, and is of a very debilitated constitution, Complained this morning of severe purging. Pulse is quick but more from debility, than fever. Says she has been ill several days. Is very much emaciated, has no pains.- <i>Submur: Hydrarg: g^{ra} ij. – Pulvis Rhei g^{ra} iiij. et postea Sumat. Pulv: Cinchon g^r xij in Vino Rubr: Zj. ter in die.</i></p> <p>Is insane in many of her ideas, and foolish almost in all. has lived as far from the other women as she possibly could, since she has been on Board, apparently from a suspicious temper. She has been severely Sea Sick, and I understand that she has not taken several doses of Medicine I have sent out to her, from a fear that they would poison her. Indeed I cannot get to take but such medicine as she herself chooses, Since she has been in the Hospital. Her choice being always regulated by Caprice; and I have had much difficulty in making her stay in the Hospital. She complains of some headache, a slight pain in her right breast; - Her tongue is furred, and dry in the middle, her breath fetid. Her eyes dull; Her Bowels costive, Pulse 68 but full, Skin natural, <i>Hab^t. Sulph: Magnes: Zj. two stools but no relief. Pil. ex Submur: Hydrarg: g^r j Pulv: Rhei g^r iiij.</i></p>	
<p>Aug^t 22nd at Sea</p> <p>Mary Tapper</p> <p>Marg^t Dwyne</p> <p>Mary Neale</p> <p>Mary Wilson</p>	<p>Since we got out this morning the temperature is lower and much less oppressive.</p> <p>Has a severe pain in the left hypochondrium, the pain in the region of the liver and right shoulder is less. has much headache, but no increase of fever; pulse 84, Skin natural and perspires freely. Bowels open, has no appetite, <i>Cont^r. Pilulæ ut heri.</i></p> <p>Is again violently sick from the motion of the Ship. Bowels were open yesterday; has continued retching and vomiting since we got underweigh this morning – Embrocations to the region of the stomach with Liniment Ammon:</p> <p>Is somewhat easier than yesterday, has some Purging still. had some appetite, has no pain or uneasiness except slight griping. <i>Cont^r. Vin: et Cinchon: -</i></p> <p>No alteration, except that her Bowels are freely open. <i>Cont^r. Pul: ut heri bis in die. (Vesp) Vin: Rub: Zij</i></p> <p>The other Patients are in the same state as yesterday nearly, same treatment, Soup, Sago and gruel being provided for them all.-</p>	

<p>Aug^t 23rd at Sea</p>	<p>Light winds and sultry weather, yesterday and today very many complained of slight fever, and derangement of their Biliary Organs, gave them laxatives, Calomel and Rhubarb.-</p>	
<p>Mary Tapper</p>	<p>Pain the left Hypochondrium continues,- Skin natural and Pulse only 68, and regular. tongue clean. mouth sore but no Ptyalism. Right side and shoulder is much easier, and for several days her cough has been wearing off, and is now wholly gone. She is not much reduced, but she eats very little. No motion since yesterday morn^g. Cont^f. Pilul: ut antea. a little wine in her drink</p>	
<p>Marg^t Dwyne</p>	<p>Is rather better today. Embrocations cont^d.</p>	
<p>Mary Neale</p>	<p>Same as yesterday, same treatment.</p>	
<p>Mary Wilson</p>	<p>Mouth sore. No motion since yesterday. complains of headache, tongue foul. Skin cool, and moist: Pulse about 68.- <i>Omitt^f: Pil: et Sumat Ol: Ricini Zj</i> –</p>	
<p>PB10090.JPG Jane Milne æt: 24</p>	<p>Complained last evening of headache and pain in her loins, hot skin, and flushed face, suffused eyes. Tongue white, Bowels rather costive, <i>Hab^t Pil ex Calomel. g^r. j. P. Rhei g^r. iij.</i> – which was repeated this morning, there is very little alteration since yesterday. towards noon the bowels were open.</p>	
<p>Mary Davis, æt: 24</p>	<p>Complained last evening of great thirst and giddiness, had no pain whatever, tongue furred, dry in the middle; skin natural temperature, and perspires freely, but Pulse full and throbbing. no appetite. <i>Habeat Calomel. g^{ra}. iij. Pulv: Rhei g^{ra}. viij.</i> This morn^g her Bowels have been well opened, and she thinks herself better. Pulse is still full. <i>Habt. Pil. ex Rhei et Calomel. V Sectio Z xvij – (Vesp) Repe^f Pilul</i></p>	
<p>Mary Palmer Æt 26</p>	<p>Complained last evening of pain in the region of the Liver and pit of the Stomach; headache; - has foul tongue; costive Bowels and slight fever. <i>Pil.ex Colom: g^r. ij. Pulv. Rhei g^r. vij.</i> – This morning is nearly the same. <i>V Sectio</i> when about six ounces were taken she fainted. <i>(Vesp) Rep^f. Pilul.</i></p>	
<p>Mary Herwood 32</p>	<p>Constipation, slight fever, and derangement of the Biliary Organs. <i>Pil ex Calomel et Rhei</i></p>	
<p>Will^m Wood</p>	<p>Continues apparently improving, takes his food and drink well. Bowels continue regular without medicine, bathed in warm water, a little wine in his drink frequently. diet, Sago Soup and drink Gruel.</p>	
<p>Ellen Wood and her daughter</p>	<p>Patients with Psora have washed themselves and their clothes today and were discharged.</p>	<p>Discharged Aug^t. 23rd</p>

Aug ^t 24 th at Sea	Slight Southerly winds, and hot sultry weather. Two more complained today with slight fever and derangement of the Biliary Secretions.
Mary Tapper	Pulse is 80, Pain in the left side continues, headache otherwise is as yesterday, no motion, Cont ^f Pilul. ut antea. (Noon) Rept ^f . Pil: - (Vesp) Olei Ricini Zvj
Marg ^t Dwyne	Nearly as before, severely vomiting still. Embrocations continued, with a laxative. -
Mary Neale	Is much less purged than yesterday, her Pulse is quick, (120) small, and skin rather warm, perspires freely, has no local pain. Omit ^f . Med: --Nutritive diet and a little wine occasionally (Vesp) Tinct Opii g ^t . xvj
Mary Wilson	Bowels freely open, has vomited repeatedly since last night, otherwise there is little alteration. Nourishing diet and half a Pint of wine. She is as capricious as ever, she will not be confined to bed, - will lie only on the Boards - will take but particular kinds of water and from particular person, and even these persons must give it to her in a particular manner, or she will not have it. -
Jane Milne	The Pill was repeated again last evening, this morning there is little alteration, Bowels have been freely open, Cont ^f . Pil: bis in die
Mary Davis	Continues better, Bowels open; Pulse full and rather quick, Skin cool, and moist; tongue foul. has no Pain. Repetand Pil: Mane et Vespere.
Mary Palmer	Bowels have been well opened, Symptoms as yesterday, but feels better, and pain in the right side is less.) Rept ^f . Pilul: ut heri.
Mary Herwood	No alteration. Repetand. Pil:
Will ^m Wood	Continues better. Bowels continue open and natural; Skin cool, tongue clean, but there is a great degree of foulness of the palate. nourishing diet and a little wine, - some Raspberry Jam for his mouth.
Mrs Atkins	Is much better, very little fever, tongue clean, Bowels regular, - attention to be paid to Diet.
Mr Abbott	Was attacked during the course of last night with very frequent purging, has been up about twelve times in the night; Tongue is foul. Eyes dull and yellow; Complexion very sallow; has no pain and little or no fever. Sumat Pil: ex Calomel g ^t . j. Pulvis Rhei g ^{ra} iiij. Soon after He took the pil. he vomited the contents of the Stomach which were rather abundant; and as soon as the Stomach was again quiet the Pill was repeated at noon Had Ol: Ricini Zj.

		– (Vesp) Purging is much less, Pulse 80. Skin moist and cool. <i>Rept^r. Pilul:</i>	
Aug ^t 25 th at Sea Thermr 86 Mary Tapper		Light Northerly winds, and very hot. Is nearly as yesterday, Pain in the left side continues but no fever; no motion in her bowels. <i>Hab^t. T. Opii Zfs.</i> (Vesp) Some vomiting. <i>Rept^r. Pil. ex Rhei et Calomel.</i>	
Marg ^t Dwyne		Nearly as yesterday, very constipated in her bowels, <i>Cont^r. Embrocatio : Sumat Sulph Magnes. Zfs.</i>	
Mary Neale		Is much less Purged, and had a good night. her Pulse 100. Skin cool. appetite better. Diet and wine as yesterday.-	
Mary Wilson		Vomiting less frequent, mouth slightly affected with the Calomel. Pulse 68, Skin cool, bowels open, but she will not eat anything no medicine, wine as yesterday.	
Mary Davis		Is much better today. Complains of Hæmorrhoids, Flus. <i>Sulph: Zj mane et vespere.</i>	
PB10091.JPG Jane Milne		No alteration, Bowels open. <i>Cont^r. Pil Mane et Vespere</i>	
Mary Palmer Mary Herwood		No alteration, <i>pilul. ut antea</i>	
Will ^m Wood		Still continues to improve, no fever, an ulcer has suddenly appeared on his right thigh, about the size of a sixpence, deep indurated and thickened at the edges. Diet and wine as before.	
Jane Baker		Complained last evening.- Constipation and pain in her right side; <i>Pilul ex Calomel g^r ij.- Pulv: Rhei g^r. viij.</i> This morning. <i>Sulph Magnesia Zj</i> (Vesp) has severe pain in the abdomen, tender on pressure, no motion in her Bowels, Pulse hard, quick but full. Tongue foul, Skin hot, moist;.- Enema Cathartic: did not open the Bowels freely.- <i>Pulv: Rhei g^{ra}. iij. Calomel g^{ra}. j.- Sumat-VSectio ad Zxviij.</i> Pulse remained firm and quick, but less full.	
Mr Abbott		Is much better this day. In the morning Repeated the Pill; during the day had only three stools, (Vesp) much better, more cheerful, tongue more clean; and complexion and eyes more clear.	
Jane Hayes		Complained of much headache this evening which has been gradually increasing for several days, a Blister to each Temple.	
Aug ^t 26 th at Sea Thermometer 85 In the Hospital		Light winds in the morning, Squally with rain in the forenoon, Strong cool, Easterly winds in the afternoon which gave very great relief to every person on board and particularly to the Sick.	
Mary Tapper		Is nearly as yesterday. No fever, Pulse 78. pain in the left side continues, <i>Rept^r. Pil: ut antea. – habeat Sulph Magnes: Zvj. Empl. Meloi Magn. Region: Splenis.</i>	

Marg ^t Dwyne	Has severe vomiting, and some pain in the Epigastrium. Bowels open, Pulse rather hard but no fever. <i>Emplast. Meloi Epigastrio.</i>
Mary Neale	One motion since last evening, Pulse 112 and she appears very weak. but has no pain or uneasiness except a sense of weakness. appetite is better than her appearance would indicate. Thinks her weakness is occasioned by the want of Porter to which she has been accustomed all her life till she became a prisoner. Diet and wine cont ^d . with g ^{ma} xvj of <i>Tinct. Opii</i> in the evening.
Mary Wilson	Nearly as yesterday, But no motion today (Vesp) <i>Habt. Tinct Rhei Zfs</i>
Mary Davis	Convalescent. <i>Cont^r. Sulphur: Sublim. ut heri</i>
Jane Milne	Is better today, headache is slight, fever nearly gone, some pain in her loins; tongue more clean, Bowels open. <i>Cont^r. Pil ut heri.</i>
Mary Palmer Mary Herwood	Both are better today, Palmer complains of Headache only, no pain in her right side. <i>Cont^r. Pil. ut antea.</i>
Jane Baker	Blood taken last evening very slightly buffy. one motion. is easier in her Bowels, but has severe headache. Pulse firm, 80. but skin cool, and soft. – Abdomen slightly tender. <i>Hab^t. Sulph: Magnes: Zfs</i> which was rejected almost immediately.- It was repeated again, and again rejected but one scanty motion was procured. In the evening the abdomen was perfectly easy, but headache continued. <i>Habeat. Submur: Hydrarg: g^{ra}: ij. Pulveris Jalapæ g^{ra}. viiiij.-</i>
Mr Abbott	Continues better, but has a sensation of fullness of the abdomen; Eyes continue of a dull yellowish hue. – <i>Cont^r. Pil. Mane et Vesp.</i>
Jane Hayes	Is much relieved in her head, and is altogether much better today, Bowels open, no medicine.
Will Wood	Continues to improve, Bowels are regular without medicine, Mouth is much more clean, appetite good. diet and wine cont ^d . as before. Warm bath everyday.-
Elizabeth Wimbridge Æt: 25	Complained last evening of severe pain in the Hepatic, and Epigastric regions extending to her right shoulder. headache and pain in her limbs, Tongue foul. Pulse firm and quick, but skin moist and cool, has had pain in the same situation, while in prison for which it had been repeatedly blistered. <i>Hab^t. Submur: Hydrarg: g^{ra}: ij. Pulv. Jalapæ g^{ra}. viiiij.-</i> This morning Bowels open but pain and headache more severe. <i>VSection Zxx.- Empl.Meloi regioni doloris. Hab^t. Pil: ex Submur: Hydrg: g^{ra}: j. Pulv Jalapæ g^{ra}. iiij ter in die.</i>

