Medical and Surgical Journal of Her Majesty's Convict Ship Mary between the 12th April and 3rd November 1823 during which time the said shop has been employed in a voyage from Woolwich to Hobart Town, Van Diemen's Land and New South Wales

PA310861

PA310861 ion	No. of Case	Men's Names, Ages, Qualities, Time when and where taken ill, and how disposed of.	The History, Symptoms, Treatment, and Daily Progress of the Disease or Hurt.
PA310862		Mary Parsons Ætatis 30 Woolwich May 13 th 1823 May 14 th 15 th 16 th 17 th	Embarked this afternoon after a painful journey from Worcester, in a weakly & sickly looking state, having fainted on coming on board, and would have been immediately sent back in charge of the officer who brought her on board, but the weather was wet, and she so fatigued and exhausted from the journey it would have endangered her life, consequently she was kept on board until advice should be obtained from the Secretary of State's office. She complained of pain in her chest, cough, and difficult respiration; said she had been unwell upwards of three months; she took some medicines at the commencement of the complaint, but more lately she is considerably emaciated and appears hectic. p. quick & very small. B. rather confined. She took a carminative Draught when Syncope took place on coming on board. Hab . Haustus Anodyne Hora Somni Had very little sleep in the night, says the pain is confined to the left side of her chest, and is increasd; cough not very severe, no expectoration, S: dry, T: rather white, B: conf ¹¹ , no appetite. Sum. Sulph. Magnesia 3fs et rept'. tertia quaque Hora donec operat et Vesp. rept' Haustus Anodyne adde – Vini. Antim, gt xxx The Cathartic did not operate and her Bowels are still constipated, other Symps as yesterday. Hab. Pil. Cathartic no ii et Sulph. Magnesia 3i post Hor – 4. nisi prius Soluta sit alvus – Rept' Haustus. She complains more today of the pain of her chest, her Bowels have not yet been opened although the Salts were repeated several times, no other changes. Hab. Pulv. Jalap 3ij et appl' Emp: Lyttæ parte dolent. - omitt' Haustus The Jalap produced several copious dark coloured offensive evacuations, The Blister has not yet risen; cough rather troublesome in the night, and she expectorated some dark coloured viscid mucus. She says the mucus has been suppressed the last three months. – p. rather accelerated towards evening, and the surface increased in temperature; and pervigilium- Utat'. Pediluvium Hor. et Hab. Ext. Hyoscyam gr iii Cough rather increased and e

Digitalis et Ext Hyoscyam: etc Hab: Emult: Pectoral. Jussae Urgent et Tinct. Opii g ^{tt} xxv Hor: Somni. She expectorated some pus last night mixed with blood. The debility seems to advance apace. – other Symptoms as last night Continuatur ut Heri. Pus tinged with blood continues to be brought up in considerable quantity, the Dyspnœa rather increased, the cough however is rather less troublesome, her face has the hectic flush very distinctly marked. P: small and irregular – no appetite, B; free. Cont ^r Mistur. Pectoral. Ungt. Tinct. Opii ad g ^{tt} xxx H.S. No change whatever in the Symptoms, the Sputa continues, abundant and of the same quality. Contr ut Heri. The Symptoms continue unabated and pus to be expectorated 2 P.M. She was sent on board the Hospital ship Alongo at Woolwich- By order of Mr Capper, Secretary of States Office.
rA310804	Elizabeth Moore Convict ætatis 27 Off Woolwich May 17 th 1823	Arrived this afternoon from Liverpool in a very sickly state, and would have been immediately disembarked again, but the Journey was so great, and the officer who accompanied her, requested she might be detained on board till Mr capper could be consulted, and arrangements made for her security and return to the Goal from whence she came. She says she was unwell before she left the prison, but got no medicine, complains of cough and pains in her Breast and Limbs. The extremities are at present very much woollen, anasarcous and covered with livid Blotches, her wrists are chafed and ulcerated with the Irons, she has much difficulty of breathing and her countenance is Leucophlegmatic. Her Limbs to be bathed in warm water. Flannel rollers to be applied, the ulcers dressed with simple [nit ^t ?] and an Anodyne Carminative Draught to be taken at bedtime.
	18 th	Swelling of the Feet, Legs, Hands & Arms continues, the ulcers on the wrists are superficial but very foul, p: quick but small, s: hot & dry, T: white, says the menses have not been regular for some months past Hab. Statim Jalap Potassæ Supernitrat ab Əj Calomel gr iv et Bitrat Potasse Suernitrat ǯfs in Aqua - Bulliant Solat, in Die
	May 19 th	The swelling of the Extremities subsides a little and the ulcers on the wrists look better, the Cathartic operated powerfully – Cont' Potassæ Supernitrat Žfs in Die
	20 th 21 st	Symptoms subsiding Cont ^r ut Heri Swelling of the Limbs continues to decline and other
		Symptoms to subside, Bowels much purged

