Fletcher		<p><i>Rep. Mistura</i></p>	
Loyd		<p><i>Rep. Mist.</i></p>	

McLeod		<i>Ulcus in pedem. Applic. Catapl.</i>
	None	<hr/> Die 25 <hr/>
Fletcher		<i>Rep. Mist</i>
		<hr/> Die 27^{mo} <hr/>
Margaret Roads		Note. All complaints are absorbed by sea sickness, which prevails to a large extent over the prisoners.
Fletcher		The only complaint is dizziness in the head, & debility: bowels torpid.
	P.M.	<i>Rep. pil Rhei.</i> bowels torpid – appetite variable, dull pain on pressing the Liver, and constant uneasiness in the forehead; tongue moist & white, pulse 90 soft; motions are dark. <i>Empl. Lyttæ. hypochondris imp^m</i> <i>Rx. Submur. Hydr. g^rij Opii</i> <i>g^r½ Ant. tart. g^r¼ Mucilag. q.s.</i> <i>fiat pil. Mercurialis. h.s.s.</i>
		<hr/> Die 28 <hr/>
Fletcher		Less uneasiness in the hypochondrium. <i>Rep. pil. bis. die</i>
Keziah Hulley æt 50		A severe contusion of the great toe, by an accidental blow. <i>Applic: Cataplasma cum Aceto.</i>
		<hr/> Die 29^{no} <hr/>
Fletcher		Gums sore – much uneasiness about the course of the colon, recurring at intervals: no pain in the hypochondrium, debility – appetite but little – nausea, pulse 94 soft; skin cool; tongue brown. <i>Rx. Inf: sennæ. ℥ij. pulv. Rhei ʒj</i> <i>Sulph. Magnes. ʒj. Ol. Ment. pip. g^{tt}j. ℞ f^t haust. s.s.</i> <i>Rep. pil. h.s. hora post</i>
PA310962JPG near Madeira		<hr/> Die Luna 14 Januarii 1822 <hr/>
Fletcher		Since the 30 th of December she has been convalescent, and daily on deck; but still much debilitated. She now complains of a nausea, uneasiness in the forehead & defective appetite. <i>Rx. pulv. Ipecac ʒj. s.s.</i>
C. Wilson		Has much nausea; tongue furred. <i>Hab^t Emeticum s.</i>
Smith		Dull in her countenance, melancholy in her manner, & irascible, pulse regular, but weak – appetite very weak, & bowels torpid. <i>Rep. Inf. Anthemid cum. acid. N. Oil</i> <i>g^{tt}x. ter die s.</i>
Mrs Lake	f.w.	She has suffered violently from sea sickness; and fears for the safety of the Ship have very much saddened her mind: her debility is very great. Wine, cordial & fresh diet are given her. <i>Rx. Inf. Quassia. ℥ij. acid</i> <i>Nit. dilute. g^{tt}x ℞ ter die s.</i>
		<hr/> Die 15^{mo} <hr/>
Sharman		Has head-ach, lassitude uneasiness in the stomach, with various other symptoms; the consequences of a change of climate operating on the various systems in the body. <i>V.S. ad ʒx vj</i>

Easterbrook		<p><i>Rx. Inf. Sennæ ℥ijj Sulph. Sodæ ʒiv</i> <i>Ol. M. P. g^{tt}j ℥ fiat haustus s.s.</i></p> <p>Queritus ut supra.</p> <p><i>Habeat eadem remedia</i></p>
Davis		<p>Much pain in the tumour of the left side; head-ach, & dyspnea</p> <p><i>V.S. ad ℥xviij.</i></p> <p><i>Rx. Haustus è Senna st. s.</i></p>
Fletcher		<p>Seems only to have a debility of the stomach, & system at large.</p> <p><i>Rx. Inf. Quassiae cum. Acid. Nit.</i> <i>Oil. g^{tt}x ter die. s.</i></p>
Walton æt 18		<p>When in Gaol, Smith gave her a severe blow in the right iliac region, causing a pain which she often feels rather severe, this happened 2 or 3 months ago: her menses have since then been irregular, & did not appear lately, as they ought to have. She now has Epistaxis, pulse regular.</p> <p><i>V.S. ad ℥xxiv</i> <i>Rx. pil. Jalap. iv. s.s.</i></p>
Smith	P.M.	<p>Great depression of mind, irritability of the stomach, especially excited by any medicines, pulse small, weak, skin cool; tongue clear & moist, bowels torpid; she sleeps naturally:</p> <p><i>Imponator Empl. Lyttæ. parv.</i> <i>ad Epigastrium.</i></p>
Fletcher		<p>Has some pain in the forehead.</p> <p><i>Rep. pil. Rhei. N^o iij. s.s.</i></p>
Die 16^{mo}		
Smith		<p>More lively in spirits than usual, her diet is nutritive and varied by her wish: diluted wine is given her now & then.</p>
Campbell æt 30		<p>Head-ach, pain in the epigastrium, loss of appetite, & strength.</p> <p><i>V.S. ad ℥xij. Rx. Haust. è Senna. s.s.</i></p>
Webster æt 24		<p>Has much pain in the head, apparent debility, loss of appetite &c.</p> <p><i>V.S. ad ℥xx. Rx. pil. Jalap. iij s.s.</i></p>
Gray æt 19		<p>Head-ach &c as above.</p> <p><i>Habeat remedia ut supra.</i></p>
Pendard		<p>Much nausea with frequent pain in the head, tongue furred.</p> <p><i>Rx. pulv. Ipecac. ʒj. Ant. tart. g^{ij}</i> <i>℥ pro emetic statim sumendæ.</i></p>
Fletcher		<p>Some nausea; dull pain in the right hypochondrium, & forehead.</p> <p><i>Habeat haustus è Senna.</i></p>
	6 P.M.	<p>Increased pain in the hypochondrium, bowels open; pulse 80, soft, tongue moist, skin cool, appetite moderate. <i>Empl. Lyttæ. hypochondriæ Imponendum.</i></p> <p><i>Rx. pil. Hydrargyri g^x pulv. Rhei g^{vj} ℥ f. Pil. iij statim sum^æ.</i></p>
Fenton æt 30		<p>Subject to inflammation of the bowels & urinary calculi, with constipation, complains of tenderness of the umbilical region, & distension of the belly; nausea, & vomiting, thirst, pulse regular, skin cool; menses are present.</p> <p><i>Rx. Ol Ricini. ℥j in Aq. M. P. s.</i></p>
	9 P.M.	<p>Increased tenderness & swelling of the belly; acute pricking pain over the internal surface of the belly, & twisting of the bowels; occasionally slight rigors are felt in the back.</p>