		There are several others ill with bilious and Hepatic complaints who are treated in the same manner.- Mary.A. Smith is Convalescent.	
Aug ^t 27 th at Sea Thermometer 85		Light winds, and Sultry with a considerable Northerly Swell, and much Sickness among the Females.	
Mary Tapper		Is easier than yesterday. pain in the left side nearly gone, Pulse 76. and regular. Headache less. skin cool and moist. No motion. Mouth slightly sore, but short of Ptyalism. <i>Habeat. Pulv: Rhei џj.</i> (Vespere). had one motion, in the afternoon, after whichsShe got out of bed and went on deck, and staid for some time apparently cheerful and in good spirits: when she came down in the Hospital again she fainted three times in about half an hour, and last time she had (very evident) rigors. Her pulse during the period was very quick, but a short time afterwards (2 hours) settled to 84. when she compl ^d . of pain in the Stomach and Epigastric Region. Her tongue is clean; her skin cool and moist. Half a pint of wine to be put into thin Sago for her drink during the night.	
PB10092.JPG			
Marg ^t Dwyne		Vomiting continues severe, she complains of pain in the left Breast extending through her back. Epigastrium and Hepatic Region is more full than natural. and abdomen considerably enlarged but soft. Blister well risen, but no relief. has much headache. Pulse 84. Skin cool and moist. Tongue foul. no appetite <i>Hab^t. Pulv: Rhei џj. – (Vesp) no alteration Repet^r: Pulv: Rhei:-</i>	
Mary Neale		Three motions during the last 24 hours; Is nearly as yesterday otherwise. Today however I observed that she has some cough with expectoration, which it appeared to me, she wished to conceal from me. Her tongue is clean. Skin cool, Pulse 108, and small. has been much depressed in spirits since she came on Board. Diet, Wine , and <i>T^r. Opii</i> as before.	
Mary Wilson		had one stool in the night but not free. otherwise is as yesterday. <i>Sumat Pulv: Rhei: gra. viij.- (Vesp) No motion.- Rept^r: Pulv: Rhei.</i>	
Jane Milne		Very little alteration. <i>Cont^r. pilul. ut antea</i>	
		Mary Palmer, and Mary Herwood, are both much better. Their tongues continue foul. Both had a laxative pill in the morn ^g . and in the even ^g .	
Jane Baker		Has had three free stools, no pain whatever in her Bowels but has severe headache. Skin hot Pulse hard and quick. Blood taken but slightly Buffy. tongue foul. Mouth slightly sore. <i>VSect ad Zvj</i> when this quantity was taken she fainted but her pulse soon became full and hard again. Her forehead to be bathed with vinegar – during the day her Bowels continued open.	

<p>Mr Abbott</p> <p>Jane Hayes Will. Wood</p> <p>Elizth. Wimbridge</p>	<p>Has not been so well during last night has been very restless and Purged three or four times, Skin natural heat. Moist. Pulse 80. Soft. Tongue foul, eyes continue as yesterday. Voice is very weak, - Has had a short teasing cough for a long time. <i>Habeat Pil: ex Submur: Hydrarg: g^r. ij. (Noon) Hab^t. Sulph Magnes: Zfs.- (Vespere)</i> Remains nearly the same, has been purged four times today, feels very weak, tongue foul. white, angles of the Eyes, red: he vomited his Tea immediately after He drank it this evening. Mouth slightly mercurialised, No Medicine.</p> <p>Convulscent D^o -</p> <p>Blister well risen; Bowels open several times in the night. has less fever. Skin cool. tongue foul. Mouth slightly affected. Pain in the side is hardly perceptible. but has a considerable degree of headache. during the day her Bowels continued freely open, and in the evening she was much easier.</p>	
<p>Augt. 28th at Sea Thermometer 85</p> <p>Mary Tapper</p> <p>Marg^t Dwyne</p> <p>Mary Neale</p> <p>Mary Wilson</p> <p>PB10093. JPG Jane Milne</p>	<p>Very Light Southerly winds, and Sultry. Many of the Sick are very ill apparently from the mere effects of heat alone. Very many of them are extremely Ill. Several new cases have been added today.-</p> <p>Says she had a return of the rigors about midnight. today she appears in her old state. Pulse 84. Skin cool and moist, tongue clean. little or no pain.- had one stool this afternoon. Tongue <i>Omit^r: Pil: Calomel Habt. Pulvir: Rhei g^r. xv. Super tart Potass. et Soda zjfs.- Infus Quassia bis in die.</i></p> <p>Pain in the left breast continues, and also the enlargement of the Abdomen and Epigastrium. has not had so much vomiting. Skin is cool. Pulse 80. but firmer than natural, Tongue more clean than yesterday. no motion in her Bowels. Begged I would bleed her, as she fancied she would be relieved by it when I took Zvj she fainted. <i>Habt. Pulv: Jalap: Comp: a little wine in her drink.-</i></p> <p>Two motions since yesterday, otherwise no alteration. <i>Omit^r. Tnict. Opii. Hab^t. Infus: Quassia bis in die. Cont^r. Dieta Nutrit: et zfs Vini Rubr: ut antea:</i></p> <p>No motion, very little alteration otherwise but absolutely refuses to take any Medicine. In the evening I got her to take <i>Zfs of Ol. Ricini</i></p> <p>Has more headache and more heat of skin than she has yet had. No stool since yesterday morn- <i>Habt. Sulph: Magnes. ziiij (Vesp)</i> Bowels have been freely opened, and her Skin is more cool, but she complains of a great sense of weakness. <i>Vinum Antim: g^{tt}a. xx.</i></p>	

Jane Baker	Skin continues hot, but at times perspires freely. Gums are slightly affected. No pain in the abdomen, headache considerable, Pulse quick and full. Breathes very quick. <i>Habt. Vin: Antim: g^{ma}. xxv.ter in die.</i> Cold applications to the forehead. (Vesp) <i>Sumat Pulvir: Rhei.g^f. viij.</i>	Disch ^d Aug 28 “
Mr Abbott	Is much better today; Bowels have been loose today (5 motions) but he feels much better. Tongue more clean; sense of fullness of the abdomen gone, No sickness, Complexion and Eyes more clear. and feels himself capable of sitting up. No Medicine.	
Jane Hayes Will.Wood	Discharged. Discharged	
Eliz th . Wimbridge	Nearly as yesterday, In the evening she complained of more headache; - Several motions during the day. <i>Vin: Antimon: ter in die.</i>	
Jean Mc Limont Ætat. about 27	Comp ^d . last evening of headache, pain in the Epigastrium, back, and in her limbs. Skin rather hot. Pulse quick: Tongue foul.- Bowels constipated. - <i>Vsect Zxvj. Habeat Subm: Hydrarg. g^{ra}. ij. Pulv: Jalap: gr. viij.</i> This morning, no alteration, no motion in her Bowels. <i>Habt. Sulph: Magnes: Zj.</i> - (Vesp) No motion, <i>Habeat Pulv: Jalapa et Cremor:Tart: zj.</i>	
Mary Dowling Æt. about 33	Complained this morning of Headache and pain in her loins and limbs, Bowels constipated. Tongue furred, white; Pulse hard and quick, Skin hot. <i>V.Sect Zxvj.</i> Syncope. <i>Habeat Sulph Magnes: Zj,</i> which she rejected in a short time.- <i>Sumat Ol. Ricini Ziij.</i> which was also rejected - Noon. Is much easier, and skin cool. but pulse quick. <i>Hab^t: Pulv: Jalap: ʒj. Crem: Tart: ʒij</i> - which was also rejected. (Vesp) no motion but continues easier. <i>Sumat Pil: ex Calomel g^f. ij. Pul: Jalap: gr. viij.</i>	
Charl ^{te} Fox Æt abt 24	Stout. complained of severe headache and much pain in the Hepatic Region. intense fever, vomiting. <i>Vsectio ad Zxx.</i> Syncope. <i>Hab^t. Calomel g^f. ij. Pulv: Jalapa g^f. viij.</i> (Noon) <i>Sum^t. Sulph: Magnes Zij.</i> - (Vesp) Bowels opened, and she feels relieved. Skin is cool, headache and pain in side less. <i>Rept^r Pulv. Jalap et Calom: ut antea.</i>	
Marg ^t . Haley Ætat 19.	Presented herself with severe headache, and pain in the Epigastrium and limbs. Skin hot and Pulse full and hard. Tongue foul. Bowels constipated. Catamenia have flowed very copiously, for the last two days; so much so that she became much alarmed. <i>Vsect Zxviij. Sumat Sulph: Magnes: Zj.</i> (Vesp) four motions, and is considerably relieved.	
Aug ^t 29 th at Sea Therm ^f . 82. Mary Tapper	Slight S. West Winds. Sick generally, rather better this morning. Is better this morning, had a good nights rest, but is very weak. cannot sit up for any length of time without fainting. Pulse 84. No	

		pain. two stools in the night. <i>Habeat Infus: Quassia ter in die,-</i> Nourishing diet with Half a Pint of Wine.	
	Marg ^t Dwyne	Had two motions in the night, Is better, no Pain except in her left breast, headache slight. Pulse nearly natural. Skin cool. Infus Quassia ter in die Wine and nourishing diet,- <i>Pil: ex Calomel gr.j Jalapa g^{ra} iiij</i>	
	Mary Neale	Is nearly as before, one stool in the night. Pulse 104. Small. Skin cool. <i>Hab^t: Infu:s Quassia ter in die. Vin: Rubr: Z viij et dieta nutritious.</i>	
	Mary Wilson	No alteration. No stool. Slight Ptyalism. will not take her medicines. diet and drink as before. asked for <i>Sulph:Magnes:</i>	
	Jane Milne	Purging continued during the night. Fever remains considerable. Skin hot. Pulse quick and hard; headache. <i>V.Sect ad Zxij.</i> when the Pulse was rendered much softer and a slight degree of Syncope was brought on.	
	Jane Baker	Bowels freely open during the night., otherwise is nearly the same state as yesterday. has slight Cough, but no Pain. headache less severe. <i>Cont^r. Vin: Antimon: ut heri.</i>	
	Mr Abbott	Nearly as yesterday. <i>Habeat Sulph: Magnes: ziiij</i>	
	Eliz th Wimbridge	Nearly as yesterday. Same Medicines.-	
	Jean McLimont	Has less fever, and feels much better. Tongue more clean. Bowels have been freely open in the night.- Noon. Continues much better, no motion since the morning. <i>Pil: ex Calom: g^r j. Jalap: g^r. iiij.</i>	
	Mary Dowling	No motion in her Bowels, but remains easier, refused to have an Enema. <i>Sumat Tinct Rhei Zj</i>	
	PB10094.JPG Charlotte Fox	has been frequently open in her Bowels during the night, and has been much easier. This morn ^g her complaints have returned with their former violence. Severe headache and pain in the right side. high fever. <i>VenæSect Zxx.</i> which relieved her considerably. <i>Emplast: Magnum Regis: hepatis.- Pil: Hydrarg.Submur: g^r. ij.</i>	
	Marg ^t Haley	Continues much easier, Skin cool, Tongue cleaner, Fever less, bowels open; headache and pain less. <i>Habt. Pilul. ex Submur: Hydrarg: gr j, Jalap gr iiij.</i>	
	Ann Kerslake Ætat 25	Complained last evening. Had <i>Pil N^o. ij ex Hydrarg: Submur: g^r. iiij. P. Jalapæ g^r. viij.-</i> This morning found her in a high fever, with severe headache and pain in her back, and much pain and tenderness on pressure in the Epigastric, and Hepatic Region. Bowels have been freely open. <i>V.Sect ad Zxvj,</i> which relieved the Epigastre very much, headache and pain in the loins less. <i>Sumat Hydrarg: Submur: g^r. ij. Jalapæ g^r. viij</i>	