PA310865	22 nd 23 rd 24 th 25 th 26 th May 27 th	Cont' Potassæ Supernitrat Complains today of pains in her Knees & Shoulders, the Anasarca has nearly disappeared and the Blotches almost gone Cont' Potassæ Supernitrat ut antea et Hab. itidem Pulv. Ipecac. Com.—Jj Hor. Somni. Complains this morning of severe pain in her right side, immediately under the mamma, increased by full inspiration, p: natural, S: cool, T: rather dry, pains in her Limb, still severe, B: very lax. Omitte Potassæ Supernitrate et Hab. Mistur. Diaphoretic quatuor in Die et applic' Emp. Lyttæ part. Dolente. Says the pain of her side is quite relieved, as Symptoms as last report. Cont' Mistur. Diaphoretic Pains in her Limbs still severe, swelling nearly gone, Function regular. Contin' medica'- Still complains of pain in her Limbs, Swelling and Blotches quite disappeared, perspires much in the night, no pain in her chest or side unless what is occasioned by the Blister.—Cont' ut Heri Says the pain of her side returned in the night- but there is no Symptom of increased action — Functions quite regular — and she has some appetite. Cont'. Mist. Diaph. Little change in the Symptoms, but she has a Leucophlegmatic appearance and in a very debilitated state. She is therefore with the approbation of Mr Capper (Secretary of State's Office) sent back to the Prison, until she is in a fit state to encounter the fatigue of the voyage. Sent back to prison on the 28th May 1823 in custody of Mr Amor, the officer who brought her on board — By order of Mr Capper.
	Mrs Rapsey Passenger Ætatis 26 At Sea June 13 th 1823	Has had swelling and pain of the right side of her Face the last two days, supposed to be produced by a bas Tooth, as several of them are carious, but as she could not refer to any in particular none of them were extracted. The inflamed swelling, and pain has increased very much the last 24 hours, and has extended to the Velum Palati, Tonsils and surrounding parts, deglution has become very difficult accompanied with sense of suffocation – <i>Linim. Ammon Camph</i> . Inhaling the steam from Vinegar, warm fomentations etc have been had recourse to without effect. There has been a little Febrile excitement the last two [Evenings?] but the pulse has always been very small & weak, <i>3fs of the Sulphas Magnesia</i> was taken yesterday without producing stools and her B. Are confined – she had gtt xxv of Tinct. Opii last night, but no sleep. The right cheek and the difficulty of swallowing increased, with considerable discharge of viscid saliva – **Hab. Jalap. **Dj Rhei gr xii Tinct Rhei 3ifs et Applr Emp: Lytæ Fauces. Extern.** The Cathartic which she took yesterday morning was instantly rejected, and she took Rhei, Carbon Magnesia

Discharged from the Sick List June 19th 1823	15 th 16 th 17 th 18 th 19 th	aa ∂j in the evening which operated freely. The Blister rose well and the pain swelling and inflammation much abated. The deglutition is also more free and she took a little Sago this morning. Slept pretty well, Febrile Symptoms quite subsided. Utatur Gargarisma -Deterg. Frequenter Swelling & pain continue to subside and deglutition to be more free. Cont ^r Gargarisma Continues to improve. Cont ^r Gargar. The Symptoms subside fast but she is confined to bed from Sea Sickness. Cont ^r Gargar. Deglutition nearly free and other Symptoms disappearing. Cont. Quite recovered. Discharged
PA310866	Susannah Wood Ætatis 3 months Child to one of the Convicts At Sea June 15 th 1823	Has been in a very bad state of health from her birth; the Bowels have always been irregular, and there is an affection of the respiratory organs apparently some malformation of the Heart. It became much worse last night, the Dyspnœa increased, and it vomited almost incessantly, the pulse scarcely discernible. A Blister was applied to the Chest and a small quantity of Magnesia – Peppermint water Tinct of Cinnamon etc given to appease the vomiting, which ceased at 6 o'clock this morning. The Blister has risen pretty well and it lays pretty quietly but the Dyspnœa increases. The Face is livid & she cannot swallow. No medicine The Dyspœa increased rapidly; the countenance became pallid and ghostly, and she expired at 4 this morning.
	Ellen Hardgrave Ætatis 32 Convict at Sea June 20 th 1823	Has been very Sea Sick the last week, a few days ago her menses appeared and have been to excess since yesterday morning, the Sickness at Stomach continues and she throws up a great quantity of vitiated bile, of a very dark colour, the alvine evacuations are of the same appearance and she seems much debilitated. T: white, p: rather quicker than natural, much thirst, no appetite. S: above the natural temperature. She took two or three doses of <i>Tinct. Ferri Mur.</i> and <i>Laudanum</i> yesterday which abated the flood of the Catamenia and little comes away today unless when she vomits, which is however frequent. She also complains very much of pain in her Stomach and Bowels, she has frequent calls to stool, but they are scanty. Hab. Calomel gr vi Opii gr i et post Hor. 6 Rhei Əj Magnes. Carbon. 3i Aqua. Menthe. Pip. 3ij The vomiting continued the greater part of yesterday, and the matter thrown up was of a very dark colour, The medicines she took yesterday morning were repeated instantly, the Calomel was repeated in the evening, and Catharsis took place about 12 o'clock since which there has been much purging of most offensive dark coloured

	Ţ	
		matter, principally deteriorated bile, Catamenia much
		less profuse. T: covered with a yellow fur, no febrile
		action, some griping, mouth affected with the Calomel.