<p>PA310963JPG</p> <p>midnight</p>	<p>The bowels have been these times moved by the oil: pulse small & firm, 100. <i>V.S. ad 340. (Synscope commenced).</i> <i>Rx. Hydr: Submur: g^r iv. Mucilaginis q.s. f^r pil. s.s.</i> A return of the pricking, burning pain, pulse small & firm: skin not hot, much twisting of the bowels. <i>V.S. ad 3xxvj: (pulse sank).</i> <i>Imponator Empl. Lyttæ. mag^m Circum Umbilicum.</i> <i>Rx. Tinct: Opii. g^{tt}xxx s.s.</i></p>	
<p>Smith</p>	<p style="text-align: center;">Die 17^{mo}</p> <p>Stomach is more irritable than before, as soon as any kind of Medicine is swallowed; a dull pain is felt at the Epigastrium. The blister has scarcely acted: the pulse is small, & soft; tongue clear:- the treatment is dietetic. <i>Rep. Empl. Lyttæ.</i></p>	
<p>Fletcher Hulley</p>	<p><i>Rep. pil Hydr.</i> A considerable slough is coming away from the contusion of the toes, & the phalanges of the 2nd joint grate on each other. <i>Rx. Cinchon ʒj. Vin. Rubri. ʒj. ʒj. ʒj.</i> <i>f^r haust. ter die s.</i> <i>Rep. Cataplasma ter die.</i></p>	
<p>Campbell's Child æt 2½</p>	<p>Ophthalmia <i>Rx. pulv. Rhei g^rx. Hyd. Sub. g^rij ʒj. s.s. Empl^o Lyttæ temporibus Imponenda. Adhibeatur Liquor plumbi subacet. dilutum.</i></p>	
<p>Fenton</p>	<p>Passed an easy night, being only now & then disturbed by vomiting; thirst is present: bowels free. <i>Bibat acgra. Decoct. Hordie p.r.n.</i></p>	
<p>Burton</p>	<p>Head-ach, nausea, confined bowels, & loss of appetite. <i>V.S. ad 3xvj.</i> <i>Rx. Haustus è Senna s.s.</i></p>

Sharman Fletcher		<i>ut emeticus</i> As before: <i>Rep. pil. Rhei.</i>
Smith		Wastes daily; stomach & temper equally capricious & irritable, pulse regular, & small. <i>Rx. Inf. Quassia. ʒjfs. Tinct. Lav. C. g^{tt}xx</i> <i>M fiat haustus 3 vel 4: in die s.</i> Diet sago, wine. Preserved Meats.
		<hr/> Die 24^{to} <hr/>
McCarthy		Pain in the head, lassitude, debility, loss of appetite; thirst; torpid bowels; quick pulse. <i>V.S. ad ʒxij. Rx. Haust. purgans. è Senna statim s.</i>
Fenton		Is troubled with calculi; but refuses to take medicines, other than what she pleases. <i>Rep. Haust. purgans.</i>
Fletcher Smith		<i>Rep. Haust. purgans.</i> A serious disturbed state of the stomach exists – the mildest food, and most simple medicines are vomited up, some after they have been swallowed. A quantity of a dark green fluid is now vomited at intervals, a smarting or burning pain is now constantly felt at the scrobiculis cordis, and is increased by pressure; the bowels are now relaxed, and the stools are thin, pulse 120 small, & weak: thirst – tongue clear. The last blister scarcely inflamed the skin. Her mind is very irritable, & revengeful. <i>Rep. Inf. Quassia</i> <i>Habeat Vinum cum Aromatibus</i>
PA310965JPG Williams æt 26		Severe pain in the head from exposure to the sun's rays. <i>V.S. ad ʒxx. Rx. pil. Jalap. iv. s.s.</i>
Smith	6 P.M.	In the afternoon she got out of bed to examine her bag of clothes, when, missing some things, she entered into a violent fit of anger which, by exhausting her powers, nearly deprived her of life. After an hour, the pulse, previously imperceptible, gradually rose, and her senses returned, frictions & volatiles having been employed. She now lies in a very languid state, & frequently vomits abundantly of an inky or dark green water, having a sediment. <i>Rx. Tinct. Lavand. C. Tinct</i>
	9 P.M.	<i>Opii è g^{tt}xxv. ʒ. s.s.</i>
Mary Loyd æt 22		A few days ago she scalded her arm; it was cured by suppuration. During the day she has been indisposed generally, with an uneasiness in the abdomen. She now complains of severe acute pain around the umbilicus, with much tenderness on pressure; head-ach; thirst; bowels regular. <i>V.S. ad ʒxxvj.</i> <i>Rx. Hydr. Submur: g' vj. pulv: Antim. g'ijj.</i>