	<p>Janet Greenless Æt: 27</p>	<p>Complains of severe pain in the Hepatic region extending from thence to the top of the right shoulder, and down the right thigh and leg. headache, Pulse quick: skin is not hot. features appear full. eyes are clear. <i>VSectio</i>. when <i>Zvij</i> were taken she got so low that no more could be taken. <i>Sumat, Submuriat Hydrarg g^r. ij</i></p>	
	<p>Aug^t 30th. at Sea Thermometer 84</p> <p>Mary Tapper</p> <p>Marg^t Dwyne</p> <p>Mary Neale</p> <p>Mary Wilson</p> <p>Jane Milne</p> <p>Jane Baker</p> <p>Mr Abbott</p> <p>Elizth Wimbridge</p> <p>Jean McLimont</p> <p>Mary Dowling</p>	<p>Southerly winds, and less sultry than it has been for some time past; some of the Sick are better, than yesterday; none of them appear worse. Only one case of fever came forward today, which does not appear very severe, and was not entered on the Sicklist.</p> <p>Is nearly as yesterday. no motion; has some cough this morning. Same Medicines and treatment.</p> <p>No alteration is very weak. Same treatment</p> <p>No alteration. Two motions. <i>Eadem medicam^t</i>.</p> <p>Is in the same state. No motion in her Bowels on giving the salts yesterday, she would not allow me to mix them but said she would do it herself. I afterwards found that she eat them out of the Paper. She cannot now, use any water except out of the Captain's Dri?? Store</p> <p>Has less fever, and is also much easier, but has much fever still, Pulse full, Gums are very slightly affected. Perspires freely. Bowels open (Noon) <i>Habt. Vin: Antim: g^{ma}. xxv et Repetand Vespere.</i></p> <p>In appearance is nearly as yesterday, but feels much better. Bowels continue open. Cough less. <i>Habt. Infus: Quassia Zj ter in die.</i></p> <p>Convalescent; no Medicine.-</p> <p>Is easier today. Bowels open, and although her Pulse is quick, her skin is cool and moist. <i>Infus: Quassia ter in die.</i></p> <p>Is much better today, very little febrile action. Pain gone, Tongue is foul, and bowels tardy. <i>Sumat Pulv: Jalapæ Comp: Zj.</i></p> <p>No motion in her Bowels; Pulse is very quick but skin cool. Tongue very slightly furred, complains of pain in the abdomen and Hypogastrium. <i>Exhibit: Enema ex aqua marina tepida.</i>- after which she had four free motions:- In the afternoon "a stitch" as she described it . attacked her in the pit of the Stomach. which (she being of a sour ill natured disposition) She felt very much disposed to ascribe to the means employed for her recovery. <i>Fomentatio: abdomini:</i> which instantly relieved her, Pulse remained quick.</p>	

	<p>Charl^{te} Fox</p> <p>Marg^t Haley</p> <p>Ann Kerslake</p> <p>Janet Greenless</p>	<p>Has no pain, but much lightness and giddiness of her head,- Tongue is not very foul, Skin is cool; Pulse quick; <i>Habt. ex Pil. Calomel g^r. ij. bis in die</i>,- Two motions in her Bowels during the day.-</p> <p>Continues better; Bowels slow.- a laxative</p> <p>Bowels continue freely open, during the night and this morning. Arterial action is again very considerable, <i>V Sect Zxvj</i>. Syncope Blood buffy, in the evening she again became very hot, and feverish. <i>Hab^t. Pilul. ex Calomel g^{ra}. ij.</i></p> <p>Is much easier today, and fever much less, Bowels slow. <i>Hab^t. Pil. Jalap. et Calomel g^r. iij et j</i></p>	
	<p>Sep^t. 1st Long^{de}. 19.37. West Latit^{de}. 6.54. Yesterday I had so much to do in the evening from several of the females and Children having Epileptic fits and Bowels complaints. (cholic) that I could not find time bring up my Journal. All the Sick, however were in rather a favourable way, and took up nearly the same medicines, as they did on the preceeding day.</p> <p>Bowels has, been freely open, and she is getting stronger. but her Cough has returned again and with pain in the Epigastrium. <i>Emplast. Meloi sede doloris.- Pil: ex Submur Hydrarg. gra. ij. bis in die.</i></p> <p>Very little alteration same treatment.</p> <p>Bowels are now regular. Medicines and diet etc. as before.</p> <p>Is much better. Bowels freely open yesterday.- No Medicine.-</p> <p>Has had a Blister on the Epigastrium which has relieved the pain. has less fever, Bowels are open, and she has been able to sit up a short time today.</p> <p>Still improving. <i>Infus: Quassia</i> .</p> <p>Has taken no medicine till this evening I advised to take the following Pill. – <i>Calomel g^{ra}. j Extr: Colocynth Comp. g^r. iij.</i></p> <p>Continues Better. Bowels regular. no pain ; but little fever. <i>Infus: Quassia ut antea.</i></p> <p>Bowels have been freely open, today had what she called a “shocking severe pain” in the Epigastrium, a Blister was applied, Calomel and Rhubarb given as laxatives.</p> <p>Is much better. Fever slight. Bowels open. Laxatives and antimonials.</p>	

<p>Marg^t Haley</p> <p>AnnKerslaw</p> <p>Janet Greenslaw</p>	<p>Convalesct. Laxatives are prescribed.</p> <p>has been blooded again, and is somewhat relieved, but has a peculiar species of Inf^{tn}. with Eruption of her legs. the Pills have been continued with other laxatives.</p> <p>Convalescent. Bowels rather slow. <i>Hab^t. Pilul: ut heri.</i></p>	
<p>Sep^t. 2nd at Sea Long^{de}. Latit^{de}. 5.44. North Therm^r 85</p> <p>Mary Tapper</p> <p>Marg^t Dwyne</p> <p>Mary Neale</p> <p>Mary Wilson</p> <p>Ann Leak</p> <p>Jane Milne</p>	<p>Strong S.W. winds, and temperate; very little alteration among the Sick; a few have Complained, but their Complaints do not require that they should be put on the Sick list. I am now in hopes, as the weather has become more cool and pleasant that many more will not be taken Ill with the Fever. and that those already Ill will soon begin to get much better.</p> <p>Blister is well risen, and the pain in the Epigastrium is much less, and the Cough less frequent and easier: no fever; tongue clean; no motion in her Bowels since yesterday morn^g. <i>Pil: Hydr: Subm: gr. ij.. Infus: Quassia bis in die.</i></p> <p>Pain in her breast is easier, Bowels open, has vomiting frequently, which I have no doubt arises from the <i>motion of the Ship. Infus: Quassia . paulatim Vini Rubri frequenter.</i></p> <p>Is nearly as formerly, has had two motions, in her Bowels. Skin cool; tongue clean; Pulse small, and quick; is very much reduced; Complains of no pain, but says that the heat of the weather exhausts her; relishes her wine much; and expresses a desire for the Infus: of Quassia ; her appetite is moderate;- Cough remains but is very slight, and I cannot detect any expectoration; has no pain or tenderness in any of the abdominal viscera, her eyes are clear and she has no headache. <i>Infusion Quassia : Wine and diet as before.</i></p> <p>Appears as yesterday, but I have got myself wholly out of her favour, for last evening she took a fancy to some Raspberry Jam which I had got for one of the Children, and asked for some of it, which I rashly promised to send her. On applying to the Steward I found it had been all used; she would however take no substitute; nor will she forgive me. All this day she will not speak one word to me. I am therefore under the necessity of guessing at her complaints.</p> <p>Is sometimes pretty well, at other times very Ill; according to the motion of the Ship, she has had several Blisters on her sides, Epigastrium and Temples. uses laxatives as required, which is frequently: and taken. Infusion of Quassia and occasionally a little wine, with Hospital diet.</p> <p>Remains very feverish; Bowels open. <i>Hab^t. Vini Antimon: g^{tta} xxx. ter in die. (Vesp.) Calomel gr. ij</i></p>	

Jane Baker	Is nearly as yesterday, Rested ill in the night from griping in her Bowels; but she is better this morning. Infus: Quassiae ut antea.
Mr Abbott	No motion. <i>Hab^l. Sulph: Magnes. zij</i> about noon had a copious motion.
Eliz th Wimbridge	Continues better but is very weak. <i>Infus: Quass: ter in die</i>
Mary Dowling	No motion in her Bowels; rejected most of the medicine taken yesterday. and she has had several additional compl ^{ts} which she ascribes to the use of it. even the Blister has brought an additional pang into every part of her body. She is exceedingly discontented, and Ill-natured, and nothing that I can do will please her. her Pulse is very quick; but her skin is not hot. her tongue is clean; she complains of headache, pain in her "Heart" (Epigastrium). Pain in the Hypochondrium (but slight). had fomentations; will not take any purgatives except Tr. of Rhubarb the spirit of which is its attraction. Complains very hard that I will "not allow her wine", when I know that she is a poor dying woman.- I gave her <i>Zj Tr. Rhei</i> . I have endeavoured to do everything I could to please this woman; in one respect I cannot satisfy her,- there is no water in the Ship good enough for her.- (Vesp) No motion. <i>Sumat. Pulv: Rhei ʒj Crem: tart ʒij</i>
PB10096. JPG	
Charlotte Fox	Continues to improve. Bowels open; has no pain and but little fever.- <i>T^r. Antim: ter in die g^{tra}. xxxv</i>
Ann Kerslake	Still continues very feverish, Complains of but little pain except in her legs and back. Bowels are kept very open; Pulse quick, but soft, tongue not very foul. Eruption of her legs remain out? since which the pain of her legs has become less. no appetite. thirst. Gums, and tonsils slightly sore. <i>Pulv: Jalap Compos: Vini Antim g^{tra} xx ter in die. (Vesp) Pil: Submur: Hydrarg: g^{ra}. ij</i>
Maria Green ætat 25	Complained yesterday morning of severe headache pain in the Epigastre and Hepatic region. fever. Constipation. <i>V.Sect Zxvj .-</i> Syncope. <i>Hab^l. Calomel g^r. iiij. Jalap. Pulv: g^r. xvj. – (Noon) Emplat: Meloi. Magnum. regioni: Hepat:- (Vesp) Bowels freely open and is somewhat relieved Skin not so hot – <i>Pil Submur: Hydrarg: g^r. iij Vini Antim g^{tra}. xx – This morning cont^d the same Pil and antimonmial (Vesp) <i>Repet^r. Pil Hydrarg:</i></i></i>
Mrs Atkins	Continues in a Convalescent state, taking a laxative occasionally, and using a very light and spare diet for fear of a relapse. She is however very weak receives Soup, Sago etc. from the Hospital.
Mary Sample ætat about 25	Complained yesterday morning, had much fever, headache ; pain in the Epigastrium and abdomen and Bowels: VenæSection was twice performed yesterday to Syncope about Zxxv were taken. Her Bowels were freely opened this morning with Calomel and Jalap, followed by a dose of Sulphur of Magnesia. She is now (2P.M.) somewhat easier, pain in the abdomen is less. Skin more cool. but pulse is still full and quick. tongue is not very foul

<p>McDonald ætat about 7 Free Woman's Child</p> <p>Sep^t. 3rd at Sea Latit^{de}. 4.48. North Long^{de}. 16.33. West Therm^f 85</p> <p>Mary Neale</p> <p>W^m. McDonald</p> <p>Jane Milne</p>	<p>(Vesp) Bowels have been open several times in the afternoon; and she has much less fever. but still complains of Pain in the abdomen.- <i>Vini Antimon: g^{tra}. xxx Sumat.</i></p> <p>His mother brought him to me last even^s. He was feverishly hot, Bowels costive, restless and cryed in the night; sometimes complained of his Bowels sometimes of his head: Pulse very slow throbbing, and intermittent. various purgatives, Sennæ, Castor Oil were tried; but he could not be got to take but the smallest quantity.</p> <p>Strong Southwest gales, and a most unpleasant motion of the Ship, and many of the women very Seasick. Vomiting Blood and everything they eat or drink: In addition to this; much water comes in forward in the Hospital, so that it is altogether miserable in appearance. Yet on the whole the Sick are rather better today, for the free circulation of air, although the thermometer stands as high as before, renders the Body so much cooler, that the Fever of the whole of the Sick has very sensibly diminished.</p> <p>Is much lower today; has no pain whatever; Skin is cool. But Pulse is very quick (132) and very small. Tongue perfectly clean; appears to have some uneasiness on pressure in the right side of the Epigastric Region. but she will not acknowledge it; Two stools last 24 hours, very little appetite; appears very anxious for her wine every day, and it appears to be of service to her.- I proposed a gentle Laxative to her this morning, but she refused it. I was the more sorry for it as her abdomen was rather distended, Diet, Quassia and wine as formerly.</p> <p>Had three stools this morning, and his abdomen appears perfectly emptied. but He continues apparently very Ill with white furred tongue, hot skin, and very slow irregular Pulse, and delirium. His Eyes is perfectly clear and bright. <i>VSectio ad Ziiij.- Emplast: Meloi Magnum. Capiti</i></p> <p>Has still got considerable fever, and Complains much of the giddiness of her head. Pain principally in the fore part of the head. Two Blisters to the Temples. treatment otherwise as yesterday.</p>	
<p>Sep^t. 5th at Sea Long^{de}. 3:30 Latit^{de}. Thermometer 82 in the Hospital PB10097.JPG</p>	<p>Southerly winds, but more cool, and for my feelings pleasant.- yesterday it was impossible for me to write my Journal I had so much to do among the Sick several of whom were and now are very Ill. I was only three and a half hours in bed last night. and it is now within a few minutes of midnight, that I am enabled to give a very short account of the most severe cases that occurred. the number on the Sick list is now increased to Twenty. But the number to whom I administer medicine daily are not under twice the number, several of whom are seriously indisposed.</p>	