PA310875	August 31st	Hab. Infus. Amara. Ži ter in die. She had four or five stools in the night, consisting principally of blood without any foul matter, and attended with griping and straining. Abdomen rather hard and a little tumefied and tender on pressure today, no soreness of the Gums as yet, T. White, S: dry, p:

natural. Rept' Pulv. Et Tinct Rhei etc at 29th Inst. et Sum. itiam Calomel gr vi Pulv. Antim ge iv mane nocteque et Opii gr ii Hora Somni si Tormina urgente September 1st The Rhubarb produced three tolerably large stools of pretty good appearance without Tormina orTenesmus, and she says she has no uneasiness in her Bowels today, a little appetite. Cont^r Calomel Pulv. Antim. et Opii ut Heri. The Griping, straining, & Tenesmus returned in the night and she had four stools containing blood, her abdomen is a little swollen again this morning, no affection of the Gums as yet, other Symptoms as last report, much Rept' Rhei ut antea, et post Hor. 3 Hab. Sulph. Magnesia 3ii nisi alvus prius exhono^r Cont^r Calomel etc etc ut Heri The Rhubarb produced four or five very ill conditioned evacuations, but without blood, which relieved all the Symptoms, but she says the griping returned in the night, but is gone off again, other Symp^s as yesterday. Cont^r Calomel P. Antim. Et Opii ut antea et Rhei si Tormina redits. The Rhubarb produced six or seven alvine evacuations, one or two of them pretty large, but all of them of very bad quality, and accompanied with much griping and tenesmus, abdomen continues a little swollen and painful on pressure, Gums swollen and of a dark red or nearly livid colour, and spongy but they do not bleed, they are not tender nor is the saliva at all increased. T: white, p: natural, S: soft. Debility increasing. Fric^r in abdominis – Ungt. Hydrarg 3i mane nocteque, omitted medica ut antea prescripta, et Cap. Calomel gr vi Pulv. Antim gr iii Opii gr i ter in die. The griping returns very frequently, and the alvine evacuations are of a very bad quality, consisting of grumous blood, pus, and mucus, but without straining or tenesmus, other Symptoms as yesterday. The Calomel was discontinued yesterday evening and the Pil. Hydrarg. substituted. Cont^r Pil. Hydrarg, gr v 3 in Die et Opii gr ii Hor. Somn. vel Tormina urgent. She had three very morbid alvine evacuations in the night, and five or six yesterday, the griping is severe occasionally, but she has no straining or tenesmus. The abdomen continues a little swollen and tender on pressure, no Ptyalism, Debility increases, no appetite. She has had wine ad libitum the last two or three days but her Stomach rejects it now. Omitte Pil. Hydrarg. Ey Cont^r Opii ut Heri Had a very bad night, she passed six or eight very bad stools containing blood, pus, and mucus with a little feecal matter, accompanied with much griping. Abdomen continues swollen as last report. Reptr Vesicator Abdominis et hab. Sulph. Magnesia 3ii 2nd quaque Hora usequadum opert September 8th A large livid fleshy substance came away per vagina PA310876 vesterday when she went to stool, followed by a considerable quantity of grumous blood, and at the same time she had a very large foetid dark coloured alvine