		<p><i>Opii g^{ss} ifs Mucilag: q.s. M fiant pil. tres. s.s.</i></p> <p>The pain remitted by the blood-letting, but has now returned with violence: pulse 110, small & firm. <i>V.S. ad ℥xxx. Empl. 		<hr/> <p>Die 25^{mo}</p> <hr/>	
Loyd	5 A.M.	<p>There is still much pain, tenderness & distension of the belly, but considerably less than before: pulse small & tense.</p> <p><i>V.S. ad ℥x. Rep. Ol. Ricini sine Opio</i></p>	
Smith		<p>She has had some sleep; pulse stronger than it was: she has vomited a blackish fluid twice; the bowels have been moved; the stools are feculent & watery; tongue brown & moist: constant burning pain in the epigastrium.</p> <p><i>Empl. Lyttæ parvus epigastrio</i></p> <p><i>Habeat acgra vinum. saepe; et Cerevisæ</i></p>	
Fenton		<p>Has been troubled with cordiolgia, nausea, & vomiting: tongue furred.</p> <p><i>Habeat Emeticum</i></p> <p><i>Rx. Inf. Quassia ℥ij. ter die s.</i></p>	
Fletcher		<p>Appears to suffer from the heat, & is often troubled with fits of Hysteria.</p>	
	8 P.M.	<p>Complains of much pain in the Hypogastric & Umbilical regions which are tender on pressure, and the belly is much distended. The bowels are torpid; she has not had a motion for two days and has not passed any urine since the 23^d or 72 hours: she concealed her state from motives of delicacy, and a fear of taking medicine. The pulse is 100, small, soft: thirst, strong desire to pass her urine, with total inability: tongue clear, moist – she refuses both the administering of all Enema, & the introducing of a Catheter.</p> <p><i>Rx. Ol. Ricini. ℥vj. Tinct. Opii g^{ss}xxv.</i></p> <p><i>Aq. M. P. ℥ifs. ℞^{ss} haust s.s.</i></p> <p><i>fovetur abdomen aqua calida.</i></p>	
	10 P.M.	<p>Symptoms increasing: no motion.</p> <p><i>Rx. Ol. Ricini. ℥j. s.s.</i></p>	
Smith		<p>Hiccup has commenced, with a frequent vomiting of black fluid; tongue brown, & dry; frequent small liquid bilicus stools: the blister has only slightly vesicated the skin; pulse 130 small, weak.</p> <p>The saline draught with cordials & opiates, given effervescing, will not remain many minutes in the stomach, but Bottled porter does, & it has a sedative power over the patient.</p>	
		<hr/> <p>Die 26^{mo}</p> <hr/>	
PA310966JPG Fletcher	5 A.M.	<p>Symptoms greatly augmented, the whole belly, from the pubes to the sternum, is now greatly swoln, & tender, pulse soft, but very quick; much thirst & great restlessness. She now consented to have an Enema, and to permit the introduction of a Catheter. The belly has been assiduously fomented, no stool has been passed; pulse 120.</p> <p><i>V.S. ad ℥ij.</i> The pulse gradually increased in frequency and</p>	