<p>Mary Tapper</p>	<p>Since reported her Bowels has been freely open and she was getting altogether much better, and getting very stout and of a full plethoric habit. Yesterday afternoon she came on deck, in good spirits and apparently in good health – attended Prayers about 2 P.M. – a short time afterwards, as I was told by her companions she complained of “a pain in her stomach”, and got some of the Wine served out to the Convicts, and drank it after which she was seized with a giddiness and taken below.- when I was told of it immediately afterwards, I found her Comatose, with Stertorous Breathing. and evident violent determination of blood to the head. <i>Venæ Section</i> was performed to the extent of <i>Zxxiiij</i> when she became Epileptic violently convulsed at intervals with perpetual stupor.- The determination of blood to the Head continued, with fullness and violent arterial action in the neck and head while the lower extremities were cold. Opened both Temporal arteries and obtained about <i>Zviiij</i> of Blood. about 3 o’clock in the morning she became sensible and told me that she had several such fits in the Prison, one of which lastd 14 hours,and which was removed by bleeding – In about three Hours afterwards the fits returned as violent as before, I now had her cupped on both Temples. But not more than four ounces of Blood was obtained. – An Enema with <i>Zfs of Tinct: asafitida</i> was given her.- Linapisms were applied to the feet and pit of the stomach; Spirit of wine –æther. aqua ammonia. were rubbed to her Temples. pit of the stomach. applied to her nostrils. and every, and many other things which thge most anxious solicitude could think of . about 4 P.M.. She again became sensible and talked most rationally. and said she had some pain in the “pit of her stomach and headache, but appeared glad and cheerful because (as she thought) she had got over her illness. Her Pulse however, at the time appeared full and oppressed but she did not like to lose any more blood as she thought she would soon be well. In a short time she was again seized most violently, having the same determination to the head. <i>VSect Z xxxx.</i>- during the early part of the Bleeding it flowed to the distance of a yard into the Cup. and nearly as much when the whole quantity was taken, but her Pulse became small and quick.- In a short time the Convulsions ceased, but the stupor remained. She would however smack her lips at times asking for drink of which she partook copiously. before I left her tonight she would when asked make sign that she wanted a drink. She then was continually tossing her hands and feet about, and endeavouring apparently to point out that she had pain in her head. Her pulse was 116. firm. Her skin cool. Pupil contracted and dilated by the approach or removal of light. Yet there were symptoms that indicated, or at least, gave occasion to fear that effusion on the Brain might follow, a large Blister was applied over the head. it having been shaved before to apply cold applications.</p>	
<p>Mary Neale</p>	<p>Remains in the same state, this morn^s she took <i>Ol. Ricini Zfs</i>. She continues the same medicines and diet. Had but one stool</p>	

		<p>Several of the Females have been bled, and had Blister etc. applied today but I am unable, feeling myself very unwell to give any further account of them.</p>	
	<p>Sept. 7th Long. Latitude 2:58 North Thermometer 82 PB10098.JPG</p> <p>Mary Tapper</p>	<p>Strong gales from S.S.W. Seasickness has now nearly disappeared. But the Hospital in particular is very uncomfortable from the great motion of the Ship and also being under the necessity of keeping the Ports shut. In many respects however I consider myself fortunate. for, thank God, I enjoy good health to enable me to meet the very numerous calls on my assistance. The Females themselves render me every assistance; They go about everything which I wish them to do, in the most willing manner; even they are respectable forward in offering their services. and so general is the feeling among them that a loud word is not to be heard in the Prison; for fear of disturbing the Sick in Hospital. Captain Baigre gives me, also every assistance in his power, - Yet together with all this, and the utmost exertions on my part, Fatigued in Body and harassed in mind, I get on but very badly. During the last week, I have not been able to give an account of the progress of the difficult Cases; and yesterday I could not find time for a moment to state even one case. Very few Cases of Fever have come forward, however, lately; and I am in hopes, as the weather is now more cool. and the sky has latterly been cloudy, it has attained its height; The Fever on Board has been in every instance of a highly Inflammatory Type, and nearly in every instance attended with much Hepatic derangement, so much so that I would defy the Nosologist, to give any reason why it should not be called either Fever or Hepatitis. The same general treatment has been used with them all, varying according to the degree of violence of the Symptoms of each case. – Early, Copious, and repeated Venæsection, while the Pulse remained, full, or firm; - Repeated purgatives, so as to have between four and six stools in the early stage, daily, combined with Calomel, until the mouth became tender,- Blisters, generally of a large size, to the Epigastre, Hypochondria, and head. – and occasional antimionials, were the principal means employed. attention being at all times given to particular Symptoms.</p> <p>Remained nearly of the night of the third in a Comatose state. In the morning she suddenly became sensible, and in a short time got into high spirits, but complained of pain in her forehead and stomach, says she has been afflicted with Fits about three years, first brought on from affright occasioned by a Person acting a Ghost, in the night. Her menstrual evacuation commenced with great pain, a flow hours before she was attacked with her present Complaint. She has always suffered much during Menstruation, Since about three years ago, her master gave her some drug procured from a Farrier to cause abortion.- She has now got much pain in her Loins, & Hypogastric Region, - fomentations were applied to her stomach and Hypogastrium. – <i>Tr. Asafetida g^{ma}. xxv.</i> were given Internally. and small doses of <i>Mistra Camphor:-</i> She remained quite cheerful till four o'clock, when she again</p>	

<p style="text-align: center;">Wm. McDonald Æt 6 years Son of one of the free women</p> <p style="text-align: center;">PB10099.JPG</p>	<p>compl^d suddenly of a spasmodic affection of her stomach, and a feeling as if cold water was thrown upon her head, but which appeared to be confined to the head. I had observed her face for several minutes before become more flushed: her pulse during the day was quick, the arterial action, had, otherwise subsided to the natural state. and her skin was cool. observing the change which had thus suddenly taken place, I hastened to give her an Opiate, but before I could get it ready she was seized with stupor, and strong convulsions;- They did not however last long. The fomentations were repeated. a strong opiate cataplasm laid over the region of the stomach: she contd pretty well during the night. Toast water, Barley water, thin Sago and a little wine and water being allowed her for drink, - This forenoon she was attacked in nearly the same manner, but which did not last more than ten minutes, and was not severe, - after she had recovered a purgative, (<i>Pulv Rhei ʒj</i>) <i>Crem: Tart: ʒij</i> were given her, which operated in the afternoon; In the evening she was threatened with another attack, which I think was obviated by the exhibition of <i>T. Opii g^{ma}. xxx.</i> Fomentations were again used this evening. and when I came up from below, I left her very comfortable, and highly grateful for the attention which had been paid to her.</p> <p>On the Evening of the 3rd. Inst.(Saturday) I was requested by his mother to see this Boy,- I found him, with very slow, and irregular Pulse; great determination to the head; upper part of the Body hot; feet cold, face pale; Tongue foul; Bowels costive; screaming violently with apparent cause, would not speak. Pupils of the Eyes contracted; Blood vessels of the turgid. <i>Venæsect: ad uncias octo. Hab^l. Submur: Hydrarg: g^{ra}. ij.</i></p> <p>Sunday morn^e very little alteration had taken place. Sumat. Ol: Ricini zij. in the afternoon his bowels were open. threw twice but no change in the symptoms were affected. <i>Rep^{dr}. Subm: Hydrarg: Emplast. Meloi toto Capiti raso .</i></p> <p>Monday. two stools, no alteration, except that he has become quiet: opened the Ttemporal artery and extracted about four ounces of blood. Repeated the Castor Oil, Blister not well risen for his mother is so tender of him that she allows him to tear if of his head.</p> <p>Tuesday. a total change has taken place in his Pulse; It is now very quick and throbbing with hot dry skin, no motion in his Bowels today will not take any nourishment, even water, and is much reduced, <i>Zvj</i> of (blood) were taken from his arm , when his Pulse became very small with a Considerable degree of Syncope, repeated the Calomel.</p> <p>Today. Is nearly as yesterday, except that He does not take much notice of what is going on around him,- He takes his food and drink however when offered to him. Faints if placed in the erect position. Pulse still firm and quick; with much throbbing of the Carotid and Temporal Arteries, has had a stool this afternoon.- the Blister has been renewed and kept closer applied to his head. Had the Calomel repeated, which he took in his Sago, which is the first time He took anything except by force. I had no hopes of</p>

	<p>M. Dwyne</p> <p>Mary Neale</p> <p>Mary Wilson</p> <p>Jane Milne</p> <p>Mary Sample</p> <p>Ann Kerslake</p> <p>Maria Green & Charlotte Fox</p>	<p>his recovery from the first moment I saw him.</p> <p>Is nearly as before. <i>Acid Vit.r dil. g^{tra}. x ter in die</i></p> <p>Very little alteration. took a laxative yesterday. Her former Tonic was changed today for Cinchona. She expressed a strong desire for a little porter which was given her yesterday and today, at which she expressed herself highly gratified.</p> <p>Is in a Convalescent state.</p> <p>Is still very feverish, and her fever begins to assume an Intermittent form. Continues the same medicines.</p> <p>Has been blooded twice till Syncope was brought on, and purgatives given so as to keep the Bowels freely open,- and a large Blister applied to the abdomen. She has slight pain in the abdomen still. Severe headache, Pulse is full.- fomentations to the abdomen, purgative of Rhubarb and Cream of Tarter.</p> <p>Has got severe Rheumatic pains and swelling of her Ancles, Knees, Wrists and Elbows, Loins and Sides, with several anthraceous tumors on her legs, was bled last evening (<i>Zxx</i>) Blood highly buffy. Laxativs principally of Calomel, embrocations; and Lotions to her legs.-</p> <p>Discharged well</p> <p>The other patients are improving</p>	<p>Discharged Sep^t. 7th Sep^t. 7th</p>
	<p>Sep^t. 8th at Sea Latit^{de}. 2:29 North Long^{de}. 12:44 West Thermometer 80 in the Hospital</p> <p>Mary Tapper</p> <p>Wm. McDonald</p>	<p>Strong S.S.W. Winds, Cloudy Sky and much more cool and pleasant than it has been for the last fourteen days. Thirteen confined to Bed in the Fore Prison and, one (Wm. McDonald) in the after Prison. four of those in the fore Prison are obliged to sleep out of the Hospital. There are several others Ill, and are obliged to lie down frequently during the day.</p> <p>has continued pretty well and is in good spirits during the day; Taking <i>T^r. Digitalis</i> in doses of <i>xx</i> drops, intended to be cont^d. thrice a day. – about 5 P.M. She complained of a return of the same pain in her stomach which preceeded the former fits, she had two stools today, her skin was cool, and her pulse moderate 96.- I therefore gave her <i>T^r. Opii g^{tra}. xxx</i> in hopes to prevent the fit but it was not successful, It came on about 7 Ocl^k.- there being much determination to the head with full throbbing Pulse I took <i>xvj</i> of blood from her arm, soon after which she recovered, the fit lasting about an hour.</p> <p>Is nearly as yesterday, no motion today but was moved in his Bowels four times during last night, -Had Two small Blisters placed lower on his forehead and temples as the former one did not reach low enough down. <i>Submur: Hydrarg: g^r. ij.</i></p>	