evacuation, which exhausted her very much, and since which the debility has increased rapidly, she has had no griping, or calls to stool since, but complains of much pain in her Back and Loins, her Stomach rejects everything, p. small and quick, S. cool, the Blister on the abdomen has not yet risen. Hab. Vini as Libitum et Opii gr ii Hora Somni Has had four or five very bad looking stools since yesterday, consisting of pus, blood and the ingesta very little changed, indeed everything she has taken from the commencement of the complaint has come away almost immediately after it w as swallowed; there was Delirium present in the night. No further discharge from the vagina, Debility fast increasing, says she has very little pain in her abdomen but those in her Back and Loins very severe. Her Stomach retains nothing but a little wine. P: 90 soft and regular, T: white but soft, Breath offensive. She took Dij of the Confect. Opiat last night, but had no sleep. Rept^r Confect. Opiat. mane nocteque et Cont^r Vini ad 10th Has had a very good night, and slept much. She had four or five alvine evacuations yesterday of the same bad quality, but none in the night, and she says she has had no griping since vesterday, the pains in her Back and Loins are much less severe. She perspired much in the night, after which she had a cold rigor, her Stomach retains the wine and a little barley water - other Symptoms as yesterday. Omitte Confect, Opiat. et Hab. Ol. Ricini 3j Cont^r 11th Had three stools in the night of very bad appearance, consisting of very dark coloured foetid matter, pus, and seemingly unchanged aliment. She complains much of the pains in her back and loins, but says she has no griping or straining at stool, no appetite, p: very small but regular. Says she was very cold in the night and slept little. Cont^r ut heri Had another restless night, but was not purged, and she says she has no uneasiness in her abdomen whatever, but was prevented from sleep by the pain of her back and Loins, very little tumefaction of the abdomen - altho' she has had no alvine evacuation since yesterday, and there is no discharge per vagina. P: this morning 72 pretty full and soft, S: soft, T: white, she had a little Delirium last night and accession of Fever. Debility advancing and she has taken nothing but a little wine. Rept^r Ol. Ricini et Cont^r Vini. 13th Had a very good night and slept the greater part of it, the Castor Oil produced two rather large evacuations yesterday, and she had two in the night of the same bad quality as usual. P: 84 and more firm, S: of the natural temper^e, but she says she feels cold, her Stomach retains the wine and a little Sago etc. Contia^r Vini 14^{th} She slept a great part of the night, and had but two small alvine evacuations unattended with griping or straining,

pains of the back and Loins much less severe. P: 70 soft

& small T: rather dry but clean, S; natural

		Cont ^r ut antea
PA310877	September 15 th	Slept very little last night, and had a severe rigor. Three alvine evacuations, one of them of a dirty white colour with mucus, the others very dark and consist ^d of mucus and grumous blood, passed without straining or other unpleasant sensations, no change in the other Symptoms. <i>Contia</i> ^r <i>Vini ut antea</i>
	16 th	She complains this morning of oppression at the Precordia with a sensation of Fainting, and pain in her Stomach, had one scanty stool only in the night without griping or tenesmus. P: S: and T: as last report, a little appetite. Cap. Sulph. Magnnesia 3ii 4tis quaque Hora
	17 th	usequedum – fluet alvus - Cont ^r Vini Says she had very little sleep in the night, three alvine evacuations from the Salts, more copious but of the same quality as usual, unattended with uneasiness, she still complains of oppression at the precordia, and a little Dyspnœa. Appetite extremely keen – other Symptoms as yesterday. Continuetur Vini
	20 th	No change in the Symptoms, she continues to pass a considerable quantity of pus, sometimes attended with griping, but no straining or tenesmus. Appetite very various, she has very little today, there is still a little tumefaction of the abdomen and is tender on pressure. Gums still swollen and very dark coloured altho' there is no appearance of Scorbutus. Alvine evacuations scanty and some griping this morning. The debility does not appear to have advanced much the last four or five days, altho' the Symptoms do not yield. *Rept' Sulph. Magnesia ut antea et Cont' Vini.
	September 21st	The Salts brought away a great quantity of pus, blood and mucus, abdomen rather more swollen and painful on pressure, she has entirely lost her appetite and the debility advances apace. Appl. Fotus. Abdomini et utatr Balnes Tepid, Vespe Contr Vini ad Libitum et Sum. Opii ge ii Tormina
	24 th	urgent. Pus continues to be passed in large quantity per ano — She was very weak after coming out of the Bath and continued very faint for some hours, after which she perspired very much. Her abdomen is more enlarged and very painful on pressure, and seems to contain some kind of fluid p: 72 soft and regular, no appetite and debility fast increasing. Rept ^r Fotus, Abdo ^s frequenter et Frien ⁿ cum Linin. Ammon. Camph. Contr Vini et Opii ut antea.
	28 th	Five or six evacuations of pus and blood are generally passed in the course of the Day, and the nights are passed without sleep, the debility however does not appear to advance so fast as might be expected, however last night she lost the power of speaking, and swallowing two or three times. Epistaxis took place this morning, and she lost two or three ounces of blood, the pulse cont ^s very good, the skin is genial, and she sometimes has an appetite. Abdomen considerably tumefied and painful, and she still complains of pains in her Back. <i>Continr Fotus. Linim. Ammon ect Vini et Opii ut antea</i>