		diminished in force & diameter as the blood issued from the arm; & the vein was therefore closed: the patient then fell into syncope. About 2 pints of urine of a high colour were drawn off. <i>Rx. Sulph. magnes. ℥ij. pulv.</i> <i>Rhei g'xxv. Inf. Senna ℥ijj ℥ f' haust. s.s.</i> <i>Injiciatur Enema Communis purgans statim.</i>	
	9 A.M.	She was relieved greatly by the discharge of urine; she is now generally better; she has passed one copious feculent stool: the pulse 120, small & soft. <i>Repetatur fatus. ad Abdomen</i> <i>Rx. Inf. Quassia. ℥ij. pulv. cinch. g'x –</i> <i>Rhei g'xij. Tinct. Lav. C. g'tt'xx ℥ fiat haust. ter die s.</i>	
Smith		The only change is a greater degree of fullness of the pulse: the senses are very clear. Beer is her favourite drink, & the only medicine of any service to her.	
Fenton		Is debilitated; and capricious. <i>Rx. Inf. Quassia cum acid.</i> <i>Sulph. dil. g'tt'x ter die s.</i>	
Fletcher	3 P.M.	Has passed one stool, & also urine, in a small quantity: acute pain is occasionally felt in the belly, & much tenderness is felt below & about the umbilicus, on pressure. The belly is still swollen: pulse 118 small & weak. <i>Omitt' fatus – Imponator Empl. Lyttæ</i> <i>magnum. infra. umbilicum.</i> <i>Rep. Enema purgans.</i>	
Davis		Complains of acute pain in the side; tongue dry, & system a little feverish, bowels confined.	
Fletcher	9 P.M.	Some abdominal uneasiness and confined bowels. <i>Rx. Ol. Ricini. ℥ij.s.</i>	
Smith		She now makes preparation to meet her fate in another world: the mind is very clear, but her temper irascible & vindictive: the pulse increases in frequency, but diminishes in force. The stools at times pass involuntary, are very offensive, black, & watery: vomiting less frequent.	
		Die 27	
Smith		Pulse scarcely perceptible, and she often appears to be articulo mortis ^[at the point of death] .	
Fletcher		Much better; much less swelling of the belly; has passed these motions in the night; pulse 108, fuller than before. <i>Rx. Inf. Quass. ℥ijfs Sulph. magnes. ℔j.</i> <i>pulv. cinchon. g'v. ℥ fiat haustus. ter die s.s.</i>	
Fenton		No stool, much griping, and uneasiness in the belly. <i>Rx. pulv. Rhei. g'x Hyd. Submur</i> <i>g'iv. mucilaginis. q.s. fiat bolus. s.s.</i>	
Mrs Leake	Noon f.w.	This woman is labouring under great debility and depression of spirits, the consequence of sea sickness and imaginary fears: her bowels are very torpid, & she has not had a motion for above a week; she now feels great uneasiness in the belly. She has long been on the Hospital diet: pulse small. <i>Rx. pil. purgantes. iij. s.s.</i>	
Smith		No pulse can be felt at the wrist; the hands & feet all cold, & purple in colour. She now & then is raised on her pillow to drink porter; when she still gives vent to her irritable temper.	
PA310967JPG Mary Walton æt 17		This girl is affected with amenorrhœa. Two periods having	

		<p>passed without the return of the menses. Three or four months ago she received a severe blow in the right iliac region, from Smith (the woman is now dying), and since then she has been much troubled with pains in the belly, & ailment. At various periods during the last fortnight she was attacked with discharges of blood from the stomach, and nostrils. Bloodletting, purging &c. only suspended the haemorrhage for 2 or 3 days. Last night I gave her <i>Ol. Terebinth. ℥j. pro se</i>. She vomited it after a few minutes. Today she took only <i>℥ij</i> combined with mucilage, but this was vomited.</p> <p><i>V.S. ad ℥xxiv. Rep. Haust. Ol. Tereb. h.s.</i></p>	
Lake	4 P.M.	<p>Violent abdominal pain; no stool has been passed: belly hard, & distended.</p> <p><i>Rx. Inf Sennæ Hj. Sulph. Sodæ</i> <i>℥vj. Ol[ivæ] Comm. ℥ij. ℞^f Enema s. injicienda</i> <i>Rx. Ol. Ricini ℥ Aq. puræ ℥ij ℞ s.s.</i></p>	
Percival		<p>Much pain in the head, and languor.</p> <p><i>V.S. ad ℥xx.</i></p>	
Smith Lake	8 P.M.	<p><u>Obiit</u> Has, after manual labour, passed a very indurated motion, and this has been followed by others, with great relief to her.</p> <p><i>Rx. Ext. Colocynth. C. g'xv. f^o pil. iij. h.s.s. ℥j</i></p>	[27 January 1822]
Fletcher		<p>Belly is tumid, painful, & tender to the touch, especially about the Hypogastrium, she has not passed any urine since yesterday: no stool today: pulse 110, small, soft, tongue moist: in the morning she ate a little food.</p> <p><i>Rx. Fenton PA310971JPG Walton	<p>There seems to be a narrowing of some part of the rectum or other of the intestines, as she passes fæces with difficulty; they are generally in small scybalæ: she often feels "a knotting" of the bowels: stomach irritable. Yesterday in the evening she complained of much uneasiness in the belly; the Hypogastric region was considerably swoln, tense, and painful on pressure. A slight discharge of blood by the mouth or nose occurred several times yesterday; the blood was black: as she had not passed any urine for above 24 hours I introduced the catheter, but only drew off about 2 ounces of urine. There seems to be a collection of coagula or blood in either the alimentary canal or Uterus. But as there was much tenderness of the belly a Vesicatory was applied to the part and a Saline purgative given. No change took place till today at noon; she now was seized with a discharge of blood from the nose, & soon afterwards from the stomach; and the passage upwards of some of the blood threw her into a momentary convulsive fit. The pulse begins to fail in force: the bowels are open. I wished to administer an enema of cold water, but she would not permit me. <i>Rx. Sulph. Alum. gʳx. Cinchon. ʒj.</i> <i>Decoct. Walton	<p>A few coagula have been discharged upwards: the bowels have been moved; the belly is not so tense, nor painful.</p> <p><i>Rx. Sulph. magnes. ℥iv. Aq. Pulvæ</i></p> <p><i>℥vj ℥ s.s.</i></p> <p><i>Rep. Haust. è Cinchonæ ter die.</i></p>	
	8 P.M.	<p>Complains of severe pain in the coccis; coldness along the spine, and involuntary shaking of the anus – belly much swoln & hard: pulse regular; no stools have been passed today, nor urine.</p> <p><i>Rx. Ol. Ricii. ℥iv. Tinct. Opii. g^{tt} 30.</i></p> <p><i>Aq. Ment. pip. ℥jfs. ℥ fiat haust. s.s.</i></p> <p><i>foveantur lumbi per horam.</i></p>
Fletcher		<p>Much uneasiness in the head & stomach, from the presence of the food which she has taken during the day, (with an appetite) nor does it seem that she will be easy till the stomach be emptied of its contents.</p> <p><i>Rx. Tinct. Rhei. ℥iv. s.s.</i></p> <hr/> <p style="text-align: center;">Die 8^{vo}</p>
Fletcher		<p>At 4 A.M. she felt much pain in the lower part of the abdomen, & had not taken any rest – as she had passed a small quantity of urine yesterday, I introduced the Catheter and drew off about six ounces of urine, which gave her instant relief: an injection of simply warm aqua manna was also passed into the bowels. She now remains in her usual state; pulse 120 – the unease only continued with her 24 hours.</p> <p><i>Rep. decoct. Cinchonæ.</i></p>
Walton		<p>No pain in the coccis – belly hard & swoln, no stool since yesterday, nor water, but I suspect she deceives me, as she is somewhat simple; & by her statement has not passed more than a few ounces of urine for many days, yet she has never</p>