<p>Sep^t. 9th at Sea Latit^{de}. 2:8 North Long^{de} West Thermometer in the Hospital at 1P.M. 78. Mary Tapper PB10100.JPG</p>	<p>Southerly winds with fine weather, and the atmosphere sensibly cooler, nearly agreeable to the feelings. All the Cases of Fever with one exception are better today. Two new Cases came forward this morning but neither threatens to be severe;</p> <p>Soon after she recovered last night fell into a sound sleep, in which she remained till three o'clock this morning. She appears pretty well today. her skin cool, Pulse moderate but Complains of headache, and pain (in) the loins and Uterine Region, Tongue is clean; and has moderate appetite which I am rather obliged to restrain; <i>In mane habuit Pulv. Rhei g^{ra} iij. Cremor tart. ʒij – ft Haust. Conf. T^r. Digitalis ter in die. Alcohol: Camphor: pro Embrocat : Regioni Hypogast:</i></p>	
<p>Wm. McDonald</p>	<p>Had one stool in the night; was very restless all night. today appears very Ill; was Convulsed in the morning for some time. His eyes are fixed, turned slightly upwards and to the left. pupil of the left Eye much dilated. pulse small and very quick. about 3 P.M. He had Convulsive twitchings of the Muscles of the Face. and was so weak that he would hardly swallow a little wine put into his mouth.</p>	
<p>Mary Neal</p>	<p>Remains nearly in the same state, except that now, a real Phthisical cough is apparent, with slight expectoration, she complains of no pain whatever; Her Bowels are regular, her appetite tolerably good, but she is so weak as to be totally unable to get out of bed. Bark, Wine, nutritive diet continued and a little Porter sent her everyday with which she is much gratified.</p>	
<p>Marg^t. Dwyne</p>	<p>Is improving much, very little vomiting and is much stronger. Bowels open: <i>Contr. Acid Vitriol: dil: g^{ma}. xij in Aqua Cyatho ter in die.</i></p>	
<p>Mary Wilson</p>	<p>Is so far recovered as to be able to go on deck today.</p>	
<p>Jane Milne</p>	<p>Is totally free of fever today, and Complains only of giddiness when she sits up. Yesterday omitted her former medicines, and she had <i>Vin: Antim: g^{ma}. xxx ter in die.</i> Today Bowels freely open. <i>Sumat Vin: Antim:</i></p>	
<p>Mary Sample</p>	<p>Yesterday had <i>Zfs Sulph Magnes:</i> - an Antimonial in the evening. Today she has very little pain in the abdomen; Headache nearly gone; and fever much less. – Bowels freely open. <i>adhibend: Vin: Antim: g^{ma}. XL ter in die.</i></p>	
<p>Ann Kerslake</p>	<p>Very little alteration; Rheumatic Inflammation of her Joints remain severe, and also the swelling on her legs. her Bowels are kept open, with <i>Pulv: Rhei et Supertart: Potassiae.</i> Her Pulse is still full; her skin at times dry and hot, again she perspires freely: Yesterday her Gums became slightly affected; The Calomel was omitted and <i>Vin: Antimonii g^{ma}. XL ter in die sumpta fuit. Hodie Conf. edeam . cum Embrocatione ex Liniment: Ammoniae, et</i></p>	

	<i>Lotio: pro Cruribus Aqua vegeto. mineralis.</i>	
Mary Dowling	Convalescent, takes <i>Infus: Aquass: Zj bis in die.</i> laxatives as required, with a little wine.	
Mrs Atkins	Is well, and discharged today.	Sep ^t . 9 th .
Jane Baker	Convalescent. Laxatives required almost daily. <i>Cont^f. Infus: Quassia^e ut antea.</i>	
Marg ^t . Haley	Well, discharged	Sep ^t . 9 th .
Eliz th . Wimbridge	Continues free from fever; Bowels regular; Tongue clean. But she is of a very delicate Scrophulous constitution, and has twenty different Compl ^{ts} . in a day. Headache, Cramps in the Stomach, pain in her Bowels, pain in the right, and left sides, back, loins, etc. etc. Seldom having more than one at a time, but never without one. – She has used small Blisters, Liniments, antispasmodics, etc. for them, Takes <i>Infus: Quassia^e</i> regularly. She has a large ScrophulusTumor on the left side of the neck for which a blister has been applied this afternoon.	
Ann Leake	Has no fever, but she is very weak, and faints if she sits up for any time. Her Bowels are rather constipated, requiring almost daily laxatives. Her countenance is very pale, and she has considerable fulness in the Epigastrium , She is not however very much reduced, appetite is not good. – <i>Sumat Infus: Quass: Zj .- cum Tinct: Ferri Ammon: g^{tt}. x ter in die.</i>	
Vespere Mary Tapper	Has continued in tolerably good spirits, and had no approach to having a fit during the whole of this day.-	
Wm. McDonald	Continued very low during the whole day; gradually sinking, till about half past nine this evening He expired. On this case I would beg to make a few observations. It was decidedly, from the first moment I saw him a case if Inflammation of the Brain tending to Hydrocephalus, or rather when I first saw him, He was far advanced into that state which is commonly described as the second stage of Hydrocephalus, I have always considered it my duty to look after the health of the children but I have lately been so much engaged with the Patients ill of Fever, that I have not been able to attend to this part of my Duty; and his mother, first allowed the disease to proceed to the state I mentioned, by perhaps not observing it, and afterwards, even when I saw him, and pointed out to Her the dangerous nature of the disease she was so tender of the Boy that she would not allow me to give him the medicines which I wished, and He himself was so cross that He would hardly take anything whatever.	
PB10101.JPG		Died Sept. 9 th .

<p>Sept. 12th. Long^{de}. 14. West Lat^{de}. 00:48 North Thermom^r. 80</p>	<p>Southerly Winds, and Cloudy. - Since last report I have had so many to attend that were so severely Ill that it was impossible for me to take a pen in my hand to write any amount of their Cases without at the same time neglecting themselves, and letting their complaints become dangerous, indeed so frequent were the calls for my Assistance that according to my own Ideas I could not do Justice to them all. For the last four days I have been in either Prison from six in the morning till about one or two o'clock next morning.</p>	
<p>Mary Tapper</p>	<p>Has had two Epileptic since last reported, but none for the last 48 hours, pain in the loins continue but less severe, has much headache. Bowels has been opened by purgatives, Antispasmodicas as opium, Hyosciamus, asafetida, appear to have no effect upon her complaint even in large doses although it was evidently of the Hysteric Class of Epilepsy; Yesterday she had a seton put in the back of her neck as she has always complained of severe headache. Camphor Liniment is frequently used to her Loins, Sacrum, and Hypogastre; and at times to the Epigastrium. Bowels rather slow, today. <i>Hab^l. Pulv: Rhei. zj. Super: tart: Potassiae zj.</i></p>	
<p>Mary Neale</p>	<p>In appearance she remains nearly the same, But her Cough and Expectoration is much more Considerable, particularly in the morning, <i>Habt. Infus Quass: in loco. Pulv Cinchon:</i></p>	
<p>Jane Milne</p>	<p>Is free of fever but very weak. <i>Infus. Quassiae Sumat ter in die.</i></p>	
<p>Mary Sample</p>	<p>On the afternoon of the 11th got up on deck and remained some time when she came down with a relapse of her former complaint, and fever. <i>Venaesection</i> was repeated to <i>Zxx</i> which somewhat relieved her.- Laxatives and an occasional antimonial have been continued since.</p>	
<p>Ann Kerslake</p>	<p>Was again Bled to <i>Zxxij</i> on the afternoon of the 10th which relieved her somewhat, the pain and swelling of her joints and legs continue, Bowels are kept open by <i>Pulv: Jalap. Comp. etc.</i> with small doses of Calomel. Her mouth is slightly affected. <i>Con^l. Vinum. Antimoni ut antea.</i></p>	
<p>Mary Dowling</p>	<p>Is very constipated in her Bowels, and although I have given her large doses of every Purgative in the Chest, no passage can be obtained, She had an Enema this morning but which she says brought away nothing. She has no pain; she is now taking a dieta? of Sennæ in repeated draughts.</p>	
<p>Elizth. Wimbridge</p>	<p>Is much better; omitt^r. medicam: -</p>	
<p>Ann Leake</p>	<p>Becomes more and more weak, except a pain in her stomach her complaints do not remain an hour the same. She had yesterday a Blister to the Epigastrium but it has given no relief. her pulse is rather quick but not hard. The Catamenia are obstructed; and</p>	

<p>Mary Robinson æt. 20. Convict</p> <p>PB10102.JPG</p> <p>M^y. A. Smith æt. 5 years Convicts child</p>	<p>have been for some time. She is sometimes affected with a slight degree of Hysteria.. In short she is severely affected with Chlorosis. The medicines which I give her, are so various, according to the Symptoms of the moment that I cannot enumerate them. principally Antispasmodics, Laxatives and Tonics. the last particularly the <i>Tinct: Ferri: Ammoni:</i> by that most trusted to. –</p> <p>Came forward on the evening of the 10th with very severe Enteritis, of two or three days standing, which she said she thought would wear off. <i>VSect: ad Zxxxij Pulv: Rhei ʒj. Calomel g^r.iij.</i> was relieved. 11th morning. <i>Repetad: VSect: ad Zxxij. Sulph Magnesiæ Sumat Zfs.</i> – (afternoon) Bowels open and is somewhat easier, but considerable pain still remains all over the abdomen. <i>Emplast.Lyttae toto abdomoni</i>, which however was removed before it was risen fully. Vesp. pain returned severe with hot skin, <i>Rept. VSect Zxvj</i> . another motion, all the Blood taken was highly sisy – This morn^g. she is much easier in her Bowels, and skin is cool and pulse soft though quick, Blister has risen since last evening.</p> <p>was brought to me on the evening of the 11th with violent fever, and great determination to the head. Arteries and veins in the fore head turgid. and Bowels obstinately Costive, for I have been given her purgatives for the last two days which have had no effect. Her mother tells me she Bled at the nose twice. <i>V.S. Zxj.</i> were taken from her arm Syncope. <i>Zfs of Castor Oil</i> was given, and cold applications to the head. (Yesterday) She was again bled in the morning about 1 Ocl^k. and <i>Zvij</i> . about 7 Ocl^k. the Castor Oil was repeated, - a little after noon the <i>Venæsection</i> was repeated to <i>Zvij</i> Syncope. in the Evening she had a motion but not free. <i>Sumat Pulv: Rhei g^r. x. Submur: Hydrarg: gr. ij.</i> applications to the head continued. This morning is still highly feverish with much determination to the head, no further motion in her Bowels. <i>ft.Enema ex Aqua Saline et farina avena Exhibend: Infus Sennæ acidulatum Supertart Potass: Ziiij. hora sumenda donec alvus soluta est</i> - The injection brought away a considerable quantity of hardened faeces. All the Blood taken showed symptoms of Inflammation: She complains of pain of the head only. Her Pulse is now fuller and softer, but determination to the head is still great.</p> <p>The Patients with Fever, or Convalescents, which I have not here named, are improving; - To mention the various Cases of Epileptic and Hysteric fits I have had to attend to lately, particularly yesterday, some of them very severe, would be endless. The worst of these occurred in the Cases of Mrs Davis, a passenger, Mrs Petit a free passenger, and Letitia Pickers a Convict. These were cases of Hysteria but all nearly approaching to Epilepsy. I used Copious Venæsection (till they were relieved) Purgatives, and Antispasmodics. I have also under treatment three Bad Cases of Phlegmon and one very severe case of</p>	
---	---	--

	<p>Whitlow, Constipation and Suppression of the Catamenia are complaints that come before me in numbers every day; The lancet is almost in my hand one third of the day, and sometimes it is not easy for me to convince them that they do not require to be bled. The Females who are well however are exceedingly attentive to the sick, and render me every assistance, indeed it would be impossible for me to give a sufficiently Strong Idea of their very praiseworthy conduct in that Respect. They are also highly grateful for all the attention which is paid them on my part. and perhaps for that very reason I exert myself to the utmost, till I am nearly exhausted to be of service to them.</p>	
<p>Sept. 13th. on the Equinoctial Line Therm^f. 80. in the Hospital</p>	<p>Southerly winds and fine, Today the number on the Sicklist are the same, the cases of Fever are all much better, the case of Enteritis. (Mary Robinson) an Child M.A. Smith are also better. Mary Neale is daily getting weaker, but she is in high spirits, and says she only wants strength and she would be as well as ever. Hope springs eternal – Ann Leake is frequently attacked with slight fits of hysteria, - Mary Tapper, has very severe pain in her loins. which is evidently uterine, pain in her stomach, and headache; Pulse during the day is 100, full, soft; Skin was moist and not warmer than natural, in the even^g. her Pulse became fast as 120. less full, and soft. Skin natural heat; - The strongest antispasmodics have been given her without the smallest effect. Her Tongue is clean and although she has been so long sick, and under active treatment the greater part of the time, except that she looks pale in the face she is very little reduced , <i>Habt. Pulv: Rhei g^r. xv. Supertart: Potass: zij.</i> In the afternoon had two motions.- <i>Sumat Tinct: Digitalis g^{ta}. xx</i></p>	
<p>Sept. 14th Therm^f. 79. in the Hospital PB10103. JPG Mary Tapper</p>	<p>Light Southerly winds and pleasant weather. The Fever Cases with one exception, Ann Kerslake, are much better; and that cases ought now to be considered as a Case of Rheumatism. - Every day I have numberless cases arising from irregular Menstruation. which appear in almost every shape. and for which I am obliged to give as various medicines Venæsection, Purgatives and Antispasmodics..</p> <p>This morning was nearly as last evening, She complained of much pain in her head, stomach and loins; her pulse was 112. Tongue clean; Heat natural; Skin moist; <i>Habt.Tinct: Digitalis ut heri.</i> (1P.M.) Pulse full to 84. and her pains became much easier, Rep^t. Tinct. Digitalis. In the afternoon she considered herself so well that she wished to go on deck, but I advised her against it.- In the evening her pulse rose to 104, Soft, and easily compressible; but there was a throbbing heat of the artery, and a fluttering or thrilling as if gritty matter was passing through it with the blood. She then Complained very much of severe tormina in the abdomen, which she said drew her Bowels into knots. Her skin was not hotter in the smallest degree, her Bowels have been open three times today; not knowing what to do, I repeated the <i>Digitalis</i> with <i>g^{ta}. xxiiij T^r. Opii</i> – no relief was</p>	