	204.	
PA310878	October 1st 4th 6th Sent to Hospital at Hobart Town Van Diemen's Land. October 6th	The Epistaxis recurred yesterday and again this morning, and blood escaped from her mouth also. She lost about two ounces yesterday, and four today, it is however more of the nature of serum scarcely having the sanguineous appearance. She had a severe convulsive paroxysm in the night which however was of very short duration, she has passed a large quantity of very dark faecal matter at different times since yesterday morning, without blood or pus, but accompanied with much griping and tenesmus, rather less tumefaction of the abdomen, and voice still strong. P" 82 rather sharp but regular, T. Furred, countenance ghastly, and debility great, and She cannot take even wine this morning. Hab. Ol. Ricini 3fs et rept' post Hor. 4 nisi alvus prius fluerit – Cont' Vini ad Libitum No return of the Epistaxis or Convulsions. The castor Oil produced but two liquid dark coloured stools, and she had two in the night more abundant consisting of Blood, Pus and mucus, complains much of the pain of her abdomen today, which is more swollen, other Symptoms as yesterday. Cont' Vini The Haemorrhage from the Nose returned yesterday but a very small quantity escaped. Pus, blood and some fæcal matter continue to be passed in considerable quantity-Abdomen rather less tumefied, Debility does not advance very rapidly, and she has a little appetite today. Cont' Vini She sleeps much better, and the swelling and pain of the abdomen subsided very fast, the quantity of pus discharged is greatly diminished, there has been no return of the n convulsions, or Haemorrhage from the Nose, her appetite is much improved, and she even seems to gain strength. Sent to Hospital at Hobart Town Van Diemen's Land.
	Martha Donlevy Ætatis 2 years Child to one of the Convicts at Sea July 1st 1823	Has been rather unwell the last five or six days, Ascarides having appeared in her Stools they were supposed to be the cause, as she had Symptoms of them unattended with much febrile action, and she took several doses of calomel, Rhubarb etc for them She however became much worse last night, and has been a little Delirious. Her strength is considerably reduced, Bowels have been generally confined unless when she took medicine. She has a little Fever this morning, p: 108 but very small, T and Teeth furred, S: rather hot and dry, She says she has no H ^d ache nor has she complained of anything since she became unwell, one of her cheeks is sometimes flushed, but she is generally pallid, no nausea, vomiting or sickness at Stomach. Utat' Staim Balnea Tepid et postea cap. Calomel gr iii Pulv. Rhei Jalap aa gr vi The Cathartic produced three tolerably large foetid dark coloured stools without vermes, very little Febrile excitement today, but she is sometimes incoherent, and much alarmed least she falls, is greatly disturbed in her sleep, and frequently calls out that she is falling, she slumbers much and is averse to the light, altho' she never showed any Symptom of affection of the Head. The

		nunils are quite natural, but her Eyes rather heavy. D. less
PA310879	July 3 rd	pupils are quite natural, but her Eyes rather heavy. P: less quick today and her skin pretty cool, T: rather dry and it has a little brown fur on it. She has not taken any kind of Food, and very little drink since she became unwell, and is very fretful and uneasy when moved. *Abradatur Capillitum et Appl. Aqu- Frigid et Aceti frequenter. *Rept' Cathartic ut heri et Vespe appl Emp. Lyttae Capitis si Symptoms Cont'. The Cathartic which was given her yesterday was very dilatory in operating and she took Žii of the Infusion of Sennæ which produced several evacuations, some of them large and very fætid, since which she has been quite quiet, but is insensible to surrounding objects, she seems to sleep or slumber much, tho' not comatose, the Pupils are rather more dilated than natural, she had a slight convulsive paroxysm this morning. P: 86 only and very small and weak, T: clear and moist, S: rather above the natural temperature, She has taken a little Sago today, her Mother would not allow the Blister to be applied. *Rept' Balnea Tepid, *Rept' itiam Cathartic ut Heri et Cont' Solio Frigid Cap.* She has lain in a comatose state since yesterday evening. A Blister was put on the nape of her neck and shoulders which has produced a good dale of irritation, and she seems to feel it, has had another convulsive paroxysm this morning, and passed two rather large dark coloured fætid stools, p: 120 this morning, feeble and intermitting.
	5 th Died July 5 th 1823	S: hot. Pupils dilated and insensible, but she retains the power of deglutition. Sum. Ol. Ricini 3ii 2 ^{da} quaque hora usequedum fluet alvus. Rep ^{tr} Balnea The Castor Oil produced two very morbid alvine evacuations, containing a great number of Ascarides and a considerable quantity of fibrous looking matter with blood, after which she sank rapidly and expired at 5 o'clock this morning,.
	Ann Simms Ætatis 25 Convict at Sea July 7 th 1823	Has complained since the night before last, when first attacked she said she felt most severe pain in her Stomach, attended with sickness and vomiting of dark bilious matter. She took at that time Calomel gr x and Tinct. Opii gt x which were immediately rejected, but soon after repeated, and again brought up, the vomiting continued with little intermission until last night, and every thing she attempted to swallow was immediately rejected; her Bowels were rigidly constipated, and she seemed to suffer much, the p. at 5 o'clock yesterday evening was full and frequent, the skin yellow and what she vomited seemed to be of a Stercoraceous nature, has had no alvine evacuation for three days, her Tongue covered with a dark yellow fur, and she had an unquenchable thirst Žxxxvi of blood was taken away at that time, she was put into the hot Bath, a large Blister applied to the Epigastric Region, a Stimulating Enema thrown up and repeated every two hours. She also took <i>Calomel gr x Ext. Cathart gr v</i> every four hours.