Fenton	lost her appetite, and takes her dinner daily. <i>Rx. Haust. purgans cum. sennæ s.s.</i> Having been troubled with much uneasiness in the stomach & bowels since yesterday afternoon; & vomited everything she swallowed, I myself injected a purgative enema today, and discovered that a very considerable stricture, or narrowing exists at the extremity of the Rectum with difficulty could the pipe be introduced through the anus. Above this, there did not seem to be any obstacles. I have directed an ivory solid, of a proper figure to be introduced at the anus, by the patient herself, and to be worn daily, for a longer or shorter time according to the state of her feelings.	
Walton	P.M. Has vomited her tea, which appears to have had mixed with it, primarily, some Sulphate of Zinci; for what motive I cannot discover. The patient says that the nurse gave her the tea, - so much mystery hangs over this girl's conduct that I shall stop noticing her statement of complaints; the belly is much swoln.	
Walton Fletcher	<p style="text-align: center;">Die 9^{no}</p> <p>No complaint:-her conduct is explained in the Diary. Much languor; & total want of appetite: pulse 118 – the blistered surface of the abdomen, having ulcerated in some parts is now healing by granulation. The belly is now neither tumid nor swoln: the bowels are open: urine has been passed: the last dose of cinchona offended the stomach. <i>Rx. acid: Nitr^e dil. g^{tt}xv in Cyaths. aquæ, ter die sumendæ.</i></p>	
Fenton	8 P.M. Gums tender – stomach irritable, much general uneasiness; and frequent pains along the course of the colon, bowels not open. <i>Rx. Inf. Sennæ zifs Sulph magn. zj. ℞ s.s.</i> Much increasing uneasiness; frequent spasmodic pains in the intestines, & the stomach irritable; no stool has been passed, pulse regular. <i>Injiciatur Enema purgans. et si cito redeat repetatur sennæ Rx. Hydr. Submur g'v.j. Saponis q.s. ℞ fiat pilula, quam parv^m statim sumenda, et postea capiat acgra pilulam haust omni hora, ad quatuor vicis Rx. Ext. Colocynth. C g'ijj. fiat pilula.</i>	
Fletcher	<p style="text-align: center;">Die 10^{mo}</p> <p>The tumour in the axilla has suppurated: the countenance & general state of the patient are much improved: the pulse continues at 120, & its firmness increases; the excretions are regular: there is some appetite. <i>Rep. acidum.</i></p>	
Fenton	After all the pills had been taken, the bowels were moved, & several free evacuations have been made with general relief to the patient. Both the injections speedily returned; & I apprehend a mechanical obstruction is seated in the colon. <i>Rep. pil. Hydr. g'v. bis die s.</i>