<p>Mary Robinson</p> <p>Ann Leake</p>	<p>obtained in the usual time.-</p> <p>and the Child M.A. continue better, they had laxatives today to keep the Bowels open. Robinson had no motion at 8 Ocl^k.this evening, although she took. <i>Pulv: Rhei g^{ra}. xv.- Supertart: Potass: æifs.- Submur: Hydrarg: g^r. iij. with Ziij of a strong Infus of Sennæ.-</i></p> <p>Complains still of severe pain in her stomach and headache, her Bowels are easily kept open with gentle laxatives, Today she commenced to take <i>Tinct Ferri Ammoniat g^{na}. xx ter in die.</i></p>	
<p>Sept. 15th Thermometer 80</p> <p>Mary Tapper</p> <p>Mary Robinson</p> <p>Mary Herwood æt about 26</p>	<p>Light Southerly winds and fine weather. Sick are in general in a favourable way, the fever cases improving in health and strength.</p> <p>has been somewhat easier today; her Pulse has varied frequently during the day; fluctuating between 84. and 104. full and easily compressible but with a throbbing beat. Today she has had five stools, <i>Cont^d. theT^r. Digitalis with the T^r. Opii g^{na}. xxv.in vespere.</i></p> <p>Has remained easy till this afternoon; had one motion; in the afternoon her pulse became quick 130. throbbing, full, but soft. Her face flushed, skin hot, quick respiration, but she said she had no pain, except a headache which she ascribed to the noise on deck. She allowed no pain in her Bowels, but on pressing them, she shrunk from the hand. <i>Venæsect Zx.</i> which relieved hher breathing, short time afterwards, the vein was again opened, and <i>Zvij</i> was taken, when she got very Low and no more could be taken, her pulse became small quick, and soft: her face less flushed; her headache was removed; her skin more cool, and she said she was much better. Had <i>Zij of infusion of Sennæ.</i></p> <p>Complained last evening with severe cholic. Bowels costive, but no fever, <i>Hab^t. Subm: Hydrarg: g^r.iij. Pulv: Rhei g^r. xv.-</i> had one stool. <i>Sumat T^r. Opii g^{na} xxv.-</i></p> <p>This morning. – had one motion in the night but griping continues severe at times, has no tenderness in the abdomen, her skin is hot, Pulse natural. <i>Sumat Infus: Sennæ Zxij.-</i> In the afternoon her pains became excruciating, her Bowels affected with violent spasmodic constriction. <i>Vsect. Zxvij.</i> Slight Syncope and vomiting after which she had a free passage in her Bowels four or five times, In the evening she said she felt very easy but on pressure on the shpulder I found much pain in the left Iliac Region. Her Pulse was 104 small and wiry, her skin hot. On applying the bandage to blood her she got faint and sick, her pulse fell and I was obliged to desist.</p>	
<p>Sep^t. 16th Lat^{de} 2.38. South Long^{de}. 20 Therm^r. 80 in the hospital</p>	<p>Strong South Easterly Winds, and considerable motion of the Ship, Sick, generally, as before, but two very severe cases of Enteritis occurred today, which I had very strong reasons to believe arose from drinking too much LimeJuice, I have not yet (I have been so much engaged with the sick) had time to examine</p>	

<p>PB10104.JPG</p> <p>Mary Herwood</p> <p>Mary Robinson</p>	<p>the Lime Juice, but before any more is served I must see that it is not of a deleterious quality. Neale and Leake are nearly as yesterday. M.Tapper's pulse fell today as low as 76, and I left off the T^r. Digitalis. Her headache, and the pain in her stomach easier, but the Pain in her loins continues as severe as ever, said she did not pass her urine freely: having passed none since yesterday morning: Drew it off with the Catheter, but no relief. Her Pulse continued low, and skin cool all day, but her features were contracted, and her face pale with the pain her loins, to have a little wine in her water gruel frequently.</p> <p>was Blooded again today, Had fomentations to her Bowels.- Four stools, Skin now little warmer than natural, and says she has no pain whatever (9.P.M.) Her pulse is however very small and quick, and she has had some vomiting in the afternoon,; She is however, I am convinced, much relieved.</p> <p>Had two motions in the night, and this morning and forenoon was easy with very little fever. about noon she drank some Limejuice which immediately brought on griping pain, soon after which her skin became hot and dry. Pulse 144. full, thrilling and throbbing, and great arterial action over the whole system; great pain over the whole abdomen; difficulty of, and oppressed breathing from pain in the Epigastre and Hypochondria, and much tenderness of the abdomen; with slight delirium, She had a <i>Zifs of Carb: Magnes: V.Sect Zxxvij</i>. Blood Buffy and very sizo. Fometations repeated for hours, Enemas two, when she suddenly expressed herself much easier; indeed said she had no pain; her pulse remained 136. small. her abdomen became tumid, and her skin generally much colder than natural, and there was some colour in her face, particularly in her lips; with a pretty general diaphoresis, and no very great depression, I have much reason to fear that she is still in imminent danger notwithstanding a few favourable symptoms.</p>	
<p>Sep^t. 17th South Lat^{de}. 4.44 Thermometer 80.</p>	<p>Strong South easterly winds, and the Ship, particularly the Hospital very uncomfortable from the great motion, and some wet.- In the Sick generally there is little alteration;- Robinson is, I am happy to say, much better today, - Her skin is cool, abdomen less tumid, no pain, three motions today, by Infus: Sennæ, - Her Pulse is still very quick. but altogether she appears in a favourable way. Mary Herwood, has much fever, her Bowels have been repeatedly open, has no pain in the abdomen, but has frequent vomiting during the day.- Laxatives of Infusion of Sennæ, and Sulphat: of Magnes: have been exhibited and fomentations to the stomach and Bowels. M.Tapper has not taken the Digitalis T^r. as her pulse has continued moderate, and she has felt easier, than she has been for many days. Wine and water given her for drink.</p>	

<p>Sep^t. 18th Lat^{de}. 6.54 South Thermometer 79</p>	<p>Strong Winds and Squally. Hospital very uncomfortable. Sick nearly as yesterday and using nearly the same medicines. Robinson continues better, but she has had no motion in her Bowels today. <i>Hab^t. Sulph: Magnes: Zfs.</i> Leake and Neal are in the same state, taking the same medicines. Mary Tapper was much better this forenoon, In the afternoon however she had a Paroxysm of fever which lasted about five hours. I had to draw her urine again this evening. The others are continuing to improve though slowly.</p>	
<p>Sep^t. 19th Lat^{de}. 9.23 South Therm^f. 79</p>	<p>Strong South East Winds, Sick nearly as yesterday, Mary Tapper had another paroxysm of fever this evening, after which she commenced to take <i>oifs Cinchon: Pulv:</i> every three hours, The Child Mary Ann Smith is quite Convalescent.</p>	
<p>Sep^t. 20th Lat^{de}. 12.9 South Therm^f. 79 in the Hospital</p> <p>PB10105.JPG</p>	<p>Winds yesterday,- all the Sick were out of Bed for a short time in the afternoon while it was moderate, except Mary Neale, and she is getting more low every day; Lately her expectoration has become more difficult, I therefore, left off her former medicines, and today, she took <i>T^r. Scillæ g^{ta}. xij. Acid: Sulph: Dilute g^{ta}. xij in paucilo Aqua, ter in die;</i> her appetite and her spirits are astonishingly good. and five or seven drops of T^r. Opii are sufficient to restrain her bowels, occasionally taken when, there is a tendency to Diarrhoea.</p> <p>Tapper continued the Cinchona, but had a paroxysm again this evening, though more slight. Several cases have occurred of Bowel complaints, Hysteria and other affections arising from obstructed Catamenia, and two complained today of rather severe Menorrhagia, but they are all complaints which I treat in their Births, and yield to Venæsection and gentle laxatives, as almost all of them are of the inflammatory kind.</p>	
<p>Sep^t. 22nd Lat^{de}. 17.50 South Therm^f. 79.</p> <p>Mary Tapper</p> <p>Mary Neale</p>	<p>Moderate Easterly Winds, and Smooth Sea, The Sick are all improved in consequence of the fine W^f. and diminished motion of the Ship. Even M.Neale appears better.</p> <p>Has been up the greater part of the day, and is altogether much better, pain in her stomach and loins nearly gone, Tongue clean, and except during the Paroxysm in the afternoon is nearly free of Fever, This afternoon her Pulse became more rapid, her face pale, her skin dry, and rather warmer, but she had no regularly formed Paroxysm. The Cinchona with a little wine is continued.</p> <p>Within the last three days, her Cough has become frequent with copious fetid purulent expectoration. her pulse is small and is generally about 120. Heat nearly natural. Has generally three motions in her Bowels in the 24 hours, breathes quick; has no pain; appetite is surprisingly good, and takes not less than Five pints of Thick Gruel and Sago in the day besides Soup etc. She will take no Tea, or any other liquid except wine and water, a Glass of Porter is sent to her every day from the Cabin Table, and if, at any time it is later than usual she frets very much, and gets</p>	

	<p>into good humour as soon as she has got it. The Tinct: Scillæ and Acid: Sulph: dilute: is continued and occasionally a few drops of <i>T. Opii.</i>- a little wine is put into everything she takes, except her soup. A woman is appointed expressly to attend upon her.</p>	
Margt. Dwyne	Is well although still weak. discharged with directions to attend every morning.	Discharged Sept. 22
Mary Wilson	Discharged	D. Sept. 22
Jane Milne	Continues to improve, but has had one slight febrile Paroxysm, which I considered as threatening Intermittent fever, and immediately commenced to give her <i>Pulv: Cinch: æij ter in die.</i> with Mercurial laxatives occasionally.	
Mary Sample	Is today perfectly well, and gaining her strength fast, discharged.	disch ^d 22
Ann Kerslake	Is much better today, has very little fever, pain and swelling of her legs, and pains of the Joints nearly gone, <i>Cont^f: Embrocat: part: infribus est Inflammatio et dolor. Cont^f. Vinum. Antimoni g^{ta}. xxx ter in die.</i>	
Mary Dowling	Discharged	Discharged Sept ^f . 22
Jane Baker	Has been getting much better since last report. this morning she complained of severe headache, was constipated in the Bowels, her features wee full and bloated; her pulse was full and quick. Had <i>Pulv: Rhei æj. Supertart: Potass: æij</i> and afterwards repeated draughts of Sennæ Tea, until her Bowels were open.	
Eliz th . Wimbridge,	discharged.	Discharged Sept ^f . 22
Ann Leake	Is much better, although still so weak as to not be able to sit up for any time, does not find any pain in her back, headache and pain in her stomach less. Bowels require to be kept open by laxatives, <i>Omit^f. T^r. Ferri. et Sumat Pulv: Cinch: æifs ter in die in Vin Rubr: Zij.</i>	
Mary Herwood & Mary Robinson	are getting much better; Both are taking a Compound Infusion of Quassiæ and Gentian three times a day. Their diet is restricted to Tea, Water gruel and Rice Pudding.	
Sept. 24 Last night off the Island of Trinidad Thermr. 78	During the last two days there has been very little alteration in the Sick and all of them using the same medicines. This evening Mary Neale has been much worse, her cough and expectoration great and (from debility) at one time threatening suffocation. About nine o'clock this evening, I left her much easier. She complains of no pain whatever.	
Jean Watt æt. 21	Two of the Convalescents from fever are very ill tonight from relapses and both are very much debilitated and one female is very ill with cholic and fever attending it. Her Bowels have been freely open during the day, from Purgatives, but she would not	