		The Bleeding produced much disposition to Syncope. The first enema brought away a large quantity of dark coloured hardened Faeces, with much relief, and the two succeeding Glysters also effected the evacuation of the Intestines, a great quantity of hardness faces being passed. The Calomel and Cathartic Extract were given but twice. She has had no returns of the vomiting, her Gums are inflamed from the calomel, but she feels quite relieved. She has had no stool as yet unless from the Enema. Sum. Jalap Əij Infus. Sennæ Žij
PA310880	July 8 th	Rept ^r Infus. Sennæ 2 ^{da} quaque Hora usequedum Exhono ^t . alvus. The Jalap etc produced a great number of stools, some of them very large and contained numerous small hardened Scybala of a very dark colour. Her mouth is very sore but
	9 th	she has no other complaint. – No medicines. No stool since yesterday. Ptyalism very abundant.
	10 th	Rept ^r . Cathartic ut heri The Cathartic operated powerfully and brought away a considerable quantity of fœtid but more fluid matter, and she says she has no uneasiness today but from her mouth.
	11 th	No medicine. Bowels confined again, but she says she has no unpleasant feelings from it.

	6 th Sent to Hospital at Hobart Town Van Diemen's Land October 6 th 1823	attended with a good deal of griping and straining; She took <i>Calomel gr x et Opii gr ii</i> last night since which she has had no uneasiness. Sum. Calomel gr vi bis in Die et Cont ^r alia ut antea. Her Bowels continued to be irregular and she had occasional uneasiness, the dejections did not improve in appearance. She had however regained some strength before we got to Van Diemen's Land where we sent her to Hospital.
PA310895	William Wood Æt 2 ½ years Child to one of the Convicts at Sea August 21st 1823	He had slight Diarrhoea for some time past, for which he has taken frequent small doses of Calomel and Rhubarb, but it has not yielded to them. About four weeks ago a pustular Eruption appeared on his Face, Head, and Limbs, for which he took several small doses of Calomel and Jalap, and a small Blister was applied to the nape of his neck as his Eyes were affected. The inflammation of which soon subsided and the Eruption declined. An affection of the chest then supervened, and the cough and Dyspnœa were severe until a Blister was applied to the sternum, which relieved the Dyspnœa, but the cough is still severe, particularly at night, which generally excites vomiting, when a great quantity of mucus is brought up. There has been no increased action unless a little occasionally at night, his skin becoming rather hot and some thirst arising, He perspired very much until a few days ago, sine which his skin has been quite dry, but cool. The Diarrhoea took place on the disappearance of the Eruption, and has not yielded in the smallest degree, although he has taken a considerable quantity of Calomel, Rhubarb, Mist. Cretæ etc etc as Symptoms indicated, and occasion required. The alvine evacuations have been of a dark green colour until yesterday when they consisted of clots of blood much mixed with mucus, and some very dark fettid matter; the Diarrhoea however never has been very severe, three or four stools generally in the 24 hours. There has been no tumefaction, or tenderness of the abdomen on the most forcible pressure. He was a very robust healthy child but is now much reduced, his appetite continued good until a few days ago, but he never would make use of anything but animal Food, and since he came on board has lived entirely on Salt Meat, he takes nothing whatever now, and his stomach rejects the medicine. A Flannel roller was applied to his abdomen when the Diarrhoea first commenced. Calomel gr it et Rhei gr ix were given him night and morning omitting the rhubarb as occasion required, and adding the Species Con

PA310896	August 22 nd	The cough has been very sever all night almost incessant
		and excited much vomiting, he has not slept more than an hour, had three stools of a dark bird lime appearance without blood, but very fætid, some of which is frequently forced away by the cough, no heat of skin and very little acceleration of pulse. The Blister on his Breast is not yet well, his stomach rejects everything he is forced to swallow. Hab. Rhei gr iv. Magn. Carb. gr x Tinct. Rhei 3i statim et Hor. tres elapsis Injici ^r Enema Dom. He cannot be forced to take a sufficient quantity of the Vini Antim etc to insite vomiting but he expectorates a great quantity of very viscid ropy mucus, which came up with much difficulty, and he had another very bad night from the cough, there was no increased action however .Bowels open and the evacuations of the same appearance some appetite this morning. Cont' Emult et adde Vini Antim gtt x Tinct. Scillæ g^{tt} v The cough continues to be extremely severe, and does not seem to be appeased by any medicine he has taken, the Vini Antim etc excited vomiting vesterday, and he brought up a considerable quantity of tough phlegm, but the cough was not relieved thereby, he had another restless night from it, some accession of Fever, he has