<p>Clarke</p>	<p>No complaint, but that of debility, bowels open.</p>	

Griffin	<i>Rep. Haust. purgans.</i> Better.	
Burtenwood æt 40	<i>Rep. Haust. purgans.</i> Slight febrile irritation, & head-ach. <i>V.S. ad ℥xij.</i> <i>Rx. Pil. purgantes. iij. s.s.</i>	
Die 13^{mo}		
Fletcher	She passed a good night. She has had a discharge of urine; & the bowels are open. Pulse 108, appetite improves. <i>Rep. Haustus.</i>	
Fenton	Pulse regular, skin cool; tongue moist & a little furred; she retains her food. Saline effervescing draughts have been occasionally given since yesterday, & with a good effect; the ptyalism has closed but the gums are sore; she complains of a permanent uneasiness in the belly: the bowels are open.	
PA310974JPG	Her conduct in the Hospital is very disorderly, & her habitual insolence to everybody, rendered her a truly troublesome patient.	
Clarke	Convalescent.	
Burtenwood	<i>Rep. pil. purgantes.</i> Has much nausea, & uneasiness in the head.	
Die 14^{mo}		
Fletcher	Yesterday she left her bed, & sat some time on deck: pulse 106, appetite good. <i>Rep. Haust.</i>	
Fenton	<i>Rx. Inf. Anthemid. ℥jfs. acid nitr. d. g^{tt}x. M fiat haustus ter die s.</i>	
Griffin	Yesterday she abruptly left the Hospital, refusing to be on a low diet – at midnight she complained of severe head-ach, & return of pain in the eye: the bowels being open. Some blood was taken from her arm, & a blister applied to the temple. <i>Rep. Collyrium.</i>	
Burtenwood	Slight febrile state of the system. <i>Rep. Haust. purgans. statim.</i> <i>Rx. pil. Mercur. h.s. omni nocte.</i>	
Die 15		
At Rio Janeiro Griffin	The opposite eye is now inflamed; the left eye is better: the bowels are open, pulse regular. <i>Rep. Collyrium</i> <i>Rx. Hydr. Submur g^{ij}. h.s.s.</i>	
Fletcher	The pulse is still above 10 – her appetite is vigorous; bowels are open; she has passed urine. Her system is agitated, by Fenton having ill used her. <i>Rep. Cinchon.</i>	
Fenton	Pulse regular, skin moist, tongue a little brown in the middle; appetite moderate – having solicited Rice it has been allowed her: she has natural motion: yesterday she had a tenesmus, & passed some mucus. She vomits rarely, & only throws up a little water & mucus, mixed with Bile. Her temper becomes daily more turbulent: she now uttered many angry, insolent words because a fresh patient was placed in the Hospital, near her bed.	
Burtenwood	<i>Rep. Haust. ter die.</i> No change: pulse 100.	

Clarke	<p><i>Rep. Haust. purgans. statim. et meridie</i> <i>Rep. pil. Hyd. h.s.</i></p> <p>Yesterday she ran away from the Hospital whilst the nurse was absent, and went on deck to see the City, &c. exposing her head to the sun; in the evening she complained of a return of pain in the head – the embrocation was relieved, and the pills were repeated. Today she is better.</p> <p><i>Rx. Haust. purgans. s.</i> <i>Rep. Embrocatio</i></p>	
Fletcher	<p style="text-align: center;">Die Saturne 16^{mo}</p> <p>No particular change, but she has been much agitated by the Patient Fenton having abused her.</p> <p><i>Rep.</i></p> <p>P.M. Great distension of the abdomen; she has not passed urine for 36 hours; hypogastrium very tender: frequent vomiting of acrid, saline fluid: pulse 120 owing to the reproaches Fenton has made on this patient. She will not allow me to pass the Catheter- bowels confined.</p>	
Fenton	<p><i>Rx. Ext. Colocynth. C. g'xij. f' pil. iij statim.</i></p> <p>Continual uproar in the Hospital from the turbulent conduct of this patient: yesterday she took her bed & left the Hospital, into which she was carried back by force. She does not seem to have anything important of illness: the stomach is now & then irritable, but she has an appetite, & passes regular motions: it is impossible to have any conversation with her, as she uses violent language, & refuses to take her medicine.</p>

Mary Walton	This is a girl of great wickedness & this has been before intimated. Some weeks ago she scalded her breast & belly; the curative process was very irregular, but was at last completed. After a few days she was again scalded in the same parts & these would not heal, but vesicated & began to ulcerate. Today I was suddenly called to her, she said she was very ill: she cried; the pulse was quiet, the skin cool, but the tongue very white; it seemed as if chalk had been applied to its surface; examining her hands to see if they were white, I saw her fingers stained by Argentinum Nitricum. After many enquiries & threats, she confessed she had applied the caustic to her tongue, & had swallowed the remainder, (a juice of about ʒj.) four hours, or more, ago. She had no reason to justify her conduct.	
PA310979JPG	<i>Rx. Sulphat. Cupri. g'vij. Aq. puræ ʒij. solve, pro emetico s.s.</i> Some flaky mucus, combined with dissolved caustic were vomited, & these decomposed Muriate of Soda in solution. <i>Rx. Ol. Ricini ʒfs. s.s.</i> <i>Bibat acgra Decoct. Lini. edulcoranti cyathium saepe in die</i> A careful examination of the now extensively denuded & partly ulcerated surface of the thorax & abdomen; and examination of the Cataplasma, shewed to my amazement, minute portions or particles of Emplastrum Lyttæ, which she had applied to prevent the scalded surface from healing: & she now confessed that she wilfully scalded herself. <hr/> Die 22	