<p>PB10106.JPG</p>	<p>allow me to bleed her. Had a Mercurial purgative at night and an Antimonial . About nine o'clock this evening Mary Neal as attacked with severe Cough occasioned I think by the bursting of a vomica; for several minutes she was threatened with suffocation; the Quantity of Pus expectorated was not great, but she has now become so weak, that expectoration is very difficult. She was also very much relaxed in her Bowels during the Evening, I therefore added Tinct: Opii g^{tra}. xij to her former medicines.</p>	
<p>Sept. 25th. Latitude 25 South Thermometer 79 Mary Neale</p> <p>Jean Watt</p>	<p>Fine weather and most of the Females in good health and improving very much in their appearance.</p> <p>Has been, according to her own Expression "Very comfortable" during the night She had no Cough since last evening, nor any motion in her Bowels until 10 Ocl^k. today, she had another in the afternoon. and she begged me in the evening to let her have some more of the medicine which stopped the Purging before, as she was affraid it would come on again in the night. She had the same Medicine; Her Pulse is scarcely perceptible; very quick; her skin cold, yet her appetite is particularly good. She has every attendance, and attention paid to her comfort, and has everything she wishes for from the Cabin Table. (I have always approved of what she has asked for) Today she had at dinner some Roasted Turkey, and a little Porter, which she relished very much, and she is of a very grateful disposition.</p> <p>(Mane) Had four motions in her Bowels since last evening. Says she has no pain whatever, but her pulse is very quick and at times full and even throbbing, and her skin dry, and intensely hot. Tongue furred, white, and very red at the edges, would not be bled,- an Antimonial was given,- In the Evening and during the whole afternoon, finding her Fever cont^d. violent, I got two of her comrades to assist me in advising her to be bled, when after much trouble she consented, Sixteen ounces were taken in a full stream, - Nausea followed.- after which she said she was much "lighter". <i>Sumat Submur: Hydr: g^r. ij Pulv: Jalap g^r. viij cum Vini Antimon: g^{tra}. xxx in paucilo Aqua.</i></p>	
<p>Sept. 27th. Latitude 29.48 S. Thermometer 76</p> <p>Mary Neale</p>	<p>It may be supposed that I am very negligent in keeping my Journal of the Sick. But if it could for a moment be seen, the state they keep me in from morning till midnight it would I think become matter of astonishment that I am able to give any account at all of them, For the last 48 hours I have not had scarcely an hour to myself. Between Epileptic, Hysteric (principally arising from quarrelling) Patients, Complaints, and other duties; I have fully enough to do.</p> <p>is very weak, but is in high hopes, her Bowels are easily kept from being relaxed by a few drops of <i>T. Opii</i>, and her appetite is good, and she is allowed everything she has a fancy for. Her ordinary diet is gruel, Tea, Sago, the first of which she is very fond of; She has a little wine in all of them.</p>	

<p>Sept. 28th. Latde. 32 Temperature in the Hospital 74 on deck 68</p>	<p>Strong North East winds, Ports shut in; Ship not dry, and the Hospital very uncomfortable, while I was writing last night, and flattering myself that I should be able to give an account of all my Patients, I was called to see Mary Tapper. I found her in violent fits (Epilepsy) and found that they were brought on by one of her comrades quarrelling with her, Her skin was at first cold and constricted. Pulse small and quick but with evident determination to the head; gradually her skin relaxed, became hot, pulse full, and a perspiration broke out, when she became less convulsed and in about 1 ½ hours they went off leaving her very weak, with much headache, pain in her stomach, and loins, gave her an opiate.</p> <p>This morning she had another severe fit and notwithstanding my reluctance to blood her the determination to her Head was so severe that I was induced to take Zxx of blood from Her arm when she fell into a sound sleep and after some time awoke apparently not knowing what had taken place. Her Bowels were open during the day, A strong opiate was given in the evening.</p> <p>Mary Neal is very low, Medicine omitted except the <i>T. Opii</i> to prevent diarrhoea, wine, (which she craves for) is given her in everything she takes, the best wine being used for her.</p> <p>Jean Watts, is still in appearance very ill with quick pulse, intensely hot skin, but she will not take any medicine except what pleases herself, and will not acknowledge that there is any complaint or pain about her, and insists that it is only "laziness" that keeps her in bed; Her Bowels are kept freely open by pills composed of <i>Submur: Hydrarg: gr. ij Pulv: Jalap gr. iiij</i>. She takes about three every day, and it is the only Medicine she will take.</p>	
<p>Sept. 29th Thermometer 72 Lon^{ge}. 16.10 West Latitude 33.29 South</p> <p>Mary Tapper</p>	<p>Light North West Winds and heavy rain in the morning. In consequence of the continued course of dry weather which we have had the Decks are very leaky, and the Prison was very wet in several places; In the afternoon the weather cleared up and the Females had an opportunity of drying their clothes and bedding. and everything was done to prevent a recurrence of it, by the Carpenter Caulking the open places; He was for some time before engaged in giving the upper deck a general caulking.</p> <p>Had another Fit this morning which went through a cold, a hot and sweating stage as yesterday and then went off leaving her Languid, and with considerable headache, some pain in the Epigastrium and loins. Bow(bowels) were freely open before the paroxysm. pulse remained full and throbbing, <i>V:Section</i> was performed to Zxx. Blood slightly buffy and sizy. In the Evening, being threatened with another fit, exhibited, <i>T. Opii gr^{ma}. xxxx Liquor Ammonia gr^{ma}. xv. in Aqua Ment: Pip. Zij</i></p>	

<p>October. 1st Longitude 60.56 Latitude 34.31 South Thermometer 70</p> <p>Mary Tapper</p> <p>Vesp.</p> <p>Mary Neal</p> <p>PB10107.JPG</p>	<p>Light Westerly Winds, and very fine weather, Those among the Females who have not been sick are now in the most excellent Health, and Spirits. The Convalescents I am also happy to state are improving although but slowly.</p> <p>Had another severe Fit with a Paroxysm of Fever as before. It commenced about 5 P.M. and continued about two hours. as it had an Intermittent Character, and as the Bark had formerly failed I determined upon the use of the <i>Solutio: Arsenalis</i>, and gave her g^{tta}. x of it.- This morning it was again repeated but she soon afterwards had sickness at her stomach. but which was relieved by a draught of warm water with <i>Tinct. Opii g^{tt}a</i>. x <i>Tinct. Opii g^{tt}a</i>. xx <i>Solutio: Arsenalis g^{tt}a</i>. iiiij. Has had two stools today.</p> <p>Is now very low, and is reduced almost to a skeleton. She takes very little food now compared (to) what she took about a week ago. Gruel and Tea are the only things which she will take. She takes about a quarter of moderately thick gruel in the Course of the day: Wine is contd. <i>Tinct: Opii g^{tt}a</i>. <i>Mane et Vespere</i>, which is sufficient to prevent purging. I have been again induced to give her the <i>Tinct: Scilla</i> as I thought it rendered her cough more easy. The skin over the Sacrum has broke, dressings applied, a Pillow placed as to prevent Pressure upon the ulcerated part. I should have mentioned that she has a Cot. The woman who attends upon her is very kind and very attentive to her, and gives her everything required or directed, at all times day or night.</p> <p>The others are all Convalescent, (with the exception of the two Free women who are consumptive) and are using Tonics, Bark and Wine, with attention to the state of their Bowels, and any complaint which may arise.</p>	
<p>October. 2nd Longitude 7.54West Latitude 35.8 South Thermometer 68</p> <p>Jean Watt Ann Leake</p>	<p>South West Winds, and Squally, Sick generally continue to improve, although several of them are still very weak. Mary Neal is very little different. Mary Tapper has had no return of Her Fits, Bowels open, In the morning she took. <i>Liquor: Arsenalis g^{tt}a</i>. v., which however made her very sick at stomach, and which was relieved however by <i>Tinct. Opii g^{tt}a</i>. x as it had occasioned so much sickness I did not repeat it in the evening. It is to me, matter of great surprise, that, notwithstanding her long, and severe sickness, the immense quantity of Blood she has lost, and the spare diet on which she has always existed, she is still one of the stoutest Females in the Ship and fully as much so as when she first came on Board. In general, too, she is cheerful and disposed to laugh with those who are merry.</p> <p>has much less Fever today. appears to be something better.</p> <p>All the others I consider in a Convalescent state. There are some of them however, that will never be off the Sicklist while they are on Board.</p>	

<p>October. 3rd. Longitude 5.0 West Latitude 35.33 South Thermometer 60</p> <p>Mary Neale</p> <p>PB10108.JPG</p> <p>Mary Tapper</p>	<p>Nearly calm. Fine weather, but very sensibly cold. Several of the Convalescents came down this afternoon, with shivering, and considerable Fever, directed that they should have an abundance of Hot Gruel.</p> <p>Is very low, Pulse scarcely perceptible at the wrist, Has very little Cough, no pain, appetite gone. Stated this morning that she was aware that she could not live and desired that I would read to her. which I did. She takes gruel and wine only, with a few drops of <i>Tinct. Opii</i> occasionally to prevent purging.</p> <p>This morning I tried Her again with <i>Liq: Arsenalis g^{ta}. iiij</i> but which made her again very sick, I did not therefore repeat it, an Opiate relieved the sickness – In the evening – no stool since yesterday morning. <i>Habeat Sulph: Magnes: Zj.</i></p>	
<p>October. 4th Longitude 3.42 West Latitude 36.7 South Thermometer 58</p> <p>Mary Neal</p> <p>Mary Tapper</p>	<p>Strong North East Winds with a very heavy Southerly Swell. and although the Thermometer stands so high in the Hospital. Yet on Deck it is very cold and yesterday when I brought the Therm^r on deck it fell 13 degrees. Very many have got Colds, some have got Lumbago and pain in their limbs.</p> <p>Is still living. Water gruel and wine, and water is all she will take. a few drops of <i>Tinct. Opii</i> to prevent too much purging. She has never complained of any pain, and now she says she is very easy. Has hardly coughed any today, and she is even too weak to spit the phlegm out of her mouth. This evening she asked, to take her to Sidney, where her son is going.</p> <p>Has been pretty well all day, but her pulse is quick, full, and throbbing. Her Bowels being slow, gave her <i>Submuriat Hydrarg: g^r. iiij Pulv: Jalap g^r. xij</i>, In the Eveng.- had four motions. <i>Sumat Liquor Arsenicalis g^{ta}. iiij. Tinct: Opii g^{ta}. x.</i></p>	
<p>Oct^r. 5th Longitude 0.2 East Latitude 37.7 South Therm^r. 58</p> <p>Mary Tapper</p> <p>Charlotte Fox &</p>	<p>Strong Northerly Winds, with Squalls, and Ship very wet and uncomfortable below.- Mary Neal has been very low all day, her pulse not to be felt at the wrist since morning. She refused all kind of nourishment. but continued sensible to within a few minutes of her death, which took place about 7 o'clock in the Evening.</p> <p>appears much better today. but her pulse is very quick, and in the after noon her skin becomes very hot, but she has no regularly formed Fits. <i>Conf. Liq: Arsenicalis g^{ta}. mane et vespere.</i></p> <p>Elizth. Wimbridge, have come forward with Catarrh and slight Fever. Laxatives and antimonials were given them.</p> <p>The othesr I consider in a Convalescent state (with the exception of Mrs Hill free women) and are taking Tonics, nourishing diet and wine, with occasional laxatives.</p>	<p>Died 5th Octr.</p>