some Dyspnœa; he had but one alvine evacuation since yesterday morning, it was abundant however and of good appearance. There has been a considerable increase of saliva the last three days, and his breath has a little of the mercurial fetor, altho' he has not taken any Mercury since the 24th ult nor did it appear to have affected the System until now. There are three or four small ulcers on his Tongue, but his Gums are not at all inflamed. His appetite has declined again and the debility increased, His mother cannot be prevailed upon to repeat the Omitte alia medica ut antea prescripta, et Hab. Sequent. Sacchar Živ Aqua lbifs [eoque?] ad lbi et Cap. Šfs Zussæ Molestas Very little change since yesterday, the cough is still very severe, he expectorates a little viscid mucus but he has much difficulty in getting it up, has had but one small dark coloured stool since yesterday morning- other Symptoms as yesterday. Hab. Ol. Ricini 3\(\frac{3}{2}\)fs et rept^r post Hor 4 si opus sit, Cont^r. Mist. Pectorale ut heri. The Castor oil produced three dark coloured and very fœtid dejections, his abdomen appears a little tumefied today and tender on pressure. Cough not at all mitigated. no appetite; debility increasing. Frict Abdominis cum Ol. Ammon. Camp. 3 in die -Utt Balnea tepid et Cont. Mist. Pector. ut Heri. The cough continues very troublesome, and deprives him of rest. he had two small dark green coloured alvine evacuations yesterday, and one in the night of some consistence. he has expectorated a great quantity of ropy phlegm since yesterday, he craved for a drink in the night, altho' he has little fever. the abdomen continues a little tumefied. Hab. Jalap. Rhei aa gr viii Tinct. Rhei 3ifs. Cont^r Mist. Jussæ et Linim Ammon ut Heri He passed another very bad night, the cough is not at all abated, he vomited the Rhubarb about half an hour after he took it, but it produced five dark yellow coloured stools in the course of the day, small but of some PA310900 consistence. Abdomen not much tumefied. He became very hungry in the night and his mother very imprudently gave him a little salt pork, which he ate voraciously, but he would not touch some fresh mutton which she offered him, nor any other kind of food, indeed he never has taken any kind of mild or bland food such as Sago, Arrow Root, or any other kind of spoon meat, either before or since his illness, unless a few spoonfuls of strong soup. p. this morning 125 and very small. S. rather hot and dry. debility increasing apace. Cont'. Emultis pector et Rept' Balnea – Hab. Vespe Rhei gr x Calomel gr viii nisi prius solute fuerit alvus. Very little change in the Symptoms this morning .he had little sleep the cough being troublesome. The Rhubarb and Calomel were thrown up soon after they were taken. he had two tolerably healthy looking alvine evacuations in the night, there was some fever present. p. this morning 120 and very feeble. Appetite declined.

not expectorated any since yesty evening, and there is

		Abdomen less tumefied Ptyalism nearly ceased but his
	$10^{ m th}$	tongue is still sore, less expectoration. Rept'. Rhei et Calomel ut Heri. presca, et Cont. Mist. Pectoral. He had rather less cough last night, but no expectoration, and he was very restless although there was no Febrile Symptoms present. He did not take the
		Cathartic yesterday, and had but one evacuation in the night which was tolerably large, and of good appearance, abdomen very little swollen, appetite unnaturally great today again, but he will eat nothing but Flesh meat, p. 100 more full and soft, no thirst, T. still white but the ulcers are healing and Ptyalism decreasing fast. Hab. statim Rhei gr x calomel gr iii Tinct Rhei 3i et Vespe Ol. Ricini 3fs nisi prius Soluta fuerit alvus. Contr. alia ut antea.
	11 th	The Castor Oil was given yesterday evening which produced but two evacuations which however were large and of good appearance. Cough & other Symptoms as yesterday.
	12 th	Contr. Mistura Jussæ There was no change in the Symptoms as last described until last night, at 11 o'clock when he was seized with a slight convulsive paroxysm, which subsided in a very little time and he went to sleep, but was awoke at three this morning with another Paroxysm which terminated only with his life. He was put into the hot Bath two or three times, Volatile Anodyne and Camphorated Embrocations, Friction etc etc were had recourse to with stimulating and Anodyne Enemas without benefit, and
	Died September 12th 1823	death terminated his suffering at 8 o'clock this morning.
PA310891	Mrs Moore Ætatis 26 Passenger at Sea September 19 th 1823	Has been in a delicate state of health the last two months and rather advanced state of pregnancy. She suffered very much eight or nine months ago from variola. About two months ago she caught a slight cold, which produced a troublesome cough, and continued until a little time back, after which her Bowels became deranged and have been very irregular the last fortnight. She has taken occasional small doses of the Tinct. Rhei with advantage. She has also been afflicted with pyrosis, and great irritability of Stomach, want of appetite etc, the latter Symptoms were sometimes attributed to the motion of the ship, which has been very great. On the 16 she was seized with Labour pains, three weeks or a month prematurely, and in a few minutes she had a safe delivery. The child was small and weak, and could not suck. She appeared to do very well until last night. The Placenta came away a few minutes after the birth of the Child, and she had a natural quantity of the Lochia which still continued to come away, but is very moderate. Her Bowels were very uneasy a few hours before the Labour commenced and she took Žvi of the Ol. Ricini, which produced a good deal of Catharsis. An Anodyne Draught