A. Rumsby	Acute pain in the hepatic region & in the head; pulse quick; thirst. <i>V.S. ad ℥xvj.</i> <i>Empl. Lytta. parti dolenti s. applic.</i> <i>Rx. Mist: Salini ℥ij.</i> <i>Sulph. magnes. ℞. ℞ fiat haustus. 4 in die s.</i>	
Walton	She complains of a pricking along the throat, & in the abdomen & the pulse is 120, soft: she eats, & her bowels are open. <i>Rep. Decoct: Lini.</i>

Owen's Child	<i>Quidam externa habentes, pergantor in usu remedierum</i> <hr/> Die 18^{mo}	

E.McCarthy	Slight febrile indisposition last night the bowels were opened by a purgative.	
Slater	<p><i>Rx. pulv Ipecac ʒj. s. pro vomitorio.</i> <i>Rx. Sulph. agnes. ʒij. Aq. Puræ ʒij. ʒ s.s.</i> <i>Rx. Inf Quassia. ʒjfs. Znzb gʷ. ʒ f haust ter die.</i></p>	
Mier's Child [Miares]	Has an inflammation in the ear, & occasional discharges of pus.	
McCarthy	<p>P.M. <i>Imponator Empl. Lyttæ pone aurem.</i> Some pain in the forehead and epigastric region; pulse quick; safe; slight dyspnœa; tonguewhite. <i>V.S. ad ʒxvj.</i> <i>Rx. Mist. Salin. ʒjfs Nitr. Potassæ gʷ ʒ f haust. 6^{to} q.h.s.</i></p>	
McCarthy	<p style="text-align: center;">Die 19^{mo}</p> No alteration except in the pulse, which is less frequent. <i>Imponator Empl. Lyttæ ad epigastrium.</i> <i>Rep. Haust.</i>	
Mary Beldon	This woman has for many months been in an infirm state of health, having obscure internal disease, which she attributes to the presence of a pin which she accidentally swallowed. A tumour deeply seated seems to have formed near the spleen - a small fluctuous tumour exists in the inferior part of the sternum; and one in the left orbit.	
Hulley	This woman labours under insanity & admits only of moral management.	
McCarthy	<p style="text-align: center;">Die 20^{mo}</p> Much better. <i>Rep. Haust.</i>	
PA310983JPG McCarthy	<p style="text-align: center;">Die 21^{mo} Aprilis</p> The catarrhal symptoms have not quite ceased. <i>Rep. Haust. Saliin. bis die</i> <i>Rx. Sulph. magnes. ʒj. s.s.</i>	
Beldon	<p>For several weeks there has been forming under the integuments of the forehead a smooth undulating tumour, not attended and redness, & seeming to cause pain by the distension of the parts. The swelling commenced above the left eyebrow, & it has slowly extended to the opposite one, and down to the eyelid of the left side, here the fluid gravitating has closed the eye, & by the pressure has caused for itself an opening by ulcerating the eyelid; & an adhesive fluid is poured out. As a dull pain is felt at the bottom of the left orbit, I fancy that a tumour exists there. From the appearance of the ulcerated orifice, the edges being everted that this & the other tumour are of a constitutional & perhaps malignant nature. Her functions; vital & natural, are not disturbed.</p> <p><i>Rx. Sulph. Zinci: ʒj. Aq. Puræ</i> <i>Hfs. ʒ f Lotio. pro parti affecta.</i></p>	
J. Jarvis æt 40	<p>Fresh diet has been long given to her. Having had a slight dysenteric state of the bowels, a few pills of <i>Submur: Hydr.</i> were given, which removed the complaint: but caused a Ulceration of the mouth & debility. <i>Habeat Mist. Cinchon. C. Vino. ter die s.</i> Fresh diet has been given.</p>	

<p>McCarthy Campbell's Children</p>	<p style="text-align: center;">Die 25</p> <p>No complaint. This woman has three children of very unhealthy constitutions: all seem scrophulous, & Ulcerations, Ophthalmia or some local complaint is frequently appearing among them. They are all taking Cinchona, wine, & using fresh diet.</p>	
<p>A. Moreton æt 10</p>	<p style="text-align: center;">Die 28</p> <p>This boy has had an abscess form over the tibia; he now is troubled with a simple diarrhœa, the effects of the late wet state of the Ship.</p>	
<p>Hulley</p> <p>[stamped PUBLIC RECORDS OFFICE]</p>	<p><i>Rx. Mist. Cretæ. ℥ijfs Conf. Arom. g'x Tinct. Opii. g^{tt}v. ℞ f^l haust bis die.</i></p> <p>She is irrational & extravagant of uncertain periods; she is now affected with a Diarrhœa, which, with a prolapsus uteri et vagina (of long standing), have greatly reduced her strength, & confined her to bed.</p>	
<p>Godbold) Clarke) C. Quin) Kay)</p>	<p><i>Habeat Mist. Creta. ut Supra ter vel quater in die.</i></p> <p>These persons have ulcers & wounds of little import, being the effect of local injuries, except Quin, who [has] an ulcer on the leg, in consequence of varicose veins & vitiated advanced years. A slough of some bulk will eventually be thrown off.</p>	
<p>Jarvis</p>	<p style="text-align: center;">Die 29</p> <p>A scorbutic affection of the gums.</p>	
<p>Mrs McLeod f.p.</p>	<p><i>Rx. Sulph. Alum. g'x Cinchon: pulv. ʒj. Aq. Puræ Hfs M f^l Gargar. sæpe utendum.</i></p> <p>Slight head [-ache], pains in the limbs, confined bowels, & much agitation of the mind from bad behaviour.</p>	
<p>Champion convict</p>	<p><i>Rx. pil. purgantes è Jalapa. iij s.s.</i></p> <p>A woman of great sensibility, very timid, easily agitated & very susceptible to anxiety of mind, & subject to Dyspepsia & Hysteria, is now seized with spasms in the alimentary canal; the pains are agonizing, varying their seat, & greatly relieved by pressure: pulse weak.</p>	
<p>PA310984JPG Van Diemen's Land</p>	<p style="text-align: center;">Die 4^{ta} Maii</p>	
<p>Beldon) Hulley)</p>	<p>These women being in an infirm state of health, and advancing daily in debility. I have landed them at this place. The derangement of mind in the one case continued before; and in the other case the internal tumour causes an increasing uneasiness. <small>[Mary Beldon died on 21 March 1823 and Keziah Hulley on 11 June 1822].</small></p>	
<p>Quin</p>	<p>A sloughing, constitutional, but mild ulcer on the leg.</p>	
<p>Campbell's Child at sea</p>	<p><i>Applicetur Cataplasma Calidum bis die.</i></p> <p>This child is of a very weak constitution: scrophulous abscesses frequently form in the inguina.</p>