<p>October. 8th Longitude 9.0 East Latitude 38.20 South Therm^r. 64 in the Hospital</p>	<p>Strong North Westerly Winds with a heavy Sea. Still the Prison and Hospital are dry and comfortable. All the Sick have got on very well since last report. Most of them have been able to come on Deck for two or three hours during the day. In general they continue to take Bark and Wine, (every attention being paid to their Diet) with Laxatives, and such other Medicines as particular Complaints which occasionally arise may require.</p>	
<p>October. 10th Long^{de} 17. East Lat^{de} 39. South</p>	<p>Strong Westerly Breeze with a very heavy Sea, Yesterday between Noon and Midnight we experienced a very heavy Gale from the Northward, and although the Ship was rather easier and more dry than I would expect, yet the Females toward the evening became dreadfully alarmed and although I exerted myself to convince them there was not the smallest danger, yet several of them went into Fits from downright Fear, and I am sorry to say that Mary Tapper was among the number. Elizth. Wimbridge and Charlotte Fox are better, Wimbridge ordered to take bark and Wine thrice a day.</p>	
<p>October. 11th Long^{de} 20.22 Lat^{de} 39.34. Therm^r. 60 Mary Tapper Elizabeth Wimbridge & C. Fox Mrs Hill Free Woman æt about 52</p>	<p>Light Winds, and Cool Weather;- with the Exception of those immediately on the Sick List Females are assuming a more healthy appearance.</p> <p>Mary Tapper had another, severe Fit this afternoon of which she is not yet recovered (8 P.M.). Elizabeth Wimbridge & C. Fox are improving</p> <p>Mrs Hill Has been subject to a troublesome cough and some expectoration, for some years past, particularly in the Winter Season. Latterly it has become habitual, and she has been using expectorants, and Demulcents,- Her Diet has consisted principally of the various articles supplied as "Medical Comforts". Her cough remains nearly as before, but she complains that a severe purging has come on. An opiate</p>	
<p>Octob^r. 12th Long^{de} 20.34 Lat^{de} 39.40 Therm^r. 60 PB10109.JPG Mrs Hill</p>	<p>Mary Tapper got quite well during the night but she remained very weak. This afternoon she was again attacked but differently from all the preceeding (sic) attacks. She was very slightly convulsed, but was in a state of Stupor or Coma. with throbbing pulse.- <i>Venæsection</i> - when about <i>Zxij</i> of blood were taken she awoke as if from a sound sleep.</p> <p>Is very Ill today; has pain in her Breast, and considerable Febrile irritation; Her Purging was easier during the night but has commenced again this morning;- <i>Emplast: Meloi pectori; Hab^l. Mis^l: ex Pulv: Cretæ p:p: g^r. iij Tinct: Opii g^{ma}. iiij. Tinct: Scilla g^{ma}. iiij Sachar: q.s: Aqua Zi mane et vesp:</i> No persuasion would induce her to allow me to take some blood from her arm.</p>	

<p>October 14th</p> <p>Mary Tapper</p> <p>Mrs Hill</p> <p>Wm McDonald Child æt: 2 years</p>	<p>The Sick are generally improving fast. The following are those whom I now consider as actually on the Sick List, Mary Tapper, Mrs Hill, and Wm McDonald, a Child; there are several in a Convalescent State however who are still weak, and whom I allow to remain in the Hospital as there is accommodation and to have Hospital Fare, namely a certain allowance of Medical Comforts.</p> <p>Has been put on very low diet; namely, Tea or Coffee without any bread morning and Evening, and half a pint of Gruel about noon, She has had no return of her Fits; <i>Tinct: Digitalis g^{ta}. x mane et vesp.</i> has been given Her to be continued.</p> <p>Is also apparently rather better; Has less pain in her breast; and although the draughts, alleviate the purging the Cough is more severe when the Bowels are not loose. to be omitted – <i>Hab^t. Tincture Digitalis g^{ta}. x ter in die – with Tinct: Scilla and Acid : Sulph: dilute:</i></p> <p>Has been Ill since we sailed from England; Is of a Scrofulous and Consumptive Habit, with enlarged abdomen; latterly He has been very badly nursed and deficient in clothing, and He has now caught a severe cold, and his cough is severe. He has had several small Blisters on his breast and has been taking Squill Tincture and small doses of Calomel for the last six weeks. Had him taken into the Hospital to see that He would be better attended to, than He as by His mother, when not overlooked; Medicines continued.</p>	
<p>Oct^r. 18th Lat^{de} 38.41. S Long^{de} 36.11. E Therm^f. 56</p> <p>Mrs Hill</p> <p>Wm. McDonald</p>	<p>Strong westerly Gakles prevail with a heavy motion of the Ship, particularly harassing to the Sick.</p> <p>Mary Tapper had another Fit for which I applied a Blister to her head, and another between her shoulders; She is better again; <i>Cont^f. Medicam.</i></p> <p>States that she has no pain in her breast, but her cough is frequent and expectoration considerable, she has now very little Fever; purging continues severe, and she has got occasionally severe Dyspnea; She refuses to have another blister applied.- Indeed I do not think that any medicine could save her, but it would give her present relief; but she will not take anything except what she likes herself. I am therefore under the necessity of confining my attention principally to her Diet. at the same time she expresses her gratitude in the warmest manner for my attention to her; to be allowed a little wine occasionally.</p> <p>Is nearly in the same state, but is gradually becoming more emaciated; his bowels are tolerably regular, but much tumified; his Cough harassing. <i>Medicines. Cont^d.</i> but they are not likely to afford but momentary relief.</p>	

<p>Oct^r. 20th Lat^{de} 39. S Long^{de} 43. E Therm^f. 60 Mary Mrs Hill Hannah Clark æt about 5</p> <p>PB10110.JPG</p>	<p>Squally with rain, Cold and uncomfortable weather with a motion of the Ship very distressing to the Sick.</p> <p>Tapper continues nearly the same, has had no Fit since last reported. Same Medicines.</p> <p>Is getting very weak. Cough and expectoration incessant and severe, Her Dyspnea being severe yesterday, She asked for a Blister to be applied to her Breast, a small one was applied and she obtained some relief from it.</p> <p>Was shewn to me by Her mother yesterday afternoon, saying she did not appear to be well.- I have frequently during the passage given this Child medicine, being Scrophulous with enlarged Mesenteric Glands. and particularly subject to worms. She had now all the Symptoms of severe Enteritis; I gave her small repeated doses of Castor Oil, during the afternoon and Evening, and her Bowels have been freely opened; Repeated Fomentations to the abdomen yesterday afternoon,- I opened a vein at Four different times, and in different places but I could get but very little blood from Her on the whole not more than Fourteen ounces and I am sorry to add that a Blister which I applied to the Abdomen late last night, was removed by her mother; I again applied it this morning, and it was again removed; so that only two small spots are risen. Bowels are to be kept open with Senna Tea.</p>	
<p>October. 21st Mrs Long^{de} Latitude Therm^f. 6 H.Clark</p>	<p>Hill is getting very low, and will scarcely take any nourishment except Coffee and a little wine.</p> <p>appears very Ill, the Fomentations had been reapplied and I had again attempted to take some blood, from her, but could not succeed. and as a last resource I again applied the Blister this morning. It rose perfectly in a few hours, but this evening she became very weak and I had reason to fear mortification had commenced.</p>	
<p>Octr. 22nd. Long^{de} 50.47 Lat^{de} 40.21 Therm^f. 60</p> <p>Mary</p>	<p>Very cold and uncomfortable weather; Mrs Hill is very low. Has no pain but Cough is frequent and expectoration considerable.</p> <p>About 5 o'clock this morning I was called to see the Child, Hannah Clark. She gradually sunk, during the night and expired a little before six.</p> <p>Tapper had a Fit this day, but it was less severe, and assumed more of an Hysteric character. <i>Digitalis etc</i> continued.</p>	<p>Died 22nd.</p>
<p>Oct^r. 24th Therm^f.56</p>	<p>Mr Hill is very low and weak; pulse at the wrist nearly gone.— The Child McDonald has less cough and his abdomen is less tumid, but he is very much emaciated. treatment according to the Symptoms which present themselves.</p> <p>Today I discovered several of the Females were tainted with Scorbutus. Had a fire lighted in the Stoves in the Prisons; Made</p>	

		the best arrangements I could with respect to their diet and put them on a Course of Lemon Juice and nitre proportioned to the several degrees of affection.	
	Oct ^r . 25 th Therm ^r . 62	I must state however that it is in the Hospital that the Thermometer is 62. on Deck it is not more than 46. – Mrs Hill can only be said to be alive; a number of other cases of Scurvy have come forward; and “the number that I have altogether to attend” to “is distressing”. “ The scene of Sickness I have to pass through from morning till near or past midnight, is as much as I am able to bear up against; and in endeavouring to do justice to them (the Sick) am totally unable to attend to some of the other Duties required of me. The Medical Journal I have not been able to keep up during the last fourteen days. But I endeavour to the best of my abilities and Power, to dispose of my time to the best advantage, in conducting the duties of the trust conferred on me”. The above is an Extract from my Journal for the Navy Board, and when I state that I often had to write it after midnight, and had to be in the Prison to see the Sick again at 6 Ocl ^k in the morning. I trust no further apology will be required for the deficiency of this part of my Journal. I can only add that no man was ever more anxious to do well; but I could not do everything. This evening about 9 Ocl ^k Mrs Hill expired.	Died 25 th .
	PB10111.JPG	Between the 25 th of October and the 8 th of November many Scorbutic Complaints attended with various Symptoms applied, some with Scrophulous Tumors , as Eliz th . Wimbridge who had a large one on her neck. Some with oppression at the precordia, Dyspnea, purging; great debility; Faintness or frequent giddiness and tendency to Syncope, but all had spongy Gums, sometimes bleeding. Redness of the Alæ Nasi. Lividness of the lips and nails. – The Lemjuice and nitre, had the most excellent effects in every case; sometimes removing all the bad Symptoms in a few days; I generally commenced with $\frac{3}{4}$ of an ounce of Lemon Juice, a Scruple of Nitre, in a sufficient quantity of water sweetened with a little Sugar, thrice a day; and it was in only a few cases that , that quantity was not sufficient.- The Child McDonald is very weak, a Tumor has appeared in the perineum but whether a Hernia , or pus from an Internal Abscess I cannot make out; it easily disappears on pressure but returns immediately. Independent of that however, there can be no hope of his recovery.	
	Nov ^r . 9 th Lat ^{de} 43.10 Long ^{de} 119.10 East Therm ^r . 61 Mary Tapper	Fine Westerly Breezes, and Temperate Weather. The Scorbutic Persons are all getting well, the Lemonjuice and Nitre being continued with most of them. Is much better today. Her appetite is good, bowels regular. Pulse 76. and She has a freshness of appearance that she has not had for some time. She has been able to come on Deck for some time this forenoon. – Medicines are given her according to particular Symptoms. Nitric Lemonjuice, and nourishing diet are always	

<p>Ann Leake</p> <p>E. Wimbridge</p> <p>Wm. McDonald</p>	<p>attended to.</p> <p>Was this day discharged.</p> <p>Still continues to improve. the Scrophulous swelling on the left side of her neck is much larger, but it has no appearance of an approach to Suppuration. This evening she complained of a pain in her Stomach. Bowels are open; <i>Habeat T^r. Asafetida g^{ma}. .xx in paucilo Aqua.</i></p> <p>Is nearly as yesterday. Tumor of the perineum has not increased. Bowels free without purging. Takes water freely. He appears however more low, his hands are cold.</p>	<p>Discharged Nov^r. 9th</p>
<p>Nov^r. 10th Long^{de} 130.56 Lat^{de} 43.21 Therm^r. 56 on deck</p>	<p>Since last Report the weather has continued much finer, and there have been very few entered on the Sicklist , and those cases were slight.- Scurvy has almost disappeared; The different cases on the List before; are all improving. Many of them discharged; and the Child McDonald, and his Sister are the only bad cases remaining, the Sister takes an occasional laxative; and Camphorated Embrocations to the abdomen are used. The Boy cannot live long.</p>	
<p>Nov^r. 13th Therm^r. 56 on deck</p>	<p>Fine weather. During the night the abscess in the perineum of the Child McDonald opened and discharged a considerable quantity of pus, and shortly afterwards He expired. All the othr Sick are much better and few on the List.</p>	<p>Died 13th</p>
	<p>The Sick continued improving till we arrived i Hobart Town on the 23rd. of November when there was none sick except Letitia Pickers and the young girl McDonald, the first in a Convalescent state. The Child went with her mother on shore in Hobart Town, in a very weak state of health, Tumid abdomen and atrophia.- From Hobart Town to Sidney we had very fine weather, and not one Individual was landed sick., when they went to Paramatta on the 23rd December.</p> <p>The latter part of this Journal I have been obliged to Copy from my other Journal, as I have already stated, as it was impossible for me to keep it up at the time without sacrificing more urgent affairs.- a reference to my other Journal however, will convince, I hope, that I was not an idler.</p> <p>At first I intened this Journal only as a rough Copy, and proposed to myself to write it out a Fair Copy on the passage Home, but on my arrival at the Isle of France and Cape of Good Hope, I had to take Charge of no less than three different parties of Troops, Naval and Army Invalids, and to keep three sets of accounts. and consequently was obliged to give up my former Idea although I had made considerable progress in it. –</p> <p style="text-align: right;">Charles Cameron</p>	

GENERAL REMARKS

The Patient who died of Phrinitis, and also that who died of Enteritis were both Infants, and in each case I was thwarted completely in my wishes respecting their treatment by the over Tenderness and foolishness of their mothers.

During the latter period of this Journal, I had so many Cases of Scurvy, and other Complaints to attend to, besides my other Duties, that it was out of my power to give any particular statement of their Cases. I am however happy to say that all of them rapidly recovered under the use of Lemonjuice and Nitrate of Potass: and with the exception of one Child all were sent on shore in good Health at the end of the voyage. Two of those who died of Consumption were Free Pesons, and though both were weak when they came on Board, and evidently consumptive, I did not consider myself authorized to object to their going out.