		D 11 I 1 1 1 1 1 1
		Bowels became easy. Last night however she was seized with griping, frequent calls to stool, depression of
		strength and sinking of the pulse, no tumefaction of the
		abdomen, but a little tenderness on pressure dejections
		small in quantity and consist of mucus only. She has
		sickness at Stomach and frequent vomiting but no pain in
		the Epigastm.
		Appl ^r . Statim Lotio Calidan abdomen et Rept ^r Formina
		Ungt. et Hab. Calomel gr x Opii gr i. Port Wine negus in
	20 th	small quantity as the Stomach will retain it.
	20	She had a tolerable good night, but complains of having been much disturbed by the motion of the ship; no stool
		since yesterday evening, and very little griping. She has
		been very much annoyed with Singultus the last two days
		which however is not just so troublesome today. P. 118
		and extrernely feeble. S. Natural T. A little white but
		soft. She has a little appetite and takes a little of the port
		wine negus occasionally. No vomiting since yesterday.
		The Child sucks a little, but there is very little milk secreted.
		Cont ^r Vini et Rept ^r Fotus etc sit necessitas
	21 st	She had but one small alvine evacuation yesterday
		without much griping or other uneasiness, which
		consisted of a little dark coloured fæces with mucus,.
PA310892		The griping however returned last night at 9 o'clock and
		she took a grain of Opium but it did not appease the Tormina, soon after she had three pretty copious slate
		coloured stools; since which she has had no uneasiness,
		she says the tenderness of the abdomen on pressure still
		continues, but there is not the slightest tumefaction. The
		Child sucks a little and she has a little more milk, her
		Gums are quite sore and breath offensive from the dose
		of Calomel she took. P. extremely quick and feeble, and
		the debility is considerable. She retains a little appetite however and takes a little port wine.
		Cont ^r Vini et hab. Ol. Ricini Žfs si Tormina redita.
	22 nd	She had a very good night and slept the greater part of it.
		She was not obliged to take the castor Oil, her Bowels
		have been quite easy and she had but one stool in the
		night, which was of a better quality than usual, and she
		complains of nothing today but Debility, p. 84 & more full, T. Clear, S. genial
		Cont ^r ut Heri
	23 rd	Had a restless night from the excessive motion of the
		ship. One small dark coloured evacuation only – attended
		with griping and tenesmus, p. good, T. Clean, S. Soft,
		Gums and Tongue still sore, a little appetite
	September 24 th	Hab. Rhei gr x Tinct. Rhei 3i Cont' Vini Slept very well in the night, the Rhubarb produced two
	September 2-4	tolerably large stools nearly of the colour of the
		medicine, since which she had felt no uneasiness.
		Appetite pretty good. Cont ^r . Vini
	27 th	She continues to improve and her Bowels are pretty
		regular. Her Child was found dead in her arms this
		morning when she woke. It had a difficulty in respiring
		from its birth, and was so very weak it was not expected to live many days – it had not sufficient strength to suck
		and took very little Food of any kind.

GENERAL REMARKS

The preceding Journal contains all the cases of Sickness of any importance that occurred on board the Mary Convict Ship, during the time the Convicts were on board and if we except the Children there was no fatality, nor indeed much Sickness, and two or three cases only proving obstinate. The young Children however suffered much, out of 28 embarked six poor creatures fell Sacrifices to the iniquity of their Mothers. Their death may be readily accounted for in the deprivation of their natural nourishment; four of them being very young, and in a very bad state of health when they came on board, to add to which, they were bereaved of their natural Food by their mothers losing their milk very soon after they embarked and no appropriate Substitute being on board, Their Bowels either from deficiency of good or the use of improper food (or probably both) became deranged, and every means that could be devised of restoring them to a healthy state were had recourse to, but everyone proved equally unsuccessful.

It will be seen by the abstract that Scurvy never shewed itself in any form, and we had but one case of Fever, which may be attributed to the Lower Deck, or Prison having been kept perfectly clean and dry, although we had much rough weather, particularly from the Cape of Good Hope to Van Diemen's land. The Convicts being allowed free access to the upper Deck, and indeed often compelled when they would not come up voluntarily, from day light in the morning to Sunset, when the weather would permit, together with the cleanliness, order and regularity which they were at all times obliged to observe, contributed in no small degree towards it.