GENERAL REMARKS

The summary above shows, that few acute diseases occurred, and that nearly half of the whole number of patients who were put on the List, consisted of cases of Cephalalgia, under which term I included all those cases of disturbed economy of the Cerebral ^[Cranial: appears above] organs, arising from plethora of the blood vessels and their increased action by the stimulus of head. The stomach participated in the affection of the brain, and hence many symptoms necessarily arose, indicating the deranged state of the circle of living actions. But as the course of their aberrations consisted only of a simple vis-a-tergo on the fluids circulating for the use of the various organs of the body, harmony was easily restored by depletion of the vessels.

I observed many complicated ailments arising among the women and was often perplexed in endeavouring to give them a name, and more so, in devising a rational principle of cure. Oftentimes I have been alarmed by symptoms which seemed to denote sudden danger to life: and they were not simple fits of Hysteria, but commotions in the nervous system originating in a reciprocal action, as it seemed, of the Uterine system and mind, from ideal or mechanical causes. I found very few females menstruate regularly; and learned that the uterine secretion generally ceases whilst the female convicts be in Newgate, and in other jails, hence from the suppression of this periodical secretion arise many disturbances in the female system. Another cause of disturbances is obstipatio, on some occasions I have had between one and two dozen women in one day complaining of this ailment; and, on investigating the case, I have been surprised by discovery that no evacuations, per rectum, had been made for the space of two weeks! In all such cases, reason dictated the use of excellent enemata, but the genuine delicacy of the English female forbade their use, and only in two instances could I persuade, those degraded women to submit to their employment.

Here I found myself frequently disappointed in my attempts to remove the local congestions, owing to the want of a larger quantity of medicines which act principally on the Rectum, such as aloes, Conf. Sennæ, Gambogia, & Scammonial pulvis; the latter would be very beneficial to such children as might be ill è verminous.

I need hardly remark that all such patients as I have just spoken of, were not put on the Sick List; the applicants for purgative pills were frequently so numerous as to interfere sometimes with important duties. But the exhibition of the remedy was always followed by demands for water gruel.

The case of death that occurred was one that might have been expected so to terminate; as the woman had not Menstruated for several years, and had long laboured under chronic visceral diseases. The immediate cause of death seemed to be a cancerous affection of the Stomach; many [*chasm*s] prevented an examination of the body.

The next serious case in the Journal is one of Pleuritis which had nothing worthy of notice in itself, but it induced a train of nervous symptoms, which the patient (**Sarah Fletcher**) artfully employed, and made subservient, to her lustful and wicked designs. I would not here mention one of her arts, did I not hope that the perusal of it may put such of my brother officers as may be placed in charge of female convicts on their guard, and thereby prevent an imposition being practised on them, and defeat an artful attempt on their professional and moral character:- this young woman was able at any time to excite various symptoms of Hysteria, and greatly accelerate the pulse; and oftentimes she feigned a retention of urine, with all the attendant symptoms, in order, especially in the middle of the night, that I might be urged to introduce the Catheter! To this instance of profligacy may be added that of the attempt to poison herself, made by **Walton**, and a protracted illness which followed an attack of Enteritis in **Fenton**; all three were punished as soon as their impostures were discovered, and thus they were radically cured.

On the whole, I must observe that the women and children enjoyed a high state of health during the voyage, owing to a rigid system of cleanliness and good discipline having been maintained. I must also remark that neither in this; or in my former voyage, nor indeed at any period since I have been in His Majesty's Service, have I used the "Articles of Immigration", which, I verily believe to be totally unnecessary. A free circulation of pure atmosphere, a dryness and cleanliness of apartments, bedding and apparel, have ever seemed to me the best means of preventing the formation of fevers among persons collected in, and confined to a small space.
